Science Education in Canada Christine D. Tippet, Todd M. Milford, 2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada s successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education

A History of Early Childhood Education in Canada, Australia, and New Zealand Larry Prochner, 2010-01-01 In the early nineteenth century governments developed kindergartens and infant schools to give children a head start in life These programs hinged on new visions of childhood that originated in England and Europe but what happened when they were transported to the colonies This book unwinds the tangled threads of this history by tracing how Enlightenment thought and Romantic ideas translated into early infant schools in England kindergartens in Germany

and the United States and free kindergarten systems in the Commonwealth countries The systems that emerged in Canada Australia and New Zealand maintained the integrity of the ideas and models that inspired them but adapted them to suit local ideas politics and populations This unique account of early childhood education in comparative perspective provides fresh insight into how to reconcile educational theory and practice in an increasingly global world

International Education as Public Policy in Canada

Merli Tamtik,Roopa Desai Trilokekar,Glen A. Jones,2020-10-07 In the early twenty first century international education emerged as an almost ubiquitous concept within discussions of educational curriculum the objectives of schools universities and colleges and government policies for K 12 and higher education Although far from a new phenomenon many jurisdictions now view international education as a highly competitive global industry This book provides a comprehensive analysis of international education policy in Canada tracing the complex history of when how and why it emerged as a policy area of strategic importance Illuminating a uniquely Canadian perspective influenced by regional interests and federal provincial tensions International Education as Public Policy in Canada addresses challenging questions Why was Canada a latecomer in addressing this policy issue What is the relationship between international education and Canadian immigration policy How did international education develop as a major Canadian industry The resulting essays from leading scholars contribute not only to the growing Canadian literature on international education policy but also to a critical global conversation Contemplating where the Canadian story of international education is headed International Education as Public Policy in Canada calls for a broader debate on ethical practices in internationalization focusing on inclusion equity compassion and reciprocity *Documentary History of Education in Upper Canada: 1843-1846* Ontario. Access to Higher Education Graeme Atherton, 2017-09-16 This book is the first systematic attempt to examine one of the biggest challenges facing universities and society in the 21st century how do we create opportunities to allow people from all social backgrounds to benefit from higher education It examines how policymakers higher education institutions and civil society organisations are meeting this challenge across the globe Each chapter focuses on one of 12 countries including the economically powerful US and Germany developing nations from Africa and South America and the new higher education superpowers of China and India Access to Higher Education shows that across these different nations inequalities in higher education participation are common but their nature differs It argues for a new nationhood based approach to understanding why these differences exist *Documentary History of Education in Upper Canada* Ontario.
