improved educational and career outcomes for undergraduate and graduate students It explores evidence regarding the value of integrating more STEM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEM education programs     **Research in Education** ,1974     *Jewish Education* ,1929     *Resources in Education* ,1998     **Educational Research Document Summaries** Educational Research Information Center (U.S.),1966
