African Economic Reform Carol Lancaster, 1991 This study proposes a new initiative involving the cancellation of concessional rescheduling of public bilateral debt of reforming African countries through a new international mechanism that would replace existing ones such as the Paris Club and the World Bank Consultative Groups Each of a series of Adjustment Review Consortia would bring together representatives of donor and creditor governments international aid and development agencies and an African government to coordinate debt relief aid and reform initiatives Properly implements ARCs would contribute to building a system in which economic need and performance not political favoritism play the principal roles in how debt and external financing in general are managed

The Impact of Economic Reforms on Rural Households in Ethiopia Stefan Dercon, 2002-01-01 But the experience of the poor is mixed with some outperforming all other households and others persisting in poverty Although economic reforms do not deliver similar benefits to all the poor there are high costs for withholding reforms The study also highlights the effects of shocks on households and the need for social protection measures in a poverty reduction strategy

Gyimah-Boadi, 2005 This book is a groundbreaking exploration of public opinion in sub Saharan Africa Based on the Afrobarometer a survey research project it reveals what ordinary Africans think about democracy and market reforms subjects on which almost nothing is otherwise known The authors find that support for democracy in Africa is wide but shallow and that Africans feel trapped between state and market While Africans are learning about reform on the basis of knowledge reasoning and experience few countries are likely to attain full fledged democracies and markets anytime soon

Economic Reforms and the Poor Alexandre Marc, Carol Graham, Mark Schacter, 2012 For many African countries and for developing countries in other regions the latter half of the 1980s was a turning point in the struggle to alleviate poverty In response to a marked deterioration in the living standards of the poor caused by an economic crisis and the austerity measures instituted to control it governments added explicit poverty alleviation objectives to their development policies In cooperation with external agencies they began to design and implement interventions such as social action programs SAPs and social funds SFs to protect the poor and some vulnerable groups from the harmful effects of the economic situation and from the transitory negative effects of economic reform There has been a growing acceptance of these interventions in Africa as the World Bank has placed greater emphasis on protecting the poor during adjustment The present study previewed in this brief reviews the experience of twelve SAPs and SFs in sub Saharan Africa Because a number of the programs are still in progress at this writing it is too soon to analyze

their effects on poverty reduction in depth However performance information is increasingly available on the implementation of these programs This report is based on data gathered from project documents and task managers of the projects and on findings by the authors during field visits

Growth, Inequality, and Poverty Anthony Shorrocks, Rolph van der Hoeven, 2004-03-04 The relationship between growth inequality and poverty lies at the heart of development economics This volume draws together many of the most important recent contributions to the controversies surrounding this topic Some of the chapters help explain why there is profound disagreement on crucial issues of growth poverty and inequality within academic circles and among organizations and various groups active in the development field Another central theme is the cross country evidence on the relationship between growth and poverty and the extent to which it is valid to draw policy conclusions from this empirical evidence The volume also shows how new microeconomic techniques such as poverty maps and microsimulation models can be used to improve poverty analysis and the design of pro poor policies The overall conclusion points to the need for diverse strategies towards growth and poverty rather than simple blanket policy rules Initial conditions specific country structures and time horizons all play a significant role Initial conditions affect the speed with which growth reduces poverty and can also determine whether policies such as trade liberalization have a pro poor or an anti poor outcome Improved education is valuable in itself and also contributes to poverty reduction but its effect on inequality depends on supply and demand factors which differ significantly across countries Likewise the quantitative impact on poverty of redistribution from the rich to the poor vis vis an increase in total national income can vary greatly across countries Hence the need for creative approaches to poverty which take full account

of the specific circumstances of individual nations and which assign a central role to inequality analysis in the discussion of poverty alleviation policies
