Education In China:

Education in Traditional China Thomas H. C. Lee, 2000 This comprehensive survey covers the main aspects of China's educational history: schools and examination system, student movements, private academies, the relationship between state and society, and education life of intellectuals; the conventions of intellectual discourse and the tradition of China's classical learning.

Education in China Xiaohuan Su, 2002 The chapters in this book consider the past and present of education in China: elementary education, vocational education, higher education, adult education, education for ethnic minorities, modern distance education, teacher education, and teachers' international exchanges and cooperation; the education funding system; and the study of education as a science.

Handbook of Education in China W. John Morgan, Qing Gu, Fengliang Li, 2017-08-25 The Handbook of Education in China provides both a comprehensive overview and an original interpretation of key aspects of education in the People's Republic of China. It has four parts: The Historical Background, The Contemporary Chinese System, Problems and Policies, The Special Administrative Regions, Macau and Hong Kong. The Handbook is an essential reference for those interested in Chinese education as well as a comprehensive textbook that provides valuable supplementary material for those studying Chinese politics, economy, culture, and society more generally.

Education and Reform in China Emily Hannum, Albert Park, 2007 Transformative market reforms in China since the late 1970s have improved living standards dramatically but have also led to unprecedented economic inequality. During this period, China's educational system was restructured to support economic development, with educational reforms occurring at a startling pace. Today the educational system has diversified in structure, finance, and content; it has become more market-oriented and is serving an increasingly diverse student population. These changes carry significant consequences for China's social mobility and inequality and future economic prospects. In *Education and Reform in China*, leading scholars in the fields of education, sociology, demography, and economics investigate the evolution of educational access and attainment, educational quality, and the economic consequences of being educated. *Education and Reform in China* shows that economic advancement is increasingly tied to education in China, even as educational services are increasingly marketized. The volume investigates the varying impact of change for different social, ethnic, economic, and geographic groups. Offering interdisciplinary views on the changing role of education in Chinese society and on China's educational achievements and policy challenges, this book will be an important resource for those interested in education, public policy, and development issues in China.

Education in the New China Yvonne Turner, Amy Acker, 2017-07-05 The effects of the deregulation of the Chinese university system have been nothing short of spectacular. For the first time since 1949, students possessing neither gifted intellect nor political connections have been able to share in the benefits of higher education, while a flood of international educators have opened up a previously cloistered and politically sensitized academic world. This fascinating book examines China's higher education system and how its new and unique blend of foreign and Chinese perspectives impact on both the lives of students and

academics and wider Chinese society Viewed with suspicion as a new type of Chinese by the older generation and by the government they are at the same time the very entrepreneurs driving the economic and social revolution sweeping the country Using a range of in depth interviews and unique research it provides open and often frank accounts of life work and education in China from the Cultural Revolution to the creation of its market focused entrepreneurial generation Candid and illuminating this is a book no serious reader of Asian studies comparative education or Asian sociology will want to be without
