## **Economic Transformation In Eastern Europe And East Asia A Challenge For Japan And Germany:**

**Economic Transformation in Eastern Europe and East Asia** Herbert Hax, Wolfgang Klenner, Willi Kraus, Tomoo Matsuda, Takafusa Nakamura, 2012-12-06 The economic transformation taking place in Eastern Europe and Asia is in particular a challenge for Japan and Germany because these two states as the immediate neighbors of the developing regions are directly affected and also because they are the strongest economic powers in their regions and have the necessary potential to influence developments there Japan and Germany are affected in many ways both positively and negatively Should the economic and social transformation run into difficulties leading to economic and political chaos perhaps even to armed conflicts then economy and social fabric of the prosperous neighbors would doubtlessly suffer In the past Japan and the South East Asian region have already experienced how economic problems in China caused millions of Chinese to seek their fortunes in other countries An economic and political destabilization of China would today probably have even greater effects on migration flows Similar effects can be expected in Europe if the transformation process in Eastern Europe should fail But even less dramatic developments in Eastern Europe and East Asia can have deleterious consequences for Germany and Japan Both nations are linked closely to the transforming economies near them though at a fairly low level A reduction in trade with them a refusal to service debts and other economic frictions ensuing out of economic and political troubles would of necessity hamper the prosperity of Japan and Germany A successful transformation process would without doubt benefit all economic partners to a considerable extent

**Economic Transformation in Eastern Europe and East Asia** Herbert Hax, Wolfgang Klenner, Willi Kraus, 1995-11-01 The changes taking place in Eastern Europe and Asia are a particular challenge for Japan and Germany As the immediate neighbours they are both affected by the economic and social transformations in these regions Yet since they are strong economic powers they have the potential necessary to influence developments such that Eastern Europe and Asia advance to reciprocal advantage This volume looks into a wide range of possible supportive measures as far as capital labour and regulatory systems are concerned with reference to the specific economic and historic features of Japan and Germany taking into account the current weakness of the American dollar and the costs of reunification

**Japan's Economic Involvement in Eastern Europe and Eurasia** Raymond Hutchings, 1999-03-22 The book describes Japanese economic activities in all the countries of Eastern Europe and the former Soviet Union FSU predominantly since the break up of the Soviet Union Japanese investment aid trade advice or other contacts also reciprocal actions are related in substantial detail Analogous activities are also outlined for the immediately preceding periods The earlier history of the Russian Japanese relationship is outlined The economic and investment environment is set in the necessary political cultural and historic contexts

**Asia's Flying Geese** Walter F. Hatch, 2011-03-15 In Asia's Flying Geese Walter F Hatch tackles the puzzle of Japan's paradoxically slow change during the economic crisis it faced in the 1990s Why didn't the purportedly unstoppable pressures of globalization force a rapid and

radical shift in Japan's business model. In a book with lessons for the larger debate about globalization and its impact on national economies, Hatch shows how Japanese political and economic elites delayed but could not in the end forestall the transformation of their distinctive brand of capitalism by trying to extend it to the rest of Asia. For most of the 1990s the region grew rapidly as an increasingly integrated but hierarchical group of economies. Japanese diplomats and economists came to call them flying geese. The lead goose or most developed economy, Japan, supplied the capital, technology, and even developmental norms to second-tier geese such as Singapore and South Korea, which themselves traded with Thailand, Malaysia, and the Philippines, and so on down the V-shaped line to Indonesia and coastal China. Japan's model of capitalism, which Hatch calls relationalism, was thus fortified even as it became increasingly outdated. Japanese elites enjoyed enormous benefits from their leadership in the region as long as the flock found ready markets for their products in the West. The decade following the collapse of Japan's real estate and stock markets would, however, see two developments that ultimately eroded the country's economic dominance. The Asian economic crisis in the late 1990s destabilized many of the surrounding economies upon which Japan had in some measure depended, and the People's Republic of China gained new prominence on the global scene as an economic dynamo. These changes, Hatch concludes, have forced real transformation in Japan's

corporate governance, its domestic politics, and in its ongoing relations with its neighbors. Transformations in Hungary Peter Meusburger, Heike Jöns, 2012-12-06. During the first decade after the turn towards democracy and market economy, Hungary's society experienced profound changes. The book analyses related political, legal, institutional, and socio-economic structures and processes in order to contribute to a further understanding of Hungary's ongoing transformation processes and its current situation as one of the leading candidates for EU membership. The topics include constitutive elements of a modern market economy as well as education, income structures, the poverty situation, post-communist voting behaviour, regional and urban development, and Hungary's cross-border co-operations. The role of Budapest within the European city system and Hungary's economic situation within Europe are also discussed. Drawing together comprehensive empirical data and a great variety of viewpoints, the book offers innovative examples of the application of different theoretical approaches to transformation studies and studies of economy and society in general. Monthly Bibliography United Nations Library (Geneva, Switzerland), 1997. *International Economic Growth* Michael Carlberg, 2012-12-06. This book deals with

international growth, featuring the dynamics of foreign debt and domestic capital. It proves useful to consider the Solow model, the overlapping generations model, and the infinite horizon model. Phase diagrams serve to trace out the processes of adjustment induced by various shocks. Take, for instance, an increase in the saving rate, a rise in the rate of labour growth, or a one-time technical progress. What will be the effects on the balance of payments, the foreign position, the stock of capital, and consumption? The first chapter is concerned with the small open economy, chapter II is on large countries. In chapter III, capital mobility is restricted; in chapter IV, labour mobility is introduced; in chapter V, wages are fixed; and in chapter VI,

growth becomes endogenous      **Innovation and Technological Change in Eastern Europe** Michael Fritsch, Horst Brezinski, Horst Dieter Brezinski, 1999-11-25 Research suggests that innovation and technical change are crucial for the economic recovery of the former centrally planned countries in Central and Eastern Europe This text analyzes the development of innovation systems and technology in this region from various perspectives      Journal of Economic Literature ,1996      Challenges and Opportunities of Corporate Governance Transformation in the Digital Era Kuznetsov, Mikhail Yevgenievich, Nikishova, Maria Igorevna, 2019-12-27 While corporate governance has been a successful concept throughout the centuries it is in question whether this concept can remain sustainable in the digital era and during a time of technological and managerial disruption Under the pressure of new economic social and ecologic challenges it is vital to understand how this concept needs to transform Challenges and Opportunities of Corporate Governance Transformation in the Digital Era is an essential reference source that discusses concepts trends and forecasts of corporate governance and examines its transformation under the pressure of new technologies and economic changes Featuring research on topics such as corporate identity e commerce and cost management this book is ideally designed for corporate leaders managers executives business professionals consultants professors researchers and students      *The Economy and Economics After Crisis* Jüri Sepp, Dean Frear, 2011-01-01      *JOURNAL OF ECONOMICS LITERATURE* ,1996      **Central and Eastern Europe in Transition** Frank H. Columbus, 1998 Central and Eastern Europe present more than a trivial challenge to the Developed Nations of the world as well as to themselves Will they represent new markets new sources of low cost labour or populations taking every action and avenue conceivable to emigrate to the Developed Nations Will they be integrated into the Western economies and political structures or lose themselves into defensive postures and pose threats to the Developed Nations This new series is intended to present current analyses of political and economic developments and trends in this crucial part of the world      *A Bibliography on Foreign and Comparative Law* ,1955      A Comparative Analysis of Japanese and German Economic Success IFO Institute for Economic Research, Sakura Institute of Research, Japan, 2012-12-06 The aim of this book is to evaluate accurately economic development mechanism and to extract valuable lessons from a comparison of the economic development of Japan and that of Germany The book covers an extensive range of economic issues 1 macro economic factors capital labor technology 2 macro economic policies financial monetary industrial 3 external shocks to both economies oil crises exchange rate fluctuations environmental problems 4 development processes of major industries steel chemicals and automobiles The analyses with this systematic and comprehensive approach provide useful insights for the general reader as well as guidelines for developing countries and for Eastern European countries in transition
