**An Economic and Social History of Later Medieval Europe, 1000-1500** Steven A. Epstein, 2009-04-27 This book examines the most important themes in European social and economic history from the beginning of growth around the year 1000 to the first wave of global exchange in the 1490s These five hundred years witnessed the rise of economic systems such as capitalism and the social theories that would have a profound influence on the rest of the world over the next five centuries The basic story the human search for food clothing and shelter in a world of violence and scarcity is a familiar one and the work and daily routines of ordinary women and men are the focus of this volume Surveying the full extent of Europe from east to west and north to south Steven Epstein illuminates family life economic and social thought war technologies and other major themes while giving equal attention to developments in trade crafts and agriculture The great waves of famine and then plague in the fourteenth century provide the centerpiece of a book that seeks to explain the causes of Europe's uneven prosperity and its

response to catastrophic levels of death Epstein also sets social and economic developments within the context of the Christian culture and values that were common across Europe and that were in constant tension with Muslims Jews and dissidents within its boundaries and the great Islamic and Tartar states on its frontier

**A History of European Economic Thought** Antonio Magliulo, 2022-05-11 A History of European Economic Thought grafts the history of economic thought onto Global History by showing how significant economic ideas have influenced the process of Europe's formation from the very beginning to the present day This work combines two classical stories that until today have followed parallel paths On the one hand there is the political history of Europe which is often limited to a few fleeting references to the ideas of the great economists of the past On the other hand there is the history of economic thought which examines Europe as a whole as a distinct supranational community only with reference to the institutions created after World War II The volume sheds light on the constitutive values of Europe which also stem from a particular economic culture and provides essential reading for students and scholars of the history of economic thought

**Black Marxism** Cedric J. Robinson, 2005-10-12 In this ambitious work first published in 1983 Cedric Robinson demonstrates that efforts to understand black people's history of resistance solely through the prism of Marxist theory are incomplete and inaccurate Marxist analyses tend to presuppose European models of history and experience that downplay the significance of black people and black communities as agents of change and resistance Black radicalism must be linked to the traditions of Africa and the unique experiences of blacks on western continents Robinson argues and any analyses of African American history need to acknowledge this To illustrate his argument Robinson traces the emergence of Marxist ideology in Europe the resistance by blacks in historically oppressive environments and the influence of both of these traditions on such important twentieth century black radical thinkers as W E B Du Bois C L R James and Richard Wright

**Liberty, Science and Wealth** Ralph L. Bayrer, 2021-11-29 Ralph Bayrer's new book Free People Free Markets Their Evolutionary Origins is a timely reaffirmation of freedom's central role in the creation of American prosperity and the most celebrated advances of western civilization Relying on the thorough scholarship and clarity of argument Bayrer makes the compelling case that mankind's progress in the last millennium rests on a narrow foundation of freedom a lesson people forget at their peril This book is a compelling new perspective on economic and political history which can be expected to make a contribution to both academic and popular understanding But its most important contribution will be in helping guide current governmental decisions away from avoidable errors

**Black Marxism, Revised and Updated Third Edition** Cedric J. Robinson, 2020-12-16 In this ambitious work first published in 1983 Cedric Robinson demonstrates that efforts to understand Black people's history of resistance solely through the prism of Marxist theory are incomplete and inaccurate Marxist analyses tend to presuppose European models of history and experience that downplay the significance of Black people and Black communities as agents of change and resistance Black radicalism Robinson argues must be linked to

the traditions of Africa and the unique experiences of Blacks on Western continents and any analyses of African American history need to acknowledge this To illustrate his argument Robinson traces the emergence of Marxist ideology in Europe the resistance by Blacks in historically oppressive environments and the influence of both of these traditions on such important twentieth century Black radical thinkers as W E B Du Bois C L R James and Richard Wright This revised and updated third edition includes a new preface by Tiffany Willoughby Herard and a new foreword by Robin D G Kelley *Early Modern Europe, 1450-1789* Merry E. Wiesner-Hanks, 2022-08-25 Thoroughly updated edition of a best selling acclaimed book placing early modern European history in a global and environmental context **English Society in the Later Middle Ages** S.H. Rigby, 1995-05-10 What was the social structure of England in the period 1200 to 1500 What were the basic forms of social inequality To what extent did such divisions generate social conflict How significantly did English society change during this period and what were the causes of social change Is it useful to see medieval social structure in terms of the theories and concepts produced within the medieval period itself What does modern social theory have to offer the historian seeking to understand English society in the later middle ages These are the questions which this book seeks to answer Beginning with an analysis of class structure of medieval England Part One of this book asks to what extent class conflict was inherent within class relations and discusses the contrasting successes and outcomes of such conflict in town and country Part Two of the book examines to what extent such class divisions interacted with other forms of social inequality such as those between orders nobility and clergy between men and women and those arising from membership of a status group the Jews Dr Rigby's discussion of medieval English society is located within the context of recent historical and sociological debates about the nature of social stratification and using the work of social theorists such as Parkin and Runciman offers a synthesis of the Marxist and Weberian approaches to social structure The book should be extremely useful to those undergraduates beginning their studies of medieval England whilst in offering a new interpretative framework within which to examine social structure also interesting those historians who are more familiar with this period Bulletin Syracuse University, 1929

**Markets and Growth in Early Modern Europe** Victoria N Bateman, 2015-10-06 This is the first study to analyze a wide spread of price data to determine whether market development led to economic growth in the early modern period *The World the Plague Made* James Belich, 2024-06-25 A groundbreaking history of how the Black Death unleashed revolutionary change across the medieval world and ushered in the modern age In 1346 a catastrophic plague beset Europe and its neighbours The Black Death was a human tragedy that abruptly halved entire populations and caused untold suffering but it also brought about a cultural and economic renewal on a scale never before witnessed The World the Plague Made is a panoramic history of how the bubonic plague revolutionized labour trade and technology and set the stage for Europe's global expansion James Belich takes readers across centuries and continents to shed new light on one of history's greatest paradoxes Why did Europe's dramatic rise begin in the wake of the Black Death Belich shows how plague doubled the per

capita endowment of everything even as it decimated the population Many more people had disposable incomes Demand grew for silks sugar spices furs gold and slaves Europe expanded to satisfy that demand and plague provided the means Labour scarcity drove more use of waterpower wind power and gunpowder Technologies like water powered blast furnaces heavily gunned galleons and musketry were fast tracked by plague A new crew culture of disposable males emerged to man the guns and galleons Setting the rise of Western Europe in global context Belich demonstrates how the mighty empires of the Middle East and Russia also flourished after the plague and how European expansion was deeply entangled with the Chinese and other peoples throughout the world *The Social History of the Western World, an Outline Syllabus* Harry Elmer Barnes,1921 **Free People, Free Markets** Ralph L. Bayrer,2010 Relying on thorough scholarship and clarity of argument Bayrer makes the compelling case that mankind s progress in the last millennium rests on a narrow foundation of freedom a lesson people forget at their peril John McCain U S senator *General Catalog* University of Missouri,1912
