### **Combating Economic Crimes** Ndiva

Kofele-Kale,2013-03-01 In the last decade a new tool has been developed in the global war against official corruption through the introduction of the offense of illicit enrichment in almost every multilateral anti corruption convention Illicit enrichment is defined in these conventions to include a reverse burden clause which triggers an automatic presumption that any public official found in possession of inexplicable wealth must have acquired it illicitly However the reversal of the burden of proof clauses raises an important human rights issue because they conflict with the accused individual s right to be presumed innocent Unfortunately the recent spate of international legislation against official corruption provides no clear guidelines on how to proceed in balancing the right of the accused to be presumed innocent against the competing right of society to trace and recapture illicitly acquired national wealth Combating Economic Crimes therefore sets out to address what has been left unanswered by these multilateral conventions to wit the level of burden of proof that should be placed on a public official who is accused of illicitly enriching himself from the resources of the State balanced against the protection of legitimate community interests and expectations for a corruption free society The book explores the doctrinal foundations of the right to a presumption of innocence and reviews the basic due process protections afforded to all accused persons in criminal trials by treaty customary international law and municipal law The book then goes on to propose a framework for balancing and situationalizing competing human rights and public interests in situations involving possible official corruption

Strategic Litigation and Corporate Complicity in Crimes Under International Law Kalika Mehta,2023-10-09 This book provides a comprehensive account of how non state actors rely on international criminal law as a tool in the service of progressive political causes The argument that international criminal law and its institutions serve as an instrument in the hands of a few powerful states and that its practice is characterized by double standards and selectivity has received considerable attention This book however focuses on a practice that is informed by this argument Its focus is on an alternative practice within international criminal law where non state actors navigate what critical scholars call a structurally biased legal system in order to achieve long term political objectives Innovatively the book combines the concerns expressed by Third World Approaches to International Law with strategic litigation that focuses on the accountability of corporations for their complicity in crimes under international law Analysing this litigation the book demonstrates that while it is crucial to highlight the blind spots of the international criminal legal framework it is also important to take into account the practice of non state actors engaged in leveraging its emancipatory potential This original analysis of the implementation and legitimacy of international criminal law will be of interest to a wide range of scholars and
