**The Economic Development of Bangladesh within a Socialist Framework** Keith Griffin, E. A. G.

Robinson, 2016-02-03      **Bangladesh's Road to Long-term Economic Prosperity** M. G. Quibria, 2019-02-19 A must read for anyone interested in understanding complexities of development process Fakhruddin Ahmed former Governor of the Central Bank of Bangladesh Policy makers and general readers including specialists would find this lucid analysis very useful Nurul Islam Deputy Chairman of the First Planning commission of Bangladesh The author provides both valuable caution and useful guides to everyone interested in Bangladesh's economic future Salim Rashid Emeritus Professor of Economics University of Illinois USA This book examines the recent emergence of Bangladesh as one of the fastest growing economies in the world Identified by Goldman Sachs as being on a meteoric economic rise the country has dwarfed India in social improvement also Attempting to build on these successes the Bangladeshi government has set the ambitious aim of attaining the status of fully developed country by 2041 This study identifies the trifecta of major risks which could derail Bangladesh's upwards trajectory the rapid development of robotics and artificial development the uncertain political and economic global landscape and the constant threat of climate change and natural disasters In order to stay on track the government will need to address various social political policy and institutional challenges facing the economy including poor governance inadequate physical infrastructure skill and educational bottlenecks demographic burden dwindling social capital and lack of transformational leadership      **South Asian Economic Development** Moazzem Hossain, Iyanatul Islam, Reza Kibria, 1999

The notion that South Asian economies have tended to be less successful than those of East Asia is critically examined and the reasons why discussed Countries covered include Pakistan India Bangladesh and Sri Lanka Key issues examined agriculture and rural development labour market and human resource development trade and industry policies foreign investment and technological capabilities foreign aid and economic development financial development and economic performance poverty inequality and economic development regional economic co operation green development      **The Agrarian Structure Of Bangladesh** F. Tomasson Jannuzi, James T Peach, 2019-07-11 The relationship between the agrarian structure of Bangladesh and its problems of rural development is established in this study based on four years 1975-79 of field research The authors suggest that the concentration of land in the hands of a rural elite is the principal impediment to the participation of weaker sections of the peasantry in economic progress Tracing the failure of local attempts to change Bangladesh's agrarian structure by legislative means they outline a modified program for rural development that is linked to agrarian reform Agrarian reform Drs Jannuzi and Peach argue is the prerequisite for a rural development strategy that provides for both economic growth and improved income distribution thus approaches to rural development in Bangladesh that place reliance on new agricultural technology without first changing the institutions that determine people's relationships to the land are not viable The authors policy recommendations grounded in new data on the relative

proportions of owners of land sharecroppers and the landless are supplemented by a theoretical analysis of the institution of sharecropping and detailed field work methodology **Handbook on the South Asian Economies** Anis

Chowdhury, Wahiduddin Mahmud, 2008-01-01 With its higher economic growth in recent years South Asia is becoming an increasingly important region in the global economy This volume provides a very useful introduction to the economics of the region and will be of considerable interest to both students and researchers John Weiss University of Bradford UK The editors and contributors are to be congratulated for this comprehensive and original survey of the enormously important and diverse South Asian economies Hal Hill Australian National University The Handbook on the South Asian Economies edited by Wahiduddin Mahmud and Anis Chowdhry is a collection of essays on political economy of development of all seven South Asian countries It is also one of only a few books available in the market covering all economies of South Asia Hence it fills a gap in the literature on South Asian Development One very important aspect of the book is a clear recognition by the editors that South Asia's development will have to be studied and analysed within the context of its socio political institutions and hence not by relying solely on its economic policy regimes I recommend this book to scholars of all disciplines Kartik Roy University of Queensland Australia This Handbook on the South Asian Economies a companion to the Handbook on the Northeast and Southeast Asian Economies is a comprehensive and unique collection of original studies on the economic and social development of countries in South Asia The analytical narratives draw upon a wide range of extant literature in an easily accessible way whilst highlighting the impact of socio political factors on economic outcomes The introductory chapter by the editors provides a comprehensive survey of the main features of South Asian economic development especially in respect of the policy reforms since the late 1970s The Handbook seeks to understand the varying degrees of achievements in economic transformation and social development in various parts of South Asia and ponders whether these experiences indicate alternative pathways of socio economic progress or provide a unique framework for a South Asian development model The experiences of economic reforms across the South Asian countries with their distinctive socio economic settings and public cultures may thus provide fresh perspectives on the emerging development paradigms The Handbook is indeed based on the premise that development economics and South Asia have a lot to learn from each other As with the Handbook on the Northeast and Southeast Asian Economies this latest Handbook will be an invaluable reference work for many years to come for researchers academics and students of Asian studies and economics Policymakers interested in learning more about the background and future opportunities and challenges posed by these economies will also find much to engage them

**Renegotiating Patriarchy** Naila Kabeer, 2024-09-26 The idea of the Bangladesh paradox describes the unexpected social progress that Bangladesh has made in recent decades that has been both pro poor and gender equitable This began at a time when the country was characterised by extreme levels of poverty poor quality governance an oppressive patriarchy and rising Islamic orthodoxy This paradox has evoked a great deal of interest within the international development

community because Bangladesh had been dubbed an international basket case at the time of its independence in 1971 seemingly trapped in a development impasse Previous attempts to explain this paradox have generally taken a top down approach focusing on the role of leading institutional actors donors government NGOs and the private sector In *Renegotiating Patriarchy* Gender Agency and the Bangladesh Paradox Naila Kabeer starts with the rationale that policy actions taken at the top are unlikely to materialise into actual changes if they are not acted on by the mass of ordinary women and men But what led these women and men to act And why did they act in ways that modified some of the more oppressive aspects of patriarchy in the country That is what this book sets out to investigate It describes the history of the Bengal delta and the forces that gave rise to the kind of society that Bangladesh was at the time of its independence It considers the policy and politics that characterised post independence Bangladesh and how these contributed to the progress captured in the idea of the Bangladesh paradox But the key argument of the book is that much of this progress reflected the agency exercised by ordinary often very poor women in the course of their everyday lives Their agency helped to translate institutional actions into concrete changes on the ground To explore why and how this happened the book draws on a rich body of ethnographic qualitative and quantitative research on social change in Bangladesh including studies by the author herself The book is therefore about how norms and practices can change in progressive ways despite unpropitious circumstances as a result of the efforts of poor women in Bangladesh to renegotiate what had been described as one of the most non negotiable patriarchies in the world
