The World We Have Lost Peter Laslett, 2021-05-16 What was life like in England before the Industrial Revolution The World We Have Lost is widely regarded as a classic of historical writing and a vital book in reshaping our understanding of the past and the structure of family life in England Turning away from the prevailing fixation of history on a grand scale Laslett instead asks some simple yet fundamental questions about England before the Industrial Revolution How long did people live How did they treat their children Did they get enough to eat What were the levels of literacy His findings overturned much received wisdom girls did not generally marry in their

early teens but often worked before marrying at much the same ages that young people marry today Most people did not live in extended families or even live their whole lives in the same villages Going beyond the immediate structure of the family he also explores the position of servants the gentry rates of migration work and social mobility Laslett's classic work was crucial in causing an important sociological turn in early modern English history and remains as fresh and exhilarating today as upon its first publication This Routledge Classics edition includes a new Foreword by Kevin Scherer Rural Europe Keith Hoggart, Richard Black, Henry Buller, 2014-02-25 Examines the interaction of the economic political and social change processes within Europe which are bringing about fundamental transformations in rural areas The authors expand on this view of rural Europe and place its significance within the broader field of rural studies *Working-Class Images of Society (Routledge Revivals)* Martin Bulmer, 2016-04-06 First published in 1975 How do men come to perceive and evaluate a world in which marked inequalities of class and status exist This book considers the nature of class images and their underlying work and community structures Beginning with the argument that the perception of society varies according to type of work and community milieu it first considers the social imagery of working class professions and their sources of variation and then examines some of the methodological problems of the study of class imagery The nature of proletarian traditionalism and radicalism in then contemporary Britain is discussed in conclusion This title will be of interest to students of sociology
