A Hotel Lobby at the Edge of the World Adam Clay, 2012-04-17 At the edge of the world you'll want to have this book The final lines of Adam Clay's poem *Scientific Method* have been haunting me for weeks Iowa Press Citizen The distilled haunting and subtly complex poems in Adam Clay's *A Hotel Lobby at the Edge of the World* often arrive at that moment when solitude slips into separation when a person suddenly realizes he can barely see the place he set out from however long ago He now sees he must find his connection back to the present socially entangled world in which he lives For Clay reverie can be a siren's song luring him to that space in which prisoners will begin to interrogate themselves Clay pays attention to the poet's return to the world of his daily life tracking the subtly shifting tenors of thought

that occur as the landscape around him changes Clay is fully aware of the difficulties of Thoreau's border life and his poems live somewhere between those of James Wright and John Ashbery They seek wholeness all the while acknowledging that a fragment is as complete as thought can be In the end what we encounter most in these poems is a generous gentleness an attention to the world so careful it's as if the mind is washing each grain of sand Poems that are in turn clear and strange and always warmly memorable Bob Hicok These poems engage fully the natural world even as they understand the individual's exclusion from it Publishers Weekly *Queer Kinship on the Edge? Families of Choice in Poland* Joanna

Mizielińska, 2022-05-18 *Queer Kinship on the Edge Families of Choice in Poland* explores ways in which queer families from Central and Eastern Europe complicate the mainstream picture of queer kinship and families researched in the Anglo American contexts The book presents findings from underrepresented localities as a starting point to query some of the expectations about queer kinship and to provide insights on the scale and nature of queer kinship in diverse geopolitical locations and the complexities of lived experiences of queer families Drawing on a rich qualitative multi method study to address the gap in queer kinship studies which tend to exclude Polish or wider Central and Eastern perspectives it offers a multi dimensional picture of families of choice improving sensitivity towards differences in queer kinship studies Through case studies and interviews with diverse members of queer families i.e. queer parents their children and their families of origin parents and siblings the book looks at queer domesticity practices of care defining and displaying families queer parenthood familial homophobia and interpersonal relationships through the life course This study is suitable for those interested in LGBT studies sexuality studies kinship and Eastern European studies *Adobe Edge Animate Preview 7: The Missing Manual* Chris Grover, 2012-09-17

Resistance at the Edge of Empires Cameron A.

Petrie,2020-12-28 From 1985 to 2001 the collaborative research initiative known as the Bannu Archaeological Project conducted archaeological explorations and excavations in the Bannu region in what was then the North West Frontier Province NWFP of Pakistan now Khyber Pakhtunkhwa This Project involves scholars from the Pakistan Heritage Society the British Museum the Institute of Archaeology UCL Bryn Mawr College and the University of Cambridge This is the third in a series of volumes that present the final reports of the exploration and excavations carried out by the Bannu Archaeological Project This volume presents the first synthesis of the archaeology of the historic periods in the Bannu region spanning the period when the first large scale empires expanded to the borders of South Asia up until the arrival of Islam in the subcontinent at the end of the first and beginning of the second millennium BC The Bannu region provides specific insight into early imperialism in South Asia as throughout this protracted period it was able to maintain a distinctive regional

identity in the face of recurring phases of imperial expansion and integration Experience on the Edge: Theorizing Liminality Brady Wagoner, Tania Zittoun, 2021-10-19 Liminality has become a key concept within the social sciences with a growing number of publications devoted to it in recent years. The concept is needed to address those aspects of human experience and social life that fall outside of ordered structures. In contrast to the clearly defined roles and routines that define so much of industrial work and economic life, it highlights spaces of transition, indefiniteness, ambiguity, play, and creativity. Thus, it is an indispensable concept and a necessary counterweight to the overemphasis on structural influences on human behavior. This book aims to use the concept of liminality to develop a culturally and experientially sensitive psychology. This is accomplished by first setting out an original theoretical framework focused on understanding the liminal sources of cultural experience and second, an application of the concept to a number of different domains such as tourism, pilgrimage, aesthetics, children's play, art therapy, and medical diagnosis. Finally, all these domains are then brought together in a concluding commentary chapter that puts them in relation to an overarching theoretical framework. This book will be useful for graduate students and researchers in cultural psychology, critical psychology, psychosocial psychology, developmental psychology, health psychology, anthropology, and the social sciences, cultural studies, among others.

The Edge of Terror Scott Walker, 2009-10-13 Scott Walker's *The Edge of Terror* offers a gripping account of courage, death, and survival in the war-torn islands of the Philippines. As Japanese military strategists planned their secret offensive against the United States in 1941, they designed a simultaneous two-pronged attack to wipe out American military might in the Pacific. While American battleships blew up and sank in Pearl Harbor, Japanese bombers approached the Philippines, soon destroying both American air and naval forces and leaving General Douglas MacArthur's ground forces in disarray. As the shipping piers in Manila harbor burned, nearly six thousand American civilians were suddenly trapped in the islands for the duration of the war. There would be no more ocean liners or Pan Am Clippers to transport them to safety. These unfortunate individuals and families became the largest body of American citizens ever captured by an enemy army. Soon, most of these hapless civilians realized that they had little option but to surrender to the invading Japanese and be placed in squalid internment camps. However, on the small island of Panay, a group of American missionaries and gold miners bound their fates together and withdrew into hiding in the jungle. Some joined with the Filipino guerrilla forces actively resisting the Japanese. Others quietly continued their humanitarian tasks amidst the horrors of war. But all of them experienced living hell together. For the first time in more than fifty years, the little-known story is told of these brave American civilians on Panay. Drawing on diaries, memoirs, family interviews, and military archives, Scott Walker describes daily life during the occupation and the danger these Americans faced in their efforts to serve both God and country. Both a story of profound tragedy and miraculous escape, *The Edge of Terror* is one of the most intense and dramatic accounts to emerge from World War II.

Leading Edge Antioxidants Research Harold V. Panglossi, 2007 In biological systems, the normal processes of oxidation, plus a minor contribution from

ionising radiation produce highly reactive free radicals These can readily react with and damage other molecules In some cases the body uses free radicals to destroy foreign or unwanted objects such as in an infection However in the wrong place the body's own cells may become damaged Should the damage occur to DNA the result could be cancer Antioxidants decrease the damage done to cells by reducing oxidants before they can damage the cell Virtually all studies of mammals have concluded that a restricted calorie diet extends the lifespan of mammals by as much as 100 percent This remarkable finding suggests that food is actually more damaging than smoking As food produces free radicals oxidants when metabolised antioxidant rich diets are thought to stave off the effects of ageing significantly better than diets lacking in antioxidants The reduced levels of free radicals resulting from a reduction in their production by metabolism is thought to be a major cause of the success of caloric restriction in increasing life span Antioxidants consist of a group of vitamins including vit

Eurasia on the Edge Richard Sakwa, 2018-10-15 Eurasia wherever one draws the boundaries is very much at the centre of discussions about today's world Security across Eurasia is a global concern and has been subject to a range of discussions and debate However the current tensions over security and world order with the growing challenges from Eurasia and Asia require more intense scrutiny The goals of the book are to explore the challenges facing the region and to assess how to achieve economic social and political stability in the Eurasian core The book's chapters are written by prominent experts in the field and together contribute to the continuing debate by providing policy advice for managing crises in the region Conflicts inevitably arise in the Eurasian space as global powers regional powers and individual states jockey for positions and influence These conflicts need not reach a crisis state provided the foundations of conflict and the surrounding frameworks can be better understood To do this it is necessary to examine the issue of security in Eurasia from a multi dimensional perspective that challenges any and all assumptions about Eurasia and global order This volume has two overarching goals The first is to come to a better understanding of key security threats in the Eurasian region from a multi dimensional social political economic and institutional perspective The second is to discuss policies directed to increase mutual security in and around the Eurasian core Although the crisis of security affects the whole continent the area covered by the former Soviet Union and its neighborhood is at the epicenter of the current crisis On the one side the Atlantic community is consolidating and extending On the other various greater Asia ideas are in the making All of Eurasia is in danger of becoming an extended shatter zone a vast new shaky borderland trapped between two great systems of power and world order
