The Victory Banner Over the Reichstag Jeremy Hicks, 2020-12-15 In one of the most iconic images from World War II a Russian soldier raises a red flag atop the ruins of the German Reichstag on April 30 1945 Known as the Victory Banner this piece of fabric has come to symbolize Russian triumph glory and patriotism Facsimiles are used in public celebrations all over the country and an exact replica is the centerpiece in the annual Victory Parade in Moscow s Red Square The Victory Banner Over the Reichstag examines how and why this symbol was created the changing media of its expression and the contested evolution of its message From association with Stalinism and communism to its acquisition of Russian nationalist meaning Jeremy Hicks demonstrates how this symbol was used to construct a collective Russian memory of the war He traces how the Soviets and then Vladimir Putin have used this image and the banner itself to build a remarkably powerful mythology of Russian greatness

Langston,2002 The Tchaikovsky Handbook is a comprehensive guide to all known Tchaikovsky resource materials to every composition with incipits all the writings every piece of correspondence all the diaries every interview every photograph with images included here and everything written about Tchaikovsky and even more In addition to the basic bibliographical data the catalog of works gives information on the circumstances surrounding their composition and their earliest performances arrangements for other instruments locations of manuscripts and any peculiarities that they exhibit publication history and any related works for example other works in which Tchaikovsky used the same melodic material A tremendous bibliographical undertaking the Handbook raises the bar for Tchaikovsky scholarship Volume 1 includes a chronology of the composer s life a catalog of all the compositions writings interviews and photographs a translation of his brief 1889 autobiography and listings of the works by opus number in chronological order and by titles and variant titles A general index completes the volume Strategic Review ,1988 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States **Red Air** Sanu

Kainikara,2007-10 The Russian Air Force carries the mantle of the erstwhile Red Air Force of the Soviet Union and has a long and illustrious history backed by grand traditions and customs The Russian Air Force is still coming to grips with its changed circumstances after the collapse of the Soviet Union and is perhaps in the best shape of the three armed forces to be able to lend credence to the Russian Federation s claim to international influence and power projection capabilities Doctrine is the reflection of a nation s character and air power doctrine is influenced by the strategic culture of a nation Nowhere else is this more apparent than in the case of the Russian Air Force The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives political ideology and the development of military doctrine Back cover **Monthly List of Russian Accessions** ,1955 **Monthly Index of Russian Accessions** Library of Congress. Processing Department,1964 **Annotated Bibliography of Bratsk and Krasnoirsksk Hydroelectric Projects in Central Siberia, USSR.** ,1966 This annotated bibliography contains 352 references to books monographs pamphlets and articles largely from Soviet sources on these 2 Siberian multiple purpose projects being completed by Soviet constructors The scope of the projects size of the equipment being installed and construction problems faced in an undeveloped taiga region with a severe climate make these projects of interest to American engineers The USSR is understandably proud of its accomplishments and much has been written describing them Soviet engineers have reported in detail the experience gained from the design construction and research problems and solutions as a basis for future construction of similar projects in Siberia No effort has been made to evaluate
