*Advancing inclusive education for students with special educational needs: Rethinking policy and practice* Stephen Hay, Wendi Beamish, Dianne Chambers, 2025-05-13 This year marks the 30th anniversary of the Salamanca Declaration UNESCO 1994 which began the global movement towards inclusive education for students with special educational needs SEN Inclusive education for this student group represents a paradigm shift in providing quality education for all students Around the globe this universal ideal has progressed a strengths based approach to student learning and encouraged mixed ability classrooms Notwithstanding this milestone recent studies have highlighted persistent disparities in the formulation and implementation of inclusion policies inadequacies in teacher preparation and imbalances in access to resources Factors such as these continue to pose challenges in achieving truly inclusive education for students with SEN Given this context it is both timely and essential to undertake a critical reassessment of the inclusive education agenda for this student group While policy frameworks may emphasize inclusion their real world translation often falls short leading to gaps between intention and realization Moreover the limited enactment of evidence based practices at school and classroom levels continue to impede student engagement and learning

Furthermore there is a need to consider how inclusive education interfaces with the broader concepts of diversity equity and individualized learning The goal of this Research Topic is to explore these complex issues identify underlying barriers and promote strategies that can genuinely move inclusive education forward for students with SEN Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community
