Cultural Education - Cultural Sustainability Zvi Bekerman, Ezra Kopelowitz, 2008-02-06 This volume is a path breaking contribution to the study of efforts of diaspora indigenous and minority groups broadly defined to use education formal and informal to sustain cultural continuity while grappling with the influences and demands of wider globalizing nationalizing or other homogenizing and assimilatory forces Particular attention is given to groups that use educational elements other than second language teaching alone in programs to sustain their particular cultural traditions The focus of the book on cultural sustainability changes the nature of questions posed in multicultural education from those that address the opening of boundaries to issues of preserving boundaries in an open yet sustainable way As forced and elective immigration trends are changing the composition of societies and the educational systems within them bringing a rich diversity of cultural experience to the teaching learning process diaspora indigenous and minority groups are looking more and more for ways to sustain their cultures in the context of wider socio political influences This volume is a first opportunity to consider critically multicultural efforts in dialogue with educational options that are culturally particularistic but at the same time tolerant Academics will find this an excellent reference book Practitioners will draw inspiration in learning of others efforts to sustain cultures and will engage in critical reflection on their own work vis vis that of others Teachers will realize they do not stand alone in their educational efforts and will uncover new strategies and methodologies through which to approach their work *Journal of education Culture and Society* Aleksander Kobylarek, 2016-06-25 Nic nie wpisano
Education, Culture and Critical Thinking Ken Brown, 2018-12-17 Published in 1998 Interest in the subject of critical

thinking has mounted seeking ways to transcend rote learning and to remedy a widely perceived lack of critical analytical abilities amongst school students A growing literature on teaching thinking and problem solving maintains this commitment reflecting a common belief that thinking skills of a general nature can not only be identified but can be taught successfully The paucity of empirical evidence that intellectual skills thus identified actually transfer between domains of thought or subject matters has done little to diminish faith in the possibility that this is achievable The principal message of this book is that theories of critical thinking which disregard its historical origins and dialectical traditional character are likely to be seriously flawed All human societies exhibit problem solving abilities often of a high order all language and thought is fundamentally criteriological Relevant distinctions between critical thought and its alternative are found in history and culture in dialogue and criticism not just in the operations of individual minds The critical traditions embody a sovereign principle a criterion of the effectiveness of educational institutions to represent the legacy and social liberties and democratic values in which they are deeply enmeshed

Democracy and Education in Namibia and Beyond Amukugo, Elizabeth M., 2017-07-19. The Namibian constitution makes full provision for education as a fundamental human right and freedom. Three years into independence, as part of the government's educational policy, the Education for All Policy was launched as a stepping stone to free quality education. However, inequities have become widely pronounced within the Namibian educational system. *Democracy and Education in Namibia and Beyond* debates the education-democracy nexus in Namibia and the southern African context. It defines and explores the meaning of democracy and related concepts. It also looks at what democracy means in the context of human rights and access to education. The ten chapters in this collection interrogate the strengths and limitations of education as an instrument of social change and question whether or not the Namibian educational objectives and practices do develop and help to sustain a democratic culture in Namibia. The authors in the collection have drawn material from their own teaching and research experience across the fields of education and social science in Namibia and beyond and present their findings in a pedagogical framework suitable as a challenging text for tertiary students. At a time when education is in crisis, especially in South Africa, where strident calls for free tertiary education and Africanisation of the curriculum are spreading like wildfire, this book gives scholarly insight into the history and social conditions that gave rise to our current predicament.
