Lanjo, 2020-06-01 Life throws us many challenges and some give rise to strong emotions Modern neuroscience research shows that many patients who visit primary care doctors are experiencing physical symptoms that have a purely psychological cause The good news is that once we realize that negative habitual thoughts have the power to make us sick we can focus on eliminating physical symptoms simply by transforming our thought processes Mike Tangunu Lanjo a clinician and passionate public servant who frequently provides holistic care for clients shares practical insight that offers a different perspective on how the human mind can cause physical illnesses that present symptoms such as fatigue dizziness back and chest pain digestive

issues and rashes and often leave medical professionals frustrated and unable to provide a solid diagnosis Through his guidance Lanjo encourages us to identify and address the root causes of diseases by viewing the body as one integrated system instead of a collection of independent organs We can then shift our attention from the physical to the psychological realm ultimately allowing for whole body healing not just the suppression of symptoms in most psychosomatic cases Mind Sneezes Body Catches a Cold is a holistic guide to achieving optimal health through thought process transformation Sale Catalogues American Art Association, Anderson Galleries (Firm),inc American art association Aderson galleries,1929
