Tuplin, John Ma, 2020-12-29 During the Second World War the Bodleian Library in Oxford acquired a set of Aramaic letters, eight sealings and the two leather bags in which the sealed letters were once stored The letters concern the affairs of Arama, satrap of Egypt in the later fifth century Taken with other material associated with him, mostly in Aramaic, Demotic, Egyptian and Akkadian, they illuminate the Achaemenid world of which Arama was a privileged member and evoke a wide range of social, economic, cultural, organizational and political perspectives from multilingual communication, storage and disbursement of resources and satrapal remuneration to cross-regional ethnic movement, long-distance travel, religious

practice and iconographic projection of ideological messages Particular highlights include a travel authorization the only example of something implicit in numerous Persepolis documents texts about the religious life of the Judaeon garrison at Elephantine Ar ma s magnificent seal a masterpiece of Achaemenid glyptic inherited from a son of Darius I and echoes of temporary disturbances to Persian management of Egypt But what is also impressive is the underlying sense of systematic coherence founded on and expressed in the use of formal even formalized written communication as a means of control The Ar ma dossier is not alone in evoking that sense but its size variety and focus upon a single individual give it a unique quality Though this material has not been hidden from view it has been insufficiently explored it is the purpose of the three volumes of Ar ma and his World The Bodleian Letters in Context to provide the fullest presentation and historical contextualization of this extraordinary cache yet attempted Volume I presents and translates the letters alongside a detailed line by line commentary while Volume II reconstructs the two seals that made the clay bullae that sealed the letters with special attention to Ar ma s magnificent heirloom seal Volume III comprises a series of thematic essays which further explore the administrative economic military ideological religious and artistic environment to which Ar ma and the letters belonged

Spear-Won Land Andrea M. Berlin, Paul J. Kosmin, 2019-06-25 Sardis in western Turkey was one of the great cities of the Aegean and Near Eastern worlds for almost a millennium, a political keystone with a legendary past. Recent archaeological work has revealed how the city was transformed in the century following Alexander's conquests from a traditional capital to a Greek polis, setting the stage for its blossoming as a Roman urban center. This integrated collection of essays by more than a dozen prominent scholars illuminates a crucial stage from the early fourth century to 189 BCE when it became one of the most important political centers of Asia Minor. The contributors to this volume are members of the Hellenistic Sardis Project, a research collaboration between long-standing expedition members and scholars keenly interested in the site. These new discussions on the pre-Roman history of Sardis restore the city in the scholarship of the Hellenistic East and will be enlightening to scholars of classical archaeology.

Agricultural Sustainability and Environmental Change at Ancient Gordion John M. Marston, 2017-08-21 This book publishes the results of 220 botanical samples from the 1993-2002 Gordion excavations directed by Mary Voigt. Together with Naomi Miller's 2010 volume *Gordion Special Studies 5*, this book completes the publication of botanical samples from Voigt's excavations. The book aims to reconstruct agricultural decision making using archaeological and paleoenvironmental data from Gordion to describe environmental and agricultural changes at the site. John M. Marston argues that different political and economic systems implemented over time at Gordion resulted in patterns of agricultural decision making that were well adapted to the social setting of farmers in each period, but that these practices had divergent environmental impacts, with some regimes sponsoring sustainable agricultural practices and others leading to significant environmental change. The implications of this book are twofold: Gordion will now be one of the best published agricultural datasets from the entire Near East and thus serve as a valuable, comparable dataset for regional synthesis of agricultural and environmental change, and the methods the author developed to reconstruct agricultural change at Gordion serve as tools to engage questions about the relationship between social and environmental change at sites worldwide. Other books address similar themes, but none in the Near East address these themes in diachronic perspective, such as we have at Gordion. University Museum Monograph 145.

Encoding Metalinguistic Awareness E. Cancik-Kirschbaum, J. C. Johnson, 2019-12-31 The Ancient Near East provides

a particularly striking example for the dynamics of knowledge transfer throughout space and time The civilizations that emerged here at the dawn of history attest to continuous processes of exchange adaption and negotiation to the emergence of content and its reconfiguration to diffusion disappearance and resurgence of themes concepts topics and ideas In the late fourth millennium the creation and implementation of supraregional notational systems in southern Mesopotamia triggers a cognitive revolution within a few centuries the use of writing becomes a dominant cultural technique and over the subsequent millennia the technique of wedge writing spreads throughout southwest Asia Numerous indigenous cuneiform subcultures came into being in a wide variety of times and places but these distinct instantiations were held together and preserved the possibility of common legibility through shared practices of teaching and learning a common core of textual materials and not least a systematic instrumentarium for representing speech and notation This repertoire is part of each of these streams of tradition which characterise the cuneiform cultures as a whole In light of the centuries of tradition the great effort that has gone into its construction and maintenance as well as the preservation of original linguistic materials and their translation into more familiar languages the validity of this scientific tradition broadly conceived cannot be disputed Still even if the historical processes of transmission within the cuneiform world and the difficulties of translating cuneiform sources into non cuneiform traditions prevented a general and far reaching mobilisation of the cuneiform sources as vehicles for scientific reflection these same factors also ensured its continued survival in Mesopotamia and Syria for not centuries but rather millennia One of the most important components of this process was the awareness of practitioners about language its role for and its impact on the generation of knowledge and specifically about linguistic patterns Among the literally innumerable textual artefacts from the ancient Near East there are some that both explicitly and implicitly encode traces of this distinctively linguistic awareness It was in pursuit of these traces of meta linguistic awareness that the participants in this volume came together

discovered in this important region **Empire, Authority, and Autonomy in Achaemenid Anatolia** Elspeth R. M. Dusinberre, 2013-04-29 The Achaemenid Persian Empire 550-330 BCE was a vast and complex sociopolitical structure that encompassed much of modern day Turkey, Syria, Jordan, Israel, Egypt, Iraq, Iran, and Afghanistan and included two dozen distinct peoples who spoke different languages, worshipped different deities, lived in different environments, and had widely differing social customs. This book offers a radical new approach to understanding the Achaemenid Persian Empire and imperialism more generally. Through a wide array of textual, visual, and archaeological material, Elspeth R. M. Dusinberre shows how the rulers of the Empire constructed a system flexible enough to provide for the needs of different peoples within the confines of a single imperial authority and highlights the variability in response. This book examines the dynamic tensions between authority and autonomy across the Empire, providing a valuable new way of considering imperial structure and development.

Imperial Matter Lori Khatchadourian, 2016-03-18 A free ebook version of this title is available through Luminos, University of California Press's new open access publishing program. Visit www.luminoso.org to learn more. What is the role of the material world in shaping the tensions and paradoxes of imperial sovereignty? Scholars have long shed light on the complex processes of conquest, extraction, and colonialism under imperial rule. But imperialism has usually been cast as an exclusively human drama, one in which the world of matter does not play an active role. Lori Khatchadourian argues instead that things, from everyday objects to monumental buildings, profoundly shape social and political life under empire. Out of the archaeology of ancient Persia and the South Caucasus, *Imperial Matter* advances powerful new analytical approaches to the study of imperialism. Write large and should be read by scholars working on empire across the humanities and social sciences.

Athenian Potters and Painters III John Oakley, 2014-08-31 *Athenian Potters and Painters III* presents a rich mass of new material on Greek vases, including finds from excavations at the Kerameikos in Athens and Despotiko in the Cyclades. Some contributions focus on painters or workshops, the Robinson Group, and the structure of the figured pottery industry in Athens; others on vase forms, plates, phialai, cups, and the change in shapes at the end of the sixth century BC. Context, trade, kalos inscriptions, reception, the fabrication of inscribed painters' names to create a fictitious biography, and the reconstruction of the contents of an Etruscan tomb are also explored. The iconography and iconology of various types of figured scenes on Attic pottery serve as the subject of a wide range of papers: chariots, dogs, baskets, heads, departures, an Amazonomachy, Menelaos and Helen, red-figure komasts, symposia, and scenes of pursuit. Among the special vases presented are a black-spotlight stamnos and a column krater by the Suessula Painter. *Athenian Potters and Painters III*, the proceedings of an international conference held at the College of William and Mary in Virginia in 2012, will like the previous two volumes become a standard reference work in the study of Greek pottery.
