The Economics of International Ocean Transport Claudio Escarpenter, Claudio Escarpenter y Fargas, Fargas, 1965

The Economics of International Ocean Transport Claudio Escarpenter y Fargas, 1965 **International Maritime**

Transport Costs Gordon Wilmsmeier, 2016-04-22 Based on in depth empirical research this book develops our understanding of maritime transport costs the maritime industry and the competitiveness of regions in a global market environment through a geographical lens Further the book uses a unique set of data that gives an extensive insight into Latin American international maritime transport costs and its determinants This is a clear call for policy makers and port authorities to strengthen transnational cooperation in order to improve the development of the whole system of maritime transport focusing on the causes that put regions at risk of becoming peripheral and uncompetitive *The International Ocean Transport Industry in Crisis* Hans Jürgen Peters, 1993 The world's ocean transport industry faces an unprecedented crisis Fundamental changes in the seatriade markets and considerable discrepancies between tonnage supply and the demand for transport are the key reasons The international fleet has become critically overaged and suffers from a deteriorating safety record Serious retrenching and sharp long term planning are needed but hampered by reduced freight earnings rising insurance costs and a shortage of investment capital International Ocean Shipping Bernhard J. Abrahamsson, 2019-03-13 Intended as a basic text on ocean shipping this book provides a basis for understanding how the industry functions and the problems and issues that arise because of its international character Dr Abrahamsson makes no attempt to judge the relative merits of various developments arguments or positions rather he explains concepts and principles **International Transportation: Moving the Global Economy Forward** , Economics of Maritime Business Shuo Ma, 2020-06-02 This book provides a comprehensive introduction to the economics of the business of maritime transport It provides an economic explanation of four aspects of maritime transport namely the demand the supply the market and the strategy The book first explains why seaborne trade happens and what its development trends are it then analyses the main features of shipping supply and how various shipping markets function the book finally addresses the critical strategic issues of the shipping business The full range of different types of shipping are covered throughout the chapters and cases The book combines the basic principles of maritime transport with the modern shipping business and the latest technological developments particularly in the area of digital disruption The ideas and explanations are supported and evidenced by practical examples and more than 160 tables and figures The questions posed by the book are similar to those that would be asked by the students in their learning process or the professionals in the business environment with the answers concentrating on the reasons for what has happened and will happen in the future rather than merely fact telling or any specific forecast The book is most suited for students of shipping related disciplines and is also a valuable reference for maritime professionals The Economics of Transport Jonathan Cowie, 2009-10-16 This book provides an explanation of key

underlying economic principles enabling the reader to better understand the critical factors that structure and guide transport markets *Protectionism and the Future of International Shipping* Ademuni-Odeke,2024-08-26 **The History and Economics of Transport** Adam Willis Kirkaldy,Alfred Dudley Evans,1927 Transportation Policy and Economic Regulation John Bitzan,James H Peoples,2018-04-14

Handbook of International Trade and Transportation Bruce A. Blonigen,Wesley W.
