G. Morris, 1994 This book will undoubtedly become one of the classics of the project management literature There will be a growing need for project managers who can look beyond the internal processes of their projects to the organisational technological and socio economic contexts in which projects must be managed A good starting point would be for all project managers to read this book **Construction Management and Economics      Site Fights** Daniel P. Aldrich, 2010-03-18 One of the most vexing problems for governments is building controversial facilities that serve the needs of all citizens but have adverse consequences for host communities Policymakers must decide not only where to locate often unwanted projects but also what methods to use when interacting with opposition groups In **Site Fights** Daniel P Aldrich gathers quantitative evidence from close to five hundred municipalities across Japan to show that planners deliberately seek out acquiescent and unorganized communities for such facilities in order to minimize conflict When protests arise over nuclear power plants dams and airports agencies regularly rely on the coercive powers of the modern state such as land expropriation and police repression Only under pressure from civil society do policymakers move toward financial incentives and public relations campaigns Through fieldwork and interviews with bureaucrats and activists Aldrich illustrates these dynamics with case studies from Japan France and the United States The incidents highlighted in **Site Fights** stress the importance of developing engaged civil society even in the absence of crisis thereby making communities both less attractive to planners of controversial projects and more effective at resisting future threats      *La Crosse Boiling Water Reactor Project* United States.
