Voicu, Somnath Sen, Inmaculada Martinez-Zarzoso, 2018-05-30 This book examines the evolution of trade and trade patterns in Central and Eastern European countries CEEC and assesses the implications of these patterns on structural change and

economic development within transition economies Taking the fall of the Iron Curtain in 1989 as a starting point the authors discuss the transition of former communist CEE countries from centrally planned to market driven economies arguing that trade was the primary engine for the economic growth and transition process they experienced The chapters in this book incorporate the results of previous studies some of which are based on original research conducted by the authors dedicated to the integration process of international and European trade More importantly the authors look at the broader aspects of structural change and economic development indeed the whole process of economic transformation Thus the book moves well beyond the core trade and growth framework to look at technological progress foreign investment institutional development and structural change in Central and Eastern European countries Cycles, Growth and Structural Change Lionello F Punzo,2003-09-02 This volume gathers together key new contributions on the subject of the relationship both empirical and theoretical between economic oscillations growth and structural change Employing a sophisticated level of mathematical modelling the collection contains articles from amongst others William Baumol Katsuhito Iwai and William Brock **Structural change, fundamentals, and growth: a framework and case studies** McMillan, Margaret ,Rodrik, Dani,Sepúlveda, Claudia,2017-05-11 *Consumption and Growth* Davide Gualerzi,2001 The theme of this extensive book is the relationship between consumption and growth in the context of the long run theory of effective demand Taking Schumpeter s views on economic development as a starting point the author proposes an original framework for the analysis of consumption patterns as an element of growth in advanced market economies The book examines the role of demand with respect to the theory of structural change and the theory of consumption at both the micro and macro level The theoretical framework is employed to analyze the consumption growth relationship and its implications for the process of structural evolution The actual dynamics of consumption are examined in terms of the cycle of expansion in the US economy during the 1980s The author concludes that there is a distinct shift towards a pattern of consumption deepening that explains the consumption fuelled recovery of the 1980s and mirrors a process of intensive growth of the market This interpretation sheds light on the underlying process sustaining US expansion during the 1990s and the questions facing advanced market economies which have begun to experience the emergence of an internet scenario in terms of development In focusing on the relationship between consumption changes and the growth process this book distinguishes itself from much of the literature on the subject which deals with these two aspects individually Davide Gualerzi breaks genuinely new ground with his empirical and theoretical research This book will appeal to economists interested in growth and economic development scholars in related social sciences and the wide base of economists and academics sympathetic to new approaches to the problem of economic growth Economic Development and Structural Change : Papers Presented at an International Seminar...
