Good Vibrations A History Of Record Production:

Good Vibrations Mark Cunningham,1996 **The Producer as Composer** Virgil Moorefield,2010-02-26 The evolution of the record producer from organizer to auteur from Phil Spector and George Martin to the rise of hip hop and remixing In the 1960s rock and pop music recording questioned the convention that recordings should recreate the illusion of a concert hall setting The Wall of Sound that Phil Spector built behind various artists and the intricate eclecticism of George Martin's recordings of the Beatles did not resemble live performances in the Albert Hall or elsewhere but instead created a new sonic world The role of the record producer writes Virgil Moorefield in *The Producer as Composer* was evolving from that of organizer to auteur band members became actors in what Frank Zappa called a movie for your ears In rock and pop in the absence of a notated score the recorded version of a song created by the producer in collaboration with the musicians became the definitive version Moorefield a musician and producer himself traces this evolution with detailed discussions of works by producers and producer musicians including Spector and Martin Brian Eno Bill Laswell Trent Reznor Quincy Jones and the Chemical Brothers Underlying the transformation Moorefield writes is technological development new techniques tape editing overdubbing compression and in the last ten years inexpensive digital recording equipment that allows artists to become their own producers What began when rock and pop producers reinvented themselves in the 1960s has continued Moorefield describes the importance of disco hip hop remixing and other forms of electronic music production in shaping the sound of contemporary pop He discusses the making of *Pet Sounds* and the production of tracks by Public Enemy with equal discernment drawing on his own years of studio experience Much has been written about rock and pop in the last 35 years but hardly any of it deals with what is actually heard in a given pop song *The Producer as Composer* tries to unravel the mystery of good pop why does it sound the way it does

Transnationalism and Urbanism Stefan Krätke, Kathrin Wildner, Stephan Lanz, 2012 The formation of transnational urban spaces is a relevant and challenging field of interdisciplinary research which deserves much more debate in order to deepen our understanding of generating and restructuring urban spaces under conditions of contemporary globalisation processes This edited collection reflects current studies on the relation of transnationalism and urbanism Scholars from disciplines including Geography Ethnography and Urban Planning discuss theoretical approaches methodology and case studies on processes of the production of urban spaces through global economic value chains socio cultural practices and political governance strategies Cities are appropriate sites for an examination of the spatial dimension of transnationality because this is where global processes are concentrated localized transformed and materialize In this context urban space is not merely to be regarded as a setting for transnational practices but as a constituent force of transnationalism in all its manifestations

Rhymin' and Stealin' Justin A Williams, 2013-07-25 Rhymin and Stealin begins with a crucial premise the fundamental element of hip hop culture and aesthetics is the overt use of preexisting material to new ends Whether it is taking an old dance move for a breakdancing battle using spray paint to create street art quoting from a famous speech or sampling a rapper or 1970s funk song hip hop aesthetics involve borrowing from the past By appropriating and reappropriating these

elements they become transformed into something new something different something hip hop Rhymin and Stealin is the first book length study of musical borrowing in hip hop music which not only includes digital sampling but also demonstrates a wider web of references and quotations within the hip hop world Examples from Nas Jay Z A Tribe Called Quest Eminem and many others show that the transformation of preexisting material is the fundamental element of hip hop aesthetics Although all music genres use and adapt preexisting material in different ways hip hop music celebrates and flaunts its open source culture through highly varied means It is this interest in the web of references borrowed material and digitally sampled sounds that forms the basis of this book sampling and other types of borrowing becomes a framework with which to analyze hip hop music and wider cultural trends Sound Clash Kara Keeling, Josh Kun, 2012-05-07 Race sex and gender

The Music of George Harrison Thomas MacFarlane,2019-04-08 George Harrison was one of the most prolific popular music composers of the late 20th century During his tenure with the Beatles he caught the wave of 1960s pop culture and began channeling its pervasive influence through his music Often described as The Invisible Singer his solo recordings reveal him to be an elusive yet essential element in the Beatles sound The discussion of George Harrison s Beatle tracks featured in the text employs a Songscape approach that blends accessible music analysis with an exploration of the virtual space created on the sound recording This approach is then used to explore Harrison s extensive catalog of solo works which due to their varied cultural sources seem increasingly like early examples of Global Pop In that sense the music of George Harrison may ultimately be viewed as an important locus for pan cultural influence in the 20th century making this book essential reading for those interested in the history of songwriting and recording as well as the cultural study of popular music

The Pleasure of Modernist Music Arved Mark Ashby, 2004 The debate over modernist music has continued for almost a century from Berg's *Wozzeck* and Webern's *Symphony Op. 21* to John Cage's renegotiation of musical control the unusual musical practices of the Velvet Underground and Stanley Kubrick's use of Ligeti's *Lux Aeterna* in the epic film *2001* The composers discussed in these pages including Bartók Stockhausen Bernard Herrmann Steve Reich and many others are modernists in that they are defined by their individualism whether covert or overt and share a basic urge toward redesigning musical discourse The aim of this volume is to negotiate a varied and open middle ground between polemical extremes of reception The contributors sketch out the possible significance of a repertory that in past discussions has been deemed either meaningless or beyond describable meaning With an emphasis on recent aesthetics and contexts including film music sexuality metaphor and ideas of a listening grammar they trace the meanings that such works and composers have held for listeners of different kinds None of them takes up the usual mandate of educated listening to modernist works the notion that a person can appreciate difficult music if given enough time and schooling Instead the book defines novel but meaningful avenues of significance for modernist music avenues beyond those deemed appropriate or acceptable by the academy While some contributors offer new listening strategies most interpret the listening premise more loosely as a metaphor for any manner of personal and immediate connection with music In addition to a previously untranslated article by Pierre Boulez the volume contains articles all but one previously unpublished by twelve distinctive and prominent composers music critics and music theorists from America Europe Australia and South Africa Arved Ashby Amy Bauer William Bolcom Jonathan Bernard Judy Lochhead Fred Maus Andrew Mead Greg Sandow Martin Scherzinger Jeremy Tambling Richard Toop and Lloyd Whitesell Arved Ashby is Associate Professor of Music at the Ohio State University **Continuum Encyclopedia of**
