Household Savings in Selected Southern European Countries

Evidence from Cross-Country Micro-Level Data Mr. Kamil Dybczak,Shiqing Hua,Mariusz Jarmuzek,Ruifeng Zhang,Yipei Zhang,2023-07-21

The paper looks into the puzzle of low household savings in three Southern European SE3 countries Cyprus Greece and Portugal Building on the household saving drivers literature we employ cross country micro level data and investigate the key saving patterns examining their heterogeneity across households in SE3 countries relative to the EA average The results confirm the prominent role of income along with interest rate inflation fiscal balance and debt in shaping household savings in SE3 countries Quantile regressions employed to analyze saving behavior across the distribution of households suggest that households with lower savings tend to see their savings dip or dissavings rise more than proportionately with shocks to income interest rate inflation and government balance Our policy simulations across the distribution of households suggest that targeted rather than universal policy intervention could improve household savings especially of the most vulnerable ones

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille,2014-08-27

The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter s aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe s peripheral countries Through a systematic analysis of Ireland s main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis
