think the science of the essence of consciousness itself Husserl's arguments ignited a heated debate regarding the nature of consciousness and experience that has endured throughout the twentieth and continues in the present day No understanding of twentieth century philosophy is complete without some understanding of Husserl and his work influenced some of the great philosophers of the twentieth century such as Martin Heidegger and Jean Paul Sartre

Phenomenology and the Foundations of the Sciences Edmund Husserl, 2001-11-30 There is no author's introduction to Phenomenology and the Foundations of the Sciences either as published here in the first English translation or in the standard German edition because its proper introduction is its companion volume General Introduction to Pure Phenomenology 2 The latter is the first book of Edmund Husserl's larger work Ideas Toward a Pure Phenomenology and Phenomenological Philosophy and is commonly referred to as Ideas I or Ideen I The former is commonly called Ideen III Between these two parts of the whole stands a third Phenomenon 3 logical Investigations of Constitution generally known as Ideen II In this introduction the Roman numeral designations will be used as well as the abbreviation PFS for the translation at hand In many translation projects there is an initial problem of establishing the text to be translated That problem confronts translators of the books of Husserl's Ideas in different ways The Ideas was written in 1912 during Husserl's years in Gottingen 1901 1916 Books I and II were extensively revised over nearly two decades and the changes were incorporated by the editors into the texts of the Husserliana editions of 1950 and 1952 respectively Manuscripts of the various reworkings of the texts are preserved in the Husserl Archives but for those unable to work there the only one directly available for Ideen II is the reconstructed one

Experience and Judgment Edmund Husserl, 1975-06-01 In *Experience and Judgment* Husserl explores the problems of contemporary philosophy of language and the constitution of logical forms He argues that even at its most abstract logic demands an underlying theory of experience Husserl sketches out a genealogy of logic in three parts Part I examines prepredicative experience Part II the structure of predicative thought as such and Part III the origin of general conceptual thought This volume provides an articulate restatement of many of the themes of Husserlian phenomenology

Logical Investigations Edmund Husserl, 2001 Coinciding with the renewed interest in Husserl and the origins of phenomenology *Logical Investigations* his most famous and influential work is presented here in paperback for the first time

Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy Edmund Husserl, 1983-09-30 the *Logische Untersuchungen* I phenomenology has been conceived as a substratum of empirical psychology as a sphere comprising immanent descriptions of psychical mental processes a sphere comprising descriptions that so the immanence in question is understood are strictly confined within the bounds of internal experience It would seem that my protest against this conception has been of little avail and the added explanations which sharply pinpointed at least some chief points of difference either have not been understood or have been heedlessly pushed aside Thus the replies directed against my criticism of psychological method are also quite negative because they miss the straightforward sense of my presentation My criticism of psychological method did not at all deny the value of modern psychology did not at all disparage the experimental work done by eminent men Rather it laid bare certain in the literal sense radical defects of method upon the removal of which in my opinion must depend an elevation of psychology to a higher scientific level and an extraordinary amplification of its field of work Later an occasion will be found to say a few words about the unnecessary defences of psychology against my supposed attacks

Phenomenological Psychology Edmund Husserl, 1977-12 THE TEXT In the summer semester of 1925 in Freiburg Edmund Husserl delivered a lecture course on phenomenological psychology in 1926/27 a course on the possibility of an intentional psychology and in 1928 a course entitled *Intentional Psychology* In preparing the critical edition of *Phänomenologische Psychologie* Husserliana IX I Walter Biemel presented the entire 1925 course as the main text and included as supplements significant excerpts from the two subsequent courses along with pertinent selections from various research manuscripts of Husserl He also included as larger supplementary texts the final version and two of the three earlier drafts of Husserl's *Encyclopedia Britannica* article *Phenomenology*² with critical comments and a proposed formulation of the Introduction and Part I of the second draft by Martin Heidegger³ and the text of Husserl's Amsterdam lecture *Phenomenological Psychology* which was a further revision of the *Britannica* article Only the main text of the 1925 lecture course *Husserliana* IX 1 234 is translated here In preparing the German text for publication Walter Biemel took as his basis

Husserl's original lecture notes handwritten in shorthand and I Hague Nijhoff 1962 1968 The second impression 1968 corrects a number of printing mistakes which occur in the 1962 impression 2 English translation by Richard E Palmer in Journal of the British Society for Phenomenology II 1971 77 90 3 Heidegger's part of the second draft is available in English as Martin Heidegger The Idea of Phenomenology tr John N Deely and Joseph A *The Phenomenology of Internal Time-Consciousness* Edmund Husserl, 2019-04-29 An exploration of the terrain of consciousness in the light of its temporality from the father of phenomenology The Phenomenology of Internal Time Consciousness is a translation of Edmund Husserl's Vorlesungen zur Phänomenologie des inneren Zeitbewusstseins The first part of the book was originally presented as a lecture course at the University of Göttingen in the winter semester of 1904 1905 while the second part is based on additional supplementary lectures that he gave between 1905 and 1910 The pervading theme of these essays and lectures is the temporal constitution of a pure datum of sensation and the self constitution of phenomenological time which underlies such a constitution Husserl identifies two categories of temporality retention and protention and outlines how temporality provides the form for perception phantasy imagination memory and recollection He demonstrates a distinction between cosmic and phenomenological time and explores the relevance of phenomenological time for the constitution of temporal objects The ideas Husserl developed here are explored further in his Ideas and were pursued until the end of his philosophical career As an addition to the small body of Husserl's writings now available in English Ideas 1931 Meditations 1960 this book is essential to even a small collection of source works on contemporary philosophy Choice *On the Phenomenology of the Consciousness of Internal Time (1893-1917)* Edmund Husserl, 1992-03-31 What follows is a translation of Volume X in the Husserliana series the critical edition of the works of Edmund Husserl I Volume X was published in 1966 Its editor Rudolf Boehm provided the title Zur Phänomenologie des inneren Zeitbewusstseins 1893 1917 Some of the texts included in Volume X were published during Husserl's lifetime but the majority were not Given the fact that the materials assembled in Volume X do not constitute a single and previously published Husserlian work some acquaintance with their history and chronology is indispensable to understanding them These introductory remarks are intended to provide the outlines of such an acquaintance together with a brief account of the main themes that appear in the texts The Status of the Texts In 1928 Husserl's Vorlesungen zur Phänomenologie des inneren Zeitbewusstseins appeared in the Jahrbuch für Philosophie Edmund Husserl Zur Phänomenologie des inneren Zeitbewusstseins 1893 1917 On the phenomenology of the consciousness of internal time 1893 1917 I herausgegeben von Rudolf Boehm Husserliana X The Hague Martinus Nijhoff 1966 The references in Roman numerals that occur in parentheses in this Introduction are to Rudolf Boehm's Editor's Introduction to Husserliana X References in Arabic numerals unless otherwise noted will be to this translation Corresponding page numbers of Husserliana X will be found in the margins of the translation The translation includes Parts A and B of Husserliana X with Boehm's notes

The Crisis of European sciences and transcendental phenomenology Edmund Husserl, 1970 **Psychological and**

Transcendental Phenomenology and the Confrontation with Heidegger (1927-1931) Edmund Husserl, 1997-10-31
 Thomas Sheehan and Richard E Palmer The materials translated in the body of this volume date from 1927 through 1931 The Encyclopaedia Britannica Article and the Amsterdam Lectures were written by Edmund Husserl with a short contribution by Martin Heidegger between September 1927 and April 1928 and Husserl's marginal notes to *Sein und Zeit* and *Kant und das Problem der Metaphysik* were made between 1927 and 1929 The appendices to this volume contain texts from both Husserl and Heidegger and date from 1929 through 1931 As a whole these materials not only document Husserl's thinking as he approached retirement and emeritus status March 31 1928 but also shed light on the philosophical chasm that was widening at that time between Husserl and his then colleague and protégé Martin Heidegger 1 The Encyclopaedia Britannica Article Between September and early December 1927 Husserl under contract composed an introduction to phenomenology that was to be published in the fourteenth edition of the Encyclopaedia Britannica 1929 Husserl's text went through four versions which we call Drafts A B C and D and two editorial condensations by other hands which we call Drafts E and F Throughout this volume those five texts as a whole are referred to as the EB Article or simply the Article Husserl's own final version of the Article Draft D was never published of it appeared only in 1962

Phantasy, Image Consciousness, and Memory (1898-1925) Edmund Husserl, 2005-10-28 This is the first English translation of *Husserliana XXIII* the volume in the critical edition of Edmund Husserl's works that gathers together a rich array of posthumous texts on representational consciousness The lectures and sketches comprising this work make available the most profound and comprehensive Husserlian account of image consciousness They explore phantasy in depth and furnish nuanced accounts of perception and memory

Thing and Space Edmund Husserl, 1997-10-31 This is a translation of Edmund Husserl's lecture course from the Summer semester 1907 at the University of Göttingen The German original was published posthumously in 1973 as Volume XVI of *Husserliana* Husserl's *opera omnia* The translation is complete including both the main text and the supplementary texts as *Husserliana* volumes are usually organized except for the critical apparatus which provides variant readings The announced title of the lecture course was *Main parts of the phenomenology and critique of reason* The course began with five relatively independent introductory lectures These were published on their own in 1947 bearing the title *The idea of phenomenology I* The Five Lectures comprise a general orientation by proposing the method to be employed in the subsequent working out of the actual problems viz the method of phenomenological reduction and by clarifying at least provisionally some technical terms that will be used in the labor the subsequent lectures will carry out The present volume then presents that labor i.e. the method in action and the results attained As such this text dispels the abstract impression which could not help but cling to the first five lectures taken in isolation Accordingly we are here given genuine introductory lectures i.e. an introduction to phenomenology in the genuine phenomenological sense of engaging in the work of phenomenology going to the matters at issue themselves rather than remaining aloof from them in abstract considerations of standpoint and approach *The*

Origins of the Horizon in Husserl's Phenomenology Saulius Geniusas, 2012-07-05 This volume is the first book length analysis of the problematic concept of the horizon in Edmund Husserl's phenomenology as well as in phenomenology generally. A recent arrival on the conceptual scene, the horizon still eludes robust definition. The author shows in this authoritative exploration of the topic that Husserl, the originator of phenomenology, placed the notion of the horizon at the centre of philosophical enquiry. He also demonstrates the rightful centrality of the concept of the horizon, all too often viewed as an imprecise metaphor of tangential significance. His systematic analysis deploys both early and late work by Husserl as well as hitherto unpublished manuscripts. Opening out the question to include that of the origins of the horizon, the book explores the horizon as philosophical theme or notion as a figure of intentionality and as a signification of one's consciousness of the world, our world, horizon. It argues that the central philosophical significance of the problematic of the horizon makes itself apparent in realizing how this problematic enriches our philosophical understanding of subjectivity. Systematic, thorough and revealing, this study of the significance of a core concept in phenomenology will be relevant not only to the phenomenological community but also to anyone interested in the intersections of phenomenology and other philosophical traditions such as hermeneutics and pragmatism.

Analyses Concerning Passive and Active Synthesis Edmund Husserl, 2001-10-31 These lectures are the first extensive application of Husserl's newly developed genetic phenomenology to perceptual experience to the way in which it is connected to judgments, cognition. Students of phenomenology will find this work indispensable.
