Economic Ethics Sean Doherty,2014-03 In the wake of the economic crisis few questions are more pressing than those around the ethics of finance and economics Theology and Economic Ethics expands the self critical resources of contemporary theological economic ethics by bringing the method of a pre modern thinker Martin Luther 1483 1546 into interaction with that of a modern contribution to social ethics the Swiss theologian Arthur Rich 1910 92 The work is undertaken through a close engagement with a selected publication of Luther his 1519 20 Grosser Sermon von dem Wucher and of Rich his masterwork Wirtschaftsethik published in two volumes in 1984 and 1990 respectively It is the first substantial treatment in English of Rich s magnum opus Sean Doherty introduces Luther s sermon on usury situates it in its context then provides a commentary on this work discussing how Luther brings key theological motifs to bear on a particular economic question The study proceeds with a sketch of Arthur Rich s life and work and presents Rich s method as set out in Wirtschaftsethik Doherty illuminates Rich s understanding of ethics his approach to Scripture and his adoption of the thought of Max Weber and John Rawls Bringing insights from the study of Luther to bear in an analysis of Rich s method Doherty questions some of Rich s assumptions and notes ways in which a more self critical approach could have made his project more successful Finally the book makes tentative suggestions as to the wider applicability of these findings for a Christian approach to economic ethics **Religion and Critical Psychology** Jeremy Carrette,2007-10-31 Carrette discusses the relevance of the social and economic factors surrounding the debates of psychology and religion and provides a new

dimension to the debates surrounding religious experience

The Sacred Economy of Ancient Israel Roland

Boer, 2015-04-20 The Sacred Economy of Ancient Israel offers a new reconstruction of the economic context of the Bible and of ancient Israel. It argues that the key to ancient economies is with those who worked on the land rather than in intermittent and relatively weak kingdoms and empires. Drawing on sophisticated economic theory especially the Regulation School and textual and archaeological resources, Roland Boer makes it clear that economic crisis was the norm and that economics is always socially determined. He examines three economic layers: the building blocks, five institutional forms, periods of relative stability, three regimes, and the overarching mode of production. Ultimately, the most resilient of all the regimes was subsistence survival, for which the regular collapse of kingdoms and empires was a blessing rather than a curse. Students will come away with a clear understanding of the dynamics of the economy of ancient Israel. Boer's volume should become a new benchmark for future studies.

Politics, Religion and Classical Political Economy in Britain J. Lipkes, 1998-12-09

The book examines tensions in classical political economy by describing and analysing changes in J. S. Mill's economic and religious thought late in life and assesses the influence of Mill's disciplines on these shifts. Mill's followers surprisingly were divided into two opposing camps. Influenced by the heterodox group, opponents of Ricardian political economy and by pressing political concerns, Mill modified his principles in ways he would not earlier have countenanced. This resulted in inconsistencies and evasions in his final essays, which greatly upset the orthodox contingent.

Market, Ethics and

Religion Niels Kærgård, 2023-01-18 This book deals with the basic question of what money can and cannot buy and offers an analysis of the limitations of the market mechanism. Few concepts are as controversial as religion and the market mechanism. Some consider religion to be in conflict with a modern rational scientific view of life and thus as a contributory cause of harsh conflicts and a barrier to human happiness. Others consider religious beliefs as the foundation for ethics and decent behaviour. Similar to a number of neoliberal writers, Kærgård acclaimed the market mechanism as one of the greatest triumphs of the human mind and saw it as the main reason why rich countries became rich. Others are extremely skeptical and stress how this mechanism has resulted in big multinational firms with powerfully rich owners and masses of poor, low-paid workers. Researchers from various fields—economists, social scientists, theologians, and philosophers—handle these questions very differently, applying different methods and different ideals. This book offers a synthesis of the different viewpoints. It deals with economists, theologians, and philosophers differing thoughts about the market and its limitations.

God Very Probably Robert H Nelson, 2016-04-28 In recent years a number of works have appeared with important implications for the age old question of the existence of a god These writings many of which are not by theologians strengthen the rational case for the existence of a god even as this god may not be exactly the Christian God of history This book brings together for the first time such recent diverse contributions from fields such as physics the philosophy of human

consciousness evolutionary biology mathematics the history of religion and theology Based on such new materials as well as older ones from the twentieth century it develops five rational arguments that point strongly to the very probable existence of a god They do not make use of the scientific method which is inapplicable to the question of a god Rather they are in an older tradition of rational argument dating back at least to the ancient Greeks For those who are already believers the book will offer additional rational reasons that may strengthen their belief Those who do not believe in the existence of a god at present will encounter new rational arguments that may cause them to reconsider their opinion

Political Economy and Christian Theology Since the Enlightenment A. Waterman, 2004-11-30 Political economy and Christian theology coexisted happily in the intellectual world of the eighteenth century During the nineteenth century they came to be seen as incompatible even mutually hostile In the twentieth century they went their separate ways and are no longer on speaking terms These fourteen essays by Anthony Waterman serve as snapshots of the history of this estrangement and illustrate the gradual replacement of the discourse of theology by that of economics as the rational framework of political debate Others have recently shown that both political economy and Christian theology are important though somewhat neglected elements in modern intellectual history This book is the first to combine these two lines of inquiry

Pluralist Economics Edward Fullbrook,2013-07-18 This book is an authoritative and accessible guide to the pluralist movement threatening to revolutionise mainstream economics Leading figures in the field explain why pluralism is a required virtue in economics how it came to be blocked and what it means for the way we think about research and teach economics The first part of the book looks at how neoclassical economics gained its stranglehold particularly in the United States and how the social and intellectual underpinnings of economics have enabled it to maintain this in the face of inconsistent evidence from the real world This is then contrasted with different approaches to pluralism Pluralist Economics then goes on to address the array of arguments for establishing pluralism showing how economics came to function as a concealed ideology and not as a science and how value free economics is an illusion Finally it addresses the practical problems presented by this different way of doing economics

Economics and Religion Paul Oslington,2003 Paul Oslington has done a simply marvellous job in pulling together the various bits of writing on the relation between economics and religion the collection might surprise quite a few who might have expected this area to be a trifle thin In fact the range and quality of these pieces should impress and delight everyone including all such sceptics Ranging across the history of thought economic theology ethics methodology and the application of economics to the study of religious behaviour these are indeed rich pickings It is a fascinating collection taken from a surprisingly rich vein Well done Paul Oslington and well done Edward Elgar Geoffrey Brennan Australian National University Australia
