Ecology Crisis And New Vision:

Ecology: Crisis and New Vision Richard E. Sherrell, 1971 **The Rights of Nature** Roderick Frazier Nash, 1989-01-17
Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader *Ecology, Ethics, and the Future of Humanity* Adam Riggio, 2015-08-18 A book that combines moral and political philosophy with traditions of activism and literature in a background of scientific knowledge and interpretation to build a comprehensive picture of an ecological humanity **Christianity and Ecological Theology** E. M. Conradie, 2006-10-01
There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa *Ecology and Experience* Richard J. Borden, 2014-04-15 A philosophical and narrative memoir Ecology and Experience is a thoughtful engaging recounting of author Richard J Borden s life entwined in an overview of the intellectual and institutional history of human ecology a story of life wrapped in a life story Borden shows that attempts to bridge the mental and environmental arenas are uncertain but that rigid conventions and narrow views have their dangers too Human experience and the natural world exist on many levels and gathering from both realms gives rise to novel constellations In a blend of themes and approaches based on a lifetime of interdisciplinary inquiry the author wanders these intersections and invites us to exercise our capacities for ecological insight to deepen the experience of being alive and most of all to more fully enrich our lives Contents Foreword by Darron Collins president of the College of the Atlantic Preface Part I Transects and Plots 1 The Arc of Life 2 Ecology 3 Experience 4 Human Ecology 5 Education Part II Facets of Life 6 Time and Space 7 Death in Life 8 Personal Ecology 9 Context 10 Metaphor and Meaning Part III Wider Points of View 11 Kinds of Minds 12 Insight 13 Imagination 14 Keyholes 15 Ecology and Identity 16 The Unfinished Course Part IV Coda *Ecotheology and the Practice of Hope* Anne Marie Dalton, Henry C. Simmons, 2010-09-29 Is there any hope for a more sustainable world Can we reimagine a way of living in which the nonhuman world matters Anne Marie Dalton and Henry C Simmons claim that the ecotheology that arose during the mid twentieth century gives us reason for hope While ecotheologians acknowledge that Christianity played a significant role in

creating societies in which the nonhuman world counted for very little these thinkers have refocused religion to include the natural world To borrow philosopher Charles Taylor s concept they have created a new social imaginary reimagining a better world and a different sense of what is and what should be A new mindset is emerging inspired by ecotheological texts and evident in the many diverse movements and activities that operate as if the hope imparted by ecotheology has already been realized While making this powerful argument Dalton and Simmons also provide an essential overview of key ecotheological thinkers and texts

Nested Ecology Edward T. Wimberley, 2009-05-29 Nested Ecology provides a pragmatic and functional approach to realizing a sustainable environmental ethic Edward T Wimberley asserts that a practical ecological ethic must focus on human decision making within the context of larger social and environmental

systems Think of a set of mixing bowls in which smaller bowls sit within larger ones Wimberley sees the world in much the same way with personal ecologies embedded in social ecologies that in turn are nested within natural ecologies Wimberley urges a complete reconceptualization of the human place in the ecological hierarchy Going beyond the physical realms in which people live and interact he extends the concept of ecology to spirituality and the ecology of the unknown In doing so Wimberley defines a new environmental philosophy and a new ecological ethic Environmental Ethics and International Policy H. ten Have,2006-01-01 This publication a joint initiative of the World Commission on the Ethics of Scientific Knowledge and Technology COMEST and the UNESCO Division of Ethics of Science and Technology contains essays written by eight leading international experts in this relatively new inter disciplinary area of applied ethics These papers consider the moral dimensions of environmental management issues and explores proposals for effective international policy making to promote environmental objectives The Environmental Crisis and Art Eva Maria Räßle,2019-02-12 Climate change is a defining issue of our time for which the immediate as well as potential future scope causes enormous impediments to human understanding and comprehension It is argued here that humans ought to make wise use of their capacity of thinking language and communication in working on the task of responsible action Required is nothing less than moving out of thoughtlessness an unresponsiveness and ignorance in particular towards certain environmental problems As human beings we are a species on this planet that is uniquely capable to think and foresee potential consequences and hold power to induce change on our actions It is up to human beings to confront challenges such as climate change to consider what has been critically assessed in thought and reflect on potential responses Crucial in this dialog is the ability to take the standpoint of the other including that of species as well as ecosystems in human imagination It also means to develop a sensibility for the other in making sense of the world that today is largely shaped by humans Throughout history narratives stories images artistic expressions have all played a key role for imaginative ventures that allow the mind to imagine the past present and the future Language and communication can serve comprehension of an issue like climate change and provide a path in developing responsible responses to abstract problems of complex global future dimensions **Human Behavior and the Social Environment, Macro Level** Katherine S.
