Economic Growth Poverty And Household Welfare In Vietnam:

Economic Growth, Poverty, and Household Welfare in Vietnam Paul Glewwe, Nisha Agrawal, David Dollar, 2004-01-01 With the adoption of new market oriented policies Vietnam has transformed itself from one of the world's poorest countries during the 1980s into an economy with one of the highest growth rates during the 1990s Using macroeconomic and household survey data this publication examines a range of issues including the causes of Vietnam's economic growth and future prospects the impact on household welfare and poverty levels school enrolment child health and other socioeconomic outcomes and the nature of poverty in Vietnam and the effectiveness of government policies for poverty reduction drawing lessons for Vietnam and for other low income developing countries

Economic Growth and Employment in Vietnam David Lim, 2014-03-21 Vietnam has enjoyed significant economic success since the implementation of its doi moi reforms including rapid growth in GDP exports and foreign and domestic investment and a shedding of poorly performing state owned enterprises Despite this however the economic situation for many ordinary people in Vietnam is fragile with income only just above the poverty line and high unemployment especially among the young In addition inflation is high and the state owned sector is still large much of it still performing badly This book provides a comprehensive overview of the current economic situation in Vietnam It outlines the state of the economy paying special attention to employment discusses government policies including on trade and integration with the global economy and concludes by assessing the key challenges facing Vietnam's economy going forward

Household Welfare and Vietnam's Transition David Dollar, Paul Glewwe, Jennie Ilene Litvack, 1998-01-01 Vietnam's rapid growth has transformed the country reducing poverty from about 75 percent of the population to about 50 percent At the same time its transition from a planned to a market economy has created new challenges for public policy in a wide range of areas This volume explores issues such as which macroeconomic and structural reforms led to growth what effect reform has had on the household economy and how the transition has affected education health fertility and child nutrition It provides an analysis of economic and social policies and shows how micro level data can be used to analyze the likely effect of different government expenditures and activities It also focuses on the effect different policies have on the poor and challenges stereotypes about poverty focused expenditures

Land, Poverty and Livelihoods in an Era of Globalization A. Haroon Akram-Lodhi, Saturnino M. Borrás Jr., Cristóbal Kay, 2007-01-24 Here internationally renowned scholars explore the structural causes of rural poverty income inequality and the processes of social exclusion and political subordination across Africa Asia and Latin America

Global Child Poverty and Well-Being Minujin, Alberto, Nandy, Shailen, 2013-01-28 Child poverty is a central and present part of global life with hundreds of millions of children around the world enduring tremendous suffering and deprivation of their most basic needs Despite its long history research on poverty and development has only relatively recently examined the issue of child poverty as a distinct topic of concern This book brings together theoretical methodological and policy relevant

contributions by leading researchers on international child poverty With a preface from Sir Richard Jolly Former Assistant Secretary General of the United Nations it examines how child poverty and well being are now conceptualized defined and measured and presents regional and national level portraits of child poverty around the world in rich middle income and poor countries The book s ultimate objective is to promote and influence policy action and the research agenda to address one of the world s great ongoing tragedies child poverty marginalization and inequality

Growth, Structural Transformation, and Rural Change in Viet Nam Finn Tarp, 2017 Provides in depth evaluation of the development of rural life in Viet Nam over the past decade combining a unique primary source of time series panel data with the best micro econometric analytical tools available

Labour Market and Industrial Relations in Vietnam Ingrid Artus, Judith Holland, Uwe Blien, Van Phan thi Hong, 2016-10-20 The society and economy of Vietnam is still characterised by a rapid transformation process There is high economic and political pressure coming not only from internal developments but also from foreign countries This groundbreaking book takes stock of the rapid processes of change in the labour market and the industrial relations of Vietnam The contributions of Vietnamese and international experts cover the institutional arrangements of the labour market and of the system of industrial relations and they also look at consequences for welfare and social inequality and treat the relation between culture and the economy in the country Further contributions compare Vietnam with other developing country and analyse the relationships between international and Vietnamese labour markets They also address the key question as to whether Asia is a new focal point of industrial conflicts

Agent Orange and Rural Development in Post-war Vietnam Vu Le Thao Chi, 2020-03-04 Vu tells the story of Vietnamese farmers who have survived a 30 year war of independence and unification its damaging legacies in their living environment and the unfamiliar pressure of the market economy Vietnamese farmers are neither simply obedient beneficiaries of policy decisions made by higher authorities nor convention ridden cyphers Rather they are sophisticated decision makers capable of navigating the changes threatening to disrupt their lives over multiple generations Vu s research pays particular attention to those farmers whose families have suffered from direct and indirect exposure to the toxic herbicides popularly known as Agent Orange She demonstrates that their priority has tended to be the protection of their existing assets rather than pursuing the promise of new riches and that this tendency has helped them maintain stability in a turbulent economic environment A fascinating study for scholars of Vietnamese anthropology and society the book will also be of interest to sociologists and economists with a broader interest in the impact of economic and political change on rural lifestyles

Why Poverty Persists Bob Baulch, 2011 Why Poverty Persists significantly advances our understanding of the temporal dimensions of poverty Its judicious mix of new evidence and improved methods offers new insights into why some people remain mired in poverty and the forces that keep them there All those interested in combating poverty academics donors and those working in the non governmental organizations will learn from the carefully constructed African and Asian case studies presented John Hoddinott International Food Policy

Research Institute Washington DC US Ten years ago Bob Baulch and John Hoddinott drew our attention to the phenomenon of poverty dynamics an insight into the unpredictability of poor peoples livelihoods that had profound implications for poverty thinking and policy forcing a rethink of static conceptualisations and measurement and raising challenges for targeting anti poverty programmes In this new volume Baulch and colleagues enrich this understanding with rigorous analysis of panel datasets from six countries in Africa and Asia Most impressively this illuminating collection by technical microeconometricians is equally accessible to non technical readers which effectively communicates its important messages to development policy makers and practitioners Stephen Devereux University of Sussex UK This volume on poverty dynamics in developing countries whose authors include the leaders in this field is a must for analysts and research students It advances the literature by addressing three important issues measurement error attrition and tracking For each of these questions the volume leads by example showing how they can be handled in specific cases The results show that escape from poverty is a diverse phenomenon and establish the importance of country and context specificity The volume provide an analytical platform for careful policy assessment of policy alternatives Ravi Kanbur Cornell University US At the beginning of the 2000 2010 decade Bob Baulch with John Hoddinott was setting the micro econometric agenda on poverty dynamics and chronic poverty and producing work that non economists had to read if they wanted to conduct serious research on these issues In this volume though his analytical excellence the pursuit and methodological rigour extraordinary energy and his ability to lead such a distinguished network of colleagues Bob Baulch has set the research agenda on poverty dynamics and chronic poverty for the next ten years From the foreword by David Hulme University of Manchester UK *The World Bank Research Observer* ,2004 *Delivering on the Promise of Pro-poor Growth* Timothy Besley,Louise Cord,2007 Economic growth is the most important determinant of poverty reduction But countries with similar rates of growth can experience different poverty reduction rates **The Economic Consequences of Health Shocks** Adam Wagstaff,2005 Food Prices and Rural Poverty Centre for Economic Policy Research,2010-10 The link between food prices and poverty is as complex as it is important Aksoy and Hoekman have put together a book that significantly advances our knowledge of this link The book not only explores the conditions under which the poor are affected by food price movements but includes a number of empirical studies on the price poverty link in specific developing countries It deserves careful study by governments and NGOs Tim Josling Professor Emeritus Food Research Institute and Senior Fellow Freeman Spogli Institute for International Studies Stanford University The timing of this book could hardly have been more appropriate while the international community still ponders on the poverty implications of the 2007 8 global food crisis food prices are on the rise again and create nervousness Governments are being called upon to protect the poor against high food prices But we know too little about the actual relationship between food prices and poverty This book provides us with new insights into this critical link and goes far beyond the simplistic views that have prevailed so far Policy makers concerned about food prices

and poverty should study it carefully Stefan Tangermann Professor Emeritus Department of Agricultural Economics and Rural Development University of Gottingen former OECD Director for Trade and Agriculture The spike in international food prices in 2008 was a reminder to the world of how vital food prices are for those billion or more people near or below the extreme poverty line Most of those poor people live in rural areas but many are net buyers rather than net sellers of food Even so they may benefit indirectly through higher wages when the farm price of food rises The only way to identify which groups are at risk is through careful empirical studies at the household level for each country This volume brings together a rich collection of such studies By covering rural areas of Africa Asia and Latin America it offers a range of insights for policy makers who too often focus only on the more visible urban poor Kym Anderson George Gollin Professor of Economics University of Adelaide

Good Practices in Health Financing Pablo Enríquez Gottret, George Schieber, Hugh Waters, 2008-01-01 This volume focuses on nine countries that have completed or are well along in the process of carrying out major health financing reforms These countries have significantly expanded their people's health care coverage or maintained such coverage after prolonged political or economic shocks e.g. following the collapse of the Soviet Union In doing so this report seeks to expand the evidence base on good performance in health financing reforms in low and middle income countries The countries chosen for the study were Chile Colombia Costa Rica Estonia the Kyrgyz Republic Sri Lanka Thailand Tunisia and Vietnam

Determining key research areas for healthier diets and sustainable food systems in Viet Nam Jessica E. Raneri, Gina Kennedy, Trang Nguyen, Sigrid Wertheim-Heck, Ha Do, Stef de

Haan,Nguyen Phuong,2019-10-10 Vietnamese food systems are undergoing rapid transformation with important implications for human and environmental health and economic development Poverty has decreased and diet quality and undernutrition have improved significantly since the end of the Doi Moi reform period 1986 1993 as a result of Viet Nam opening its economy and increasing its regional and global trade Yet poor diet quality is still contributing the triple burden of malnutrition with 25 percent stunting among children under age 5 26 percent and 29 percent of women and children respectively anemic and 21 percent of adults overweight Agricultural production systems have shifted from predominantly diverse smallholder systems to larger more commercialized and specialized systems especially for crops while the meatification of the Vietnamese diet is generating serious trade offs between improved nutrition and sustainability of the Vietnamese food systems The food processing industry has developed rapidly together with food imports resulting in new and processed food products penetrating the food retail outlets trending towards an increase in the Westernized consumption patterns that are shifting nutrition related problems towards overweight and obesity and with it an increase of non communicable disease related health risks While regulatory policies exist across the food system these are not systematically implemented making food safety a major concern for consumers and policy makers alike Where data exists it is not easy to aggregate with data from across food system dimensions making it difficult for Viet Nam to make an informed analysis of current and potential food system trade offs In our research we reviewed existing literature and data and applied a food systems framework to develop an initial food systems profile for Viet Nam and to identify a comprehensive set of research questions to fill current data gaps identified through the review Insights on these would provide the comprehensive evidence needed to inform policy makers on how to develop new food systems policies for Viet Nam and further refine and improve existing policies to achieve better quality diets and more sustainable food systems in Viet Nam Based on these we then engaged with stakeholders to develop research priorities in the Viet Nam context and identified 25 priority research questions This paper aims to stimulate such reflections by clearly outlining key areas for research government policy and development programs on priority investment to build the evidence base around inclusive food systems interventions that aim to result in healthier diets and more sustainable food systems for Viet Nam

Childhood and Schooling in

(Post)Socialist Societies Iveta Silova,Nelli Piattoeva,Zsuzsa Millei,2017-12-07 This book explores childhood and schooling in late socialist societies by bringing into dialogue public narratives and personal memories that move beyond imaginaries of Cold War divisions between the East and West Written by cultural insiders who were brought up and educated on the eastern side of the Iron Curtain spanning from Central Europe to mainland Asia the book offers insights into the diverse spaces of socialist childhoods interweaving with broader political economic and social life These evocative memories explore the experiences of children in navigating state expectations to embody model socialist citizens and their mixed feelings of attachment optimism dullness and alienation associated with participation in building socialist futures Drawing on the

research traditions of autobiography autoethnography and collective biography the authors challenge what is often considered normal and natural in the historical accounts of socialist childhoods and engage in re writing histories that open space for new knowledges and vast webs of interconnections to emerge This book will be compelling reading for students and researchers working in education sociology and history particularly those within the interdisciplinary fields of childhood and area studies The authors of this beautiful book are professional academics and intellectuals who grew up in different socialist countries Exploring socialist childhoods in myriad ways they draw on memories and collective history emotional insider knowledge and the measured perspective of an analyst What emerges is life that was caught between real optimism and dullness ethical commitments and ideological absurdities selfless devotion to children and their treatment as a political resource Such attention to detail and examination of the paradoxical nature of this time makes this collective effort not only timely but remarkably genuine Alexei Yurchak University of California USA Agricultural Development in the World Periphery Vicente Pinilla, Henry Willebald, 2018-02-06 This book brings together analysis on the conditions of agricultural sectors in countries and regions of the world s peripheries from a wide variety of international contributors The contributors to this volume proffer an understanding of the processes of agricultural transformations and their interaction with the overall economies of Africa Asia and Latin America Looking at the nineteenth and twentieth centuries the onset of modern economic growth the book studies the relationship between agriculture and other economic sectors exploring the use of resources land labour capital and the influence of institutional and technological factors in the long run performance of agricultural activities Pinilla and Willebald challenge the notion that agriculture played a negligible role in promoting economic development in the nineteenth and twentieth centuries when the impulse towards industrialization in the developing world was more impactful *Does Rising Landlessness Signal Success Or Failure for Vietnam's Agrarian Transition?* Martin Ravallion, Dominique Van de Walle, 2006 In the wake of reforms to establish a free market in land use rights Vietnam is experiencing a pronounced rise in rural landlessness To some observers this is a harmless by product of a more efficient economy while to others it signals the return of the pre socialist class structure with the rural landless at the bottom of the economic ladder The authors theoretical model suggests that removing restrictions on land markets will increase landlessness among the poor but that there will be both gainers and losers with uncertain impacts on aggregate poverty Empirically they find that landlessness is less likely for the poor and that the observed rise in landlessness is poverty reducing on balance However there are marked regional differences notably between the north and the south World Bank web site **Rapid Growth of Selected Asian Economies** Food and Agriculture Organization of the United Nations, 2006-01-01 This publication is part of a three volume diagnostic study on lessons learned and implications for agriculture and food security in the context of rapid growth in selected Asian economies This third volume presents the country studies for the Republic of Korea Thailand and Viet Nam It discusses experiences in agricultural development and

economic growth The country studies provide useful lessons and insights on agricultural restructuring in response to changing market and trade opportunities These are expected to be of interest to relevant governments policy professionals and development practitioners in crafting national policies and strategies for rapid and sustained agricultural growth to achieve the Millennium Development Goals of poverty and hunger eradication
