Political Economy of Power Sharing in Developing Countries Akiyewopiribie Opuene Hart,2025-08-07 Political Economy of Power Sharing in Developing Countries is an in depth examination of factors that trigger the clamor for power sharing zoning and rotation in mostly developing countries These provocations include geographical ethnic and religious identity factors that can influence the political process in varying degrees from country to country The impact goes a long way in determining the stability and instability of the political process in various countries The reasons for these differences and the impacts are a combination of the endogenous variables in the first instance which are the primary prompters Other elements which are the exogenous factors are secondary prompters When these converge they produce a peculiar impact in a given society based on the characteristic variables and the resulting outcome The new paradigm shifts in the agitation in developing countries is demonstrated by an elitist instrument of marginalization and self aggrandizement The masses are hoodwinked sensitized and manipulated through primal sentiment to support the elites in acquiring political power which in turn enables the acquisition of economic power **Encyclopedia of Political Economy** Phillip O'Hara,1999-02-04 Content Description Includes bibliographical references and index **Social Stratification and Economic Change** David Rose,2022-03-29 First published in 1988 Social Stratification and Economic Change brings together for the first time in textbook form some of the most significant work both theoretical and empirical on stratification in Britain In part I David Rose provides an overview of stratification research and papers from David Lockwood John Goldthorpe Gordon Marshall Ray Pahl and Claire Wallace tackle key theoretical issues In part II six papers commissioned for the book report on empirical studies and their implications By bringing together an outstanding group of authors all at the forefront of their field the book makes an important contribution to debates on social stratification and will be invaluable for both students and researchers in sociology *Ethnic Stratification and Economic Inequality around the World* Max Haller in collaboration,Anja Eder,2016-03-03 The modern world is characterised by pervasive economic inequalities Strong economic growth in some developing countries has contributed to a degree to a reduction in the levels of inequality between nations yet inequality within nations remains high and in some cases continues to increase Ethnic Stratification and Economic Inequality around the World investigates the reasons for these striking differences exploring the coincidence and interaction between economic stratification and ethnic differentiation Drawing on extensive international survey and statistical data the author develops a new theory and concrete hypotheses concerning the conditions which lead toward extreme inequality and those which tend toward greater equality A systematic examination of the interaction between class structures social stratification and ethnic differentiation this book sheds light on the manner in which the resulting social structures produce different levels of

economic inequality offering a fivefold typology of patterns of ethnic stratification which can be applied to present day world regions Drawing on the work of Max Weber to provide a rigorous investigation of inequality around the world it demonstrates what sociology as a science of social reality can significantly contribute to our understanding of global economic stratification The book is relevant for a wide social scientific audience particularly for sociologists economists and political scientists working in a comparative perspective Encyclopedia of Identity Ronald L. Jackson, Michael A. Hogg, 2010-06-29

Alphabetically arranged entries offer a comprehensive overview of the definitions politics manifestations concepts and ideas related to identity **The Sociology of Food and Agriculture** Michael Carolan, 2012-03-15 As interest has increased in topics such as the globalization of the agrifood system food security and food safety the subjects of food and agriculture are making their way into a growing number of courses in disciplines within the social sciences and the humanities like sociology and food studies This book is an introductory textbook aimed at undergraduate students and is suitable for those with little or no background in sociology The author starts by looking at the recent development of agriculture under capitalism and neo liberal regimes and the transformation of farming from a small scale family run business to a globalized system The consequent changes in rural employment and role of multinationals in controlling markets are described Topics such as the global hunger and obesity challenges GM foods and international trade and subsidies are assessed as part of the world food economy The second section of the book focuses on community impacts food and culture and diversity Later chapters examine topics such as food security alternative and social movements food sovereignty local versus global and fair trade All chapters include learning objectives and recommendations for further reading to aid student learning **Transition and Development in India** Anjan Chakrabarti, Stephen Cullenberg, 2013-12-16 According to Nehru the transition from a backward agricultural society to a modern industrialized society was the only road for India to progress So for the past few decades India has focused its transitional development around movement away from a state controlled economy toward that of a free market economy Transition and Development in India challenges the current basis of this theory of development laying the groundwork for an entirely new Marxist approach to transition that should apply not just to India but to all developing nations **Mapping the Social Landscape** Susan J. Ferguson, 2020-08-27 Mapping The Social Landscape is one of the most established and widely used readers for Introductory Sociology Susan J Ferguson selects edits and introduces 58 readings representing a plurality of voices and views within sociology The selections include classic statements from great thinkers like C Wright Mills Karl Marx and Max Weber as well of the works of contemporary scholars who address current social issues *Community Organization and Social Action* Mr. Rohit Manglik, 2023-09-23 In this book we will study about how communities can be mobilized and empowered through collective action Topics include principles of community organization leadership advocacy and planning for sustainable development **Democracy and the Politics of the Extraordinary** Andreas Kalyvas, 2008-06-30 Although the modern age is often described as the age of democratic revolutions

the subject of popular founding has not captured the imagination of contemporary political thought Most of the time democratic theory and political science treat as the object of their inquiry normal politics institutionalized power and consolidated democracies This study shows why it is important for democratic theory to rethink the question of democracy s beginnings Is there a founding unique to democracies Can a democracy be democratically established What are the implications of expanding democratic politics in light of the question of whether and how to address democracy s beginnings Kalyvas addresses these questions and scrutinizes the possibility of democratic beginnings in terms of the category of the extraordinary as he reconstructs it from the writings of Max Weber Carl Schmitt and Hannah Arendt and their views on the creation of new political symbolic and constitutional orders Childhood and Youth Studies Paula

Zwozdiak-Myers,2007-07-27 This book introduces the inter disciplinary study of childhood and youth and the multi agency practice of professionals who serve the needs of children young people and their families Exploring key theories and central ideas research methodology policy and practice it takes a holistic contextual approach that values difference and diversity It examines concepts such as identity representation creativity and discourse and issues such as ethnicity gender and the childhood in crisis thesis Furthermore it challenges opinion by exploring complex and controversial modern day issues and by engaging with a range of perspectives to highlight debates within the field *Ethnicity and Social Divisions* Elias le Grand,Karin Halldén,Zenia Hellgren,2009-03-26 The anthology *Ethnicity and Social Divisions Contemporary Research in Sociology* is a collection of studies presented at the annual Aage S rensen Memorial Conferences in 2006 and 2007 The volume reflects a number of important tendencies in contemporary social research the increasing interest in questions that concern ethnicity and immigration on the one hand the remaining centrality of social stratification and class analysis on the other hand and the intersection between these fields Eight young sociologists all PhD Candidates at the universities of Harvard Oxford or Stockholm at the time they wrote their contributions participate in this volume Representing a new generation of social scientists they have conducted empirical research on social inequality related to class and ethnicity from different perspectives **The Future of the State** Artemy Magun,2020-08-04

The state has been a dominant political form and the preferred model of political unity for at least the last two centuries However many today speak of its crisis which stems from two main factors the state s changing role in the globalizing international system and the state s complex relation to democracy a key normative concept of contemporary politics Authoritarian leaders use the state to successfully reaffirm sovereignty despite international integration democratic movements abound but often serve only to reinforce the regimes they contest Is there an alternative Do we need to reconceive the phenomenon of state with a view to the future These are the questions that an international group of scholars explores and answers in this groundbreaking book drawing on the history of political thought continental philosophy and contemporary political examples They engage the dialectical tradition broadly understood including phenomenological transcendentalism the political philosophy of French public law and German

twentieth century political philosophy beyond Weber The result brings the state into a critical political philosophy providing a realistic model of what a good democratic state could and should be like *Labour and Political Transformation in Russia and Ukraine* Rick Simon,2019-05-24 This title was first published in 2000 The years 1975 to 2000 are characterized by fundamental changes in the global political landscape Perhaps the biggest change was the collapse of certain communist regimes This text analyzes what that meant for the USSR and Europe It looks at the cause of change the social forces behind them and future prospects **Enriching the Sociological Imagination** ,2004-10-01 This book presents classical articles influencing the field that appeared in *The Insurgent Sociologist* along with current reflections by the original authors These selections reflect radical sociology s continuing interest in capitalist development class race gender and power The introduction contextualizes the role of *The Insurgent Sociologist* in the development of a radical sociology and its impact on the discipline The conclusion provides an agenda for how the next version of critical sociology should relate to and strengthen the heterogeneous world of civil society Never have so many prominent sociologists provided such a rare intellectual treat by being so frank about their own past work and then suggest how we can do better in the future to provide frameworks for a critical and relevant sociology *The History and Philosophy of Social Science* H. Scott Gordon,2002-09-11 Scott Gordon provides a magisterial review of the historical development of the social sciences from their beginnings in renaissance Italy to the present day **Language Ideology and Language Change in Early Modern German** Rosina L. Lippi-Green,1994-11-29 This quantitative study based on a computerized corpus of texts written by five men in early 16th century Nuremberg employs multivariate GLM statistical procedures to analyze the way linguistic social and stylistic factors work individually and in interaction to influence variation observed in the texts Over 70 000 tokens of variable consonants sets were analyzed using network analysis as an alternate approach to quantification of relevant social identities which allowed focus on individual behavior without discarding the analysis of group behaviors The study provides evidence that consonantal variation in early modern written texts is not random To a surprising degree it is possible to account for the structured heterogeneity in the writings studied by using methodologies established for spoken language in modern day communities Like spoken languages variation precedes change in the written language and again like spoken language not all variation is followed by change That is while variation cannot always be demonstrated to be structured much of it is clearly and reliably attributable to the same complex of linguistic social and stylistic factors which shape the structured heterogeneity of spoken languages of our own time Of particular importance is the quantification of an individual s relationship to an emerging ideology of language standardization and the way that relationship interacts with written language variation
