Foucault and Education Stephen J. Ball, 2019-05-16 Specially selected by Stephen Ball this is a collection of the best and most interesting recently published papers that use Foucault to analyse destabilise and re claim educational problems Arguably the best known social theorist in the western world Foucault's work is now widely used by researchers and writers in many fields of social science These papers not only demonstrate the practical applicability of Foucault to things cracked and things intolerable in making them not as necessary as all that they are also transposable in that they offer forms and methods of analysis which can be taken up and applied and used in other settings sectors and policy fields Pursuing Teaching Excellence in Higher Education Margaret Wood, Feng Su, 2021-09-23

Teaching excellence is a topic of international significance having importance for higher education worldwide yet is generally considered to be poorly defined and understood The current discourse of teaching excellence is narrowly framed instrumental and performative with an onus on measurement and quantification Wood and Su investigate and rethink excellence in higher education connecting this to the understanding of the role and purpose of higher education Stakeholder perspectives on teaching excellence are explored and the authors argue that it is through engaging with higher education constituencies to examine teaching excellence from different angles and stances that more inclusive understandings may be built These stakeholder perspectives which form the central chapters of the book include higher education institutions

academics students employers and parents The importance of a commitment to engaging with understandings situated in the diverse experiences and contexts of stakeholders for an inclusive perspective on teaching excellence is affirmed At the close of the book the Coda examines some of the implications of the responses to the COVID 19 global pandemic for inclusive perspectives on teaching excellence in higher education A Normative Foucauldian Mark Olssen,2021-09-27 Inspired by the writings of Michel Foucault Olssen s writings traverse philosophy politics education and epistemology This book comprises a selection of his papers published in academic journals and books over twenty five years Taken as a whole the papers represent a redirection of the core axioms and directions of western ontology and philosophy in relation to how history the subject and education are theorised within the western philosophical tradition Olssen s writings not only contain a powerful critique and revision of western liberalism from a poststructuralist perspective they both explicate and extend Michel Foucault s challenge to the core axioms and assumptions underpinning western thought As Stephen Ball suggests in his Foreword to this volume Olssen uses Foucault to explore issues Olssen s Foucault is not a lonely nihilist but a troubled provocateur who encourages in us toward the political project of self formation our relation to ourselves and always to others

Assessing the Quality of Educational Research in Higher Education ,2019-02-11 Tina Besley has edited this collection which examines and critiques the ways that different countries particularly Commonwealth and European states assess the quality of educational research in publicly funded higher education institutions Such assessment often ranks universities departments and even individual academics and plays an important role in determining the allocation of funding to support university research Yet research is only one aspect of academic performance alongside teaching and service or administration components The book focuses on the theoretical and practical issues that accompany the development of national and international systems of research assessment particularly in the field of education In our interconnected globalised world some of the ideas of assessment that have evolved in one country have almost inevitably travelled elsewhere especially the UK model Consequently the book comprises an introduction eighteen chapters that discuss the situation in ten countries followed by a postscript It gathers together an outstanding group of twenty five prominent international scholars with expertise in the field of educational research and includes many with hands on experience in the peer review process The book is designed to appeal to a wide group of people involved as knowledge workers and knowledge managers academics students and policy makers in higher education and interested in assessment and accountability mechanisms and processes **Knowledge & Power in the Global Economy** David Gabbard,2017-07-05 Advancing a three fold political

agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings

for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices

Neoliberalism and Market Forces in Education Magnus Dahlstedt, Andreas Fejes, 2019-03-04 Neoliberalism and Market Forces in Education provides a wide perspective on the dramatic transformation of education policy in Sweden that has taken place during the last 30 years with a specific focus on marketization The marketization of education in Sweden is set in the wider international context of changes in education systems With contributions from researchers across a wide range of scientific disciplines the book provides examples of the consequences of market orientation in education in terms of increase in inequality as well as in terms of what the market orientation means for principals teachers and students It considers how Sweden has developed one of the most marketized education systems in the world and the possible consequences of such processes as identified by research Neoliberalism and Market Forces in Education will be of great interest to educational practitioners politicians scholars in the field and postgraduate and research students in education *Childhoods* Gaile Sloan Cannella, Lourdes Diaz Soto, 2010 For the past 20 years a range of scholars educators and cultural workers have examined dominant discourses of childhood using critical feminist and other postmodern perspectives Located in a variety of disciplines these poststructural deconstructive and even postcolonial critiques have challenged everything from notions of the universal child to adult child dualisms to deterministic developmental theory The purpose of this volume is to acknowledge the profound contributions of that large body of literature while demonstrating the ways that critical analyses can be used to generate avenues actions that increase possibilities for social justice for those who are younger while at the same time avoiding determinism In this time of globalization hyper capitalism and discourses that would control and disqualify through constructions like accountability we believe that projects such as this are of utmost importance The volume is divided into four major sections to reflect the multiplicity of human voices and perspectives section I contemporary circumstances and dominant discourses within which we all attempt to function sections II and III and the generation of new possibilities for constructing relationships together section IV Finally a voice from the heart within a reconceptualist social

science agenda for early childhood studies is presented Global Perspectives on Educational Leadership Reform Anthony H. Normore, 2010-11-08 This volume focuses on educational reform leadership development programs and professional development processes intended to prepare and develop prospective and practicing educational leaders into leadership positions and examines issues that affect leaders serving in the role of educational leader learner **Education, Professionalism and the Quest for Accountability** Jane Green, 2011-05-20 Today workers based in institutions designed to serve the public teachers nurses social workers community officers librarians civil servants etc are expected to reorganize their thoughts and practice in accordance with a performance management model of accountability which encourages a rigid bureaucracy one which translates regulation and monitoring procedures into inflexible and obligatory compliance This book shows how and why this performance model may be expected paradoxically to make practices less accountable and in the case of education less educative
