

The background of the image features a stack of several old, heavily worn coins. The coins are dark and show significant signs of age, including rust and discoloration. They are resting on a piece of aged, yellowed paper that has handwritten text in a cursive script. To the right of the coins, there is a printed emblem or seal, partially visible, which includes the word "SOLD" in a bold, serif font. The overall composition suggests a theme of history, finance, and the passage of time.

Fundamentals of Economic History Ayodeji Olukoju,Adebayo Lawal,E. K. Faluyi,2003

Economics and World History Paul Bairoch, 1995-09 Paul Bairoch deflates twenty commonly held myths about economic history Among these myths are that free trade and population growth have historically led to periods of economic growth and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the Third World Bairoch shows that these beliefs are based on insufficient knowledge and wrong interpretations of the history of economies of the United States Europe and the Third World and he re-examines the facts to set the record straight Bairoch argues that until the early 1960s the history of international trade of the developed countries was almost entirely one of protectionism rather than a Golden Era of free trade and he reveals that in fact past periods of economic growth in the Western World correlated strongly with protectionist policy He also demonstrates that developed countries did not exploit the Third World for raw materials during the nineteenth and early twentieth centuries as some economists and many politicians have held Among the many other myths that Bairoch debunks are beliefs about whether colonization triggered the Industrial Revolution the effects of the economic development of the West on the Third World and beliefs about the 1929 crash and the Great Depression Bairoch's lucid prose makes the book equally accessible to economists of every stripe as well as to historians political scientists and other social scientists

Humanism Challenges Materialism in Economics and Economic History Roderick Floud, Santhi Hejeebu, David Mitch, 2017-01-23 Most of the existing research on economic history relies either solely or ultimately on calculations of material interest to explain the major events of the modern world However care must be taken not to rely too heavily on materialism with its associated confidence in perfectly rational actors that simply do not exist What is needed for a more cogent understanding of the long history of capitalist growth is a more realistic human-centered approach that can take account of the role of nonmaterial values and beliefs an approach convincingly articulated by Deirdre McCloskey in her landmark trilogy of books on the moral and ethical basis of modern economic life With *Humanism Challenges Materialism in Economics and Economic History* Roderick Floud Santhi Hejeebu and David Mitch have brought together a distinguished group of scholars in economics economic history political science philosophy gender studies and communications who synthesize and build on McCloskey's work The essays in this volume illustrate the ways in which the humanistic approach to economics that McCloskey pioneered can open up new vistas for the study of economic history and cultivate rich synergies with a wide range of disciplines The contributors show how values and beliefs become embedded in the language of economics and shape economic outcomes Chapters on methodology are accompanied by case studies discussing particular episodes in economic history
