Education And The Urban Crisis:

Education and the Urban Crisis Harold Entwistle, 2012 Based on two conferences this volume explores trends during the 1960s and 1970s in inner city areas in the United Kingdom It describes how the inner city is losing jobs and skilled workers and as the population falls the number of disadvantaged people and those claiming benefits is increasing To what extent the book asks does the educational system contribute to or alleviate Britain s urban crisis In answering this question the contributors examine the complex interrelationships between educational economic and social problems and point out that one of the major weaknesses of the present educational system in Britain is that it is in no way linked to the labour market They suggest how schools could be better linked to local employment opportunities while at the same time offering more culturally varied educational opportunities They also analyze Britain s urban programme and show that it in no way matches up to what is required if poverty which is seen as the root of the urban crisis is to be eradicated

America's Urban Crisis and the Advent of Color-Blind Politics Curtis L. Ivery, Joshua Bassett, 2011-09-16 Over 40 years ago the historic Kerner Commission Report declared that America was undergoing an urban crisis whose effects were disproportionately felt by underclass populations In America s Urban Crisis and the Advent of Color blind Politics Curtis Ivery and Joshua Bassett explore the persistence of this crisis today despite public beliefs that America has become a post racial nation after the election of Barack Obama to the presidency Ivery and Bassett combine their own experience in the fields of civil rights and education with the knowledge of more than 20 experts in the field of urban studies to provide an accessible

overview of the theories of the urban underclass and how they affect America's urban crisis. This engaging look into the still present racial politics in America's cities adds significantly to the existing scholarship on the urban underclass by discussing the role of the prison industrial complex in sustaining the urban crisis as well as the importance of the concept of multiracial democracy to the future of American politics and society. *America's Urban Crisis and the Advent of Color-blind Politics* encourages the reader not only to be aware of persisting racial inequalities but to actively engage in efforts to respond to them.

Purcell, 1982 **Urban School Crisis** United States. Task Force on Urban Education, 1970 **Education and the City** Gerald Grace, 2013-06-17 City schools especially those attended by working class and ethnic minority pupils are the catalysts of many significant issues in educational debate and policy making. They bring into sharp focus questions to do with class, gender and race relations in education, concepts of equality of opportunity and of social justice and controversies about the wider political, economic and social context of mass schooling. America, Western Europe and Australia have all taken a keen interest in the problems of urban schooling. The contributors to this collection of original essays all share a concern about these problems although they approach them from a wide range of theoretical and ideological positions. Gerald Grace and his contributors criticise the current limitations of urban education as a field of study and they present a foundation for a more historically located and critically informed inquiry into problems, conflicts and contradictions in urban schooling. Part I presents contributions on theories of the urban. Part II focuses upon the history of urban education both in Britain and the USA. Part III discusses contemporary policy and practice with essays relating to education in inner city London and in New York City. This book was first published in 1984.
