Education 225 Diversity In Education:

Law and Religious Diversity in Education Kyriaki Topidi, 2020-08-05 Religion is a prominent legal force despite the premise constructed and promoted by Western constitutionalism that it must be separated from the State in democracies Education constitutes an area of human life that leaves ample scope for the expression of religious identity and shapes the citizens of the future It is also the place of origin of a considerable number of normative conflicts involving religious identity that arise today in multicultural settings The book deals with the interplay of law and religion in education through the versatility of religious law and legal pluralism as well as religion s possible adaptation and reconciliation with modernity in order to consider and reflect on normative conflicts It adopts the angle of the constitutional dimension of religion narrated in a comparative perspective and critically reflects on regulatory attempts by the State and the international community to promote new ways of living together

Education, Law and Diversity Neville Harris, 2020-01-09 This new edition of Education Law and Diversity provides extensive updated analysis from a legal perspective of how the education system responds to social diversity and how the relevant social and cultural rights of individuals and groups are affected It spans wide ranging areas of school provision including types of school including faith schools the school curriculum choice of school out of school settings and duties towards children with special needs and disabilities It gives extensive coverage to children s rights in the context of education and includes considerable new material on issues including relationships and sex education exclusion from school home education equal access counter extremism and academisation The new edition also retains and updates areas of debate in the book such as those concerned with multiculturalism and the position of religion in schools It continues to focus on England but also makes reference to other jurisdictions within the UK and internationally It is essential reading for anyone interested in the legal and related policy issues surrounding children s education today

Education, Religion and Diversity L. Philip Barnes, 2014-02-05 In this thoughtful and provocative book Philip Barnes challenges religious educators to re think their field and proposes a new post liberal model of religious education to help them do so His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored While Education Religion and Diversity is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion Walter Feinberg Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential what he calls a liberal and a postmodern model After a detailed review and criticism of both he outlines his own new post liberal model of religious education one that is compatible with both confessional and non confessional forms of religious education yet takes

religious diversity and religious truth claims seriously Essential reading for all religious educators and those concerned with the role of religion in schools Bernd Schr der Professor of Practical Theology and Religious Education University of G ttingen What place if any does religious education have in the schools of an increasingly diverse society This lucid and authoritative book makes an incisive contribution to this crucial debate Roger Trigg is Emeritus Professor of Philosophy University of Warwick and Senior Research Fellow Ian Ramsey Centre Oxford The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of all curriculum subjects resolutions are most likely to be found Education Religion and Diversity identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society It is argued that despite the rhetoric of success which religious education is obliged to rehearse in order to perpetuate its status in the curriculum and to ensure political support a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible respectful society Education Religion and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education Encyclopedia of Diversity in Education James A. Springer's Technical and Vocational Education and Training series provides analysis both of theory and empirical data submitted by researchers from nine nations including the USA, Oman, Malaysia and countries in the European Union. The papers trace the origins of business demand for diversity in their workforce's skill set including national, local and institutional contexts. They also consider how social, demographic, cultural, religious and linguistic diversity inform the attitudes of those seeking work and those seeking workers. With clear suggestions for future research, this work on a topic of rising profile will be read with interest by educators, policy makers, employers and careers advisors. *Diversity in Schools* Richard C. Young People's Attitudes to Religious Diversity Elisabeth Arweck, 2016-07-01. Investigating the hitherto unexplored topic of how young people understand and relate to religious diversity in the social context in which they are growing up, this book makes a significant contribution to the existing body of literature on religious diversity and multiculturalism. It closes a gap in knowledge about young people's attitudes to religious diversity and reports data gathered across the whole of the UK as well as comparative chapters on Canada, USA and continental Europe. Reporting findings from both qualitative and quantitative research which reveal, for example, the importance of the particular social and geographical context within which young people are embedded, the volume addresses young people's attitudes towards the range of world religions as well as non-religious stances and offers an interdisciplinary approach through the different analytical perspectives of the contributors.

Faith Schools, Tolerance and Diversity Helen Everett, 2018-03-28. This book examines the effects of faith schools on social cohesion and inter-ethnic relations. Faith schools constitute approximately one third of all state-maintained schools and two fifths of the independent schools in England. Nevertheless, they have historically been and remain controversial. In the current social climate, questions have been raised about the ability of faith schools to promote Community Cohesion and included within that, their ability to promote tolerance. This book explores one aspect of the debate by examining the effect that faith schools have on their students' attitudes of tolerance. As well as asking what differences exist between students in faith and non-faith schools, it also looks at which aspects of the schools might be affecting the students and their attitudes towards different minorities. The book is a must-read for students and researchers in the fields of education and religious studies as well as anyone with an interest in the place of faith schools in a modern multicultural society.
