Perloff, Lowdon Wingo Jr., 2013-10-18 Classic economic considerations applied to the crucial urban problems of poverty racial segregation urban renewal transportation and education Originally published in 1968 The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it

has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities. The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government **SOCIAL AND ECONOMIC DEVELOPMENT - Volume** IV Salustiano del Campo ,Tomoko Hamada ,Giancarlo Barbiroli,Saskia Sassen, Eleonora Barbieri-Masini, Paul Nchoji Nkwi, Owen Sichone, Abubakar Momoh, 2010-11-15 Social and Economic Development is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Social and Economic Development provides the essential aspects and a myriad of issues of great relevance to our world such as Socioeconomic Developmental Social Work Perspectives on Contemporary Socioeconomic Development Sustainable Development of Natural Resource Capital Sustainable Development Of Human Resource Capital Intellectual And Knowledge Capital For Sustainable Development At Local National Regional And Global Levels Economic And Financial System Development Information And Knowledge Institutional And Infrastructure System Development Information And Knowledge Basic Principles Of Sustainable Development Environmental Economics And Sustainable Development Implementing Sustainable Development In A Changing World Economic Sociology Its History And Development The Socioeconomics Of Agriculture Agricultural And Rural Geography Impact Of Global Change On Agriculture Human Nutrition An Overview The Role Of Inter And Nongovernmental Organizations Nongovernmental Organizations Social And Cultural Development Of Human Resources This 8 volume set contains several chapters each of size 5000 30000 words with perspectives issues on social and Economic Development These volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs Social and Economic Development is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an

Hartwick, 2015-04-17 This textbook offers a rigorous calculus based presentation of the complexities of urban economics which is suitable for students who are new to the subject It focuses on structural details and explains the elements that make cities such highly productive entities and also explores explores the mechanisms of labour productivity enhancement that are unique to cities Written with a focus on location theory key topics include How cities are arranged Housing prices Urban transportation Why some cities grow rapidly whilst others decline How wages adjust to local costs of living How suburbs function in relationship to the urban core Public finance This book will be essential reading for Urban Economics courses at both undergraduate and postgraduate level **Urbanization and Socio-Economic Development in Africa** Steve Kayizzi-Mugerwa, Abebe Shimeles, Nadège Désirée Yaméogo, 2014-05-16 The main goal of this book is to put urbanization and its challenges squarely on Africa s development agenda Planned urbanization can improve living conditions for the majority help in the expansion of the middle class and create conditions for economic transformation However many African cities have developed haphazardly resulting in the decline of public services in slum proliferation and increases in poverty African cities thrive on activities characterized by easy entry and low productivity generally referred to as the informal sector Indeed today some urban dwellers are poorer than their cousins in the countryside In spite of reform attempts many governments have not been able to create an enabling environment with adequate infrastructure and institutions to sustain markets for easy exchange and production This study argues that with careful policies and planning the situation can be changed If the recent natural resource led economic boom that we have seen in many African countries is used for structural reforms and urban renewal African cities could become centers of economic opportunity. The challenge for African policymakers is to

ensure that urban development is orderly and that the process is inclusive and emphasizes the protection of the environment hence green growth Inner City Regeneration Robert K. Home, 2013-10-16 This book covers all the main aspects of government policy and practice in British inner city regeneration Chapters deal with the development of policy agencies for regeneration housing social issues The UK edxperience is compared with that of other countries particularly the USA and past achievements and future prospects are considered This book was first published in 1982 OECD Territorial Reviews: Puebla-Tlaxcala, Mexico 2013 OECD, 2013-10-21 A comprehensive economic review of the Puebla Tlaxcala region of Mexico The review examines the region s challenges and assets and makes a series of policy recommendations Economics and Real Estate John F. McDonald, Daniel P. McMillen, 2010-03-29 This Second Edition arms real estate professionals with a comprehensive approach to the economic factors that both define and affect modern urban areas The text considers the economics of cities as a whole instead of separating them Emphasis is placed on economic theory and empirical studies that are based in economic theory. The book also explores the policy lessons that can be drawn from the use of economics to understand urban areas Real estate professionals will find new coverage of urban areas around the world to provide a global perspective The Challenges Facing European Society with the Approach of the Year 2000 European Conference of Ministers Responsible for Regional Planning, Council of Europe, 1994-01-01 **International Handbook of Urban Policy** H. S. Geyer, 2009-01-01 No further information has been provided for this title **Economic Geography of Tourism** João Romão, 2025-05-13 This book provides an in depth exploration of the dynamic intersections between economic geography and tourism highlighting how spatial economic and social processes shape tourism development and how tourism in turn transforms economic spaces Combining theoretical insights with real world case studies it offers a comprehensive understanding of tourism's evolving role within economic geography. The first part lays a strong theoretical foundation introducing key concepts such as the Tourism Area Life Cycle path dependence agglomeration economies smart specialization and regional resilience within the context of tourism research It explores spatial and temporal patterns in tourism development the growing influence of digitalization and smart tourism and the roles of innovation and competitiveness in shaping destination dynamics The second part shifts focus to tourism s broader economic and social implications It critically assesses urban tourism's links to gentrification circular economies and social conflicts while exploring strategies to address spatial enclaves and foster integrated tourism networks in low density and fragile regions Environmental challenges including the impact of tourism mobility on local communities and ecosystems are also examined The book concludes by addressing the tensions and future trajectories of tourism development questioning whether sustainable or regenerative tourism can thrive within market driven economies where decision making prioritizes individual preferences over collective well being It calls for a reassessment of contemporary policy and regulatory frameworks to align tourism with broader economic and environmental goals By bridging economic geography and tourism studies this book

equips scholars policymakers and practitioners with analytical tools to rethink tourism development and advocate for strategies that are economically viable and effectively sustainable inclusive and resilient **Urban China Reframed** Wing-Shing Tang, Kam Wing Chan, 2021-06-21 Given China's rapid economic growth and massive urbanization no one in the world can ignore what is happening in urban China This book is a critical review of existing urban China research which is found wanting due to the decontextualized use of theories and concepts developed in the West Urban China Reframed A Critical Appreciation consists of epistemological theoretical and methodological contributions to remedy these limitations by focusing on a number of relevant topics First models are widely employed in any study and China nowadays has invoked models like city system zones and global city in socio economic development How to interpret them in terms of knowledge production in a strong party state Second given the global prevalence of neoliberalism it is an important debate whether neoliberalism is applicable to China Third what is urban ideology in China How to contextualize it Are debates about the differentiation between the city and urbanization relevant to China Fourth massive rural urban migration in China has taken place within its mega rural urban dual system an institution that has persisted since the 1950s How does it manifest nowadays Fifth has the town country divide in China like in the West disappeared If not how can one interpret China's town country relations within the politics and administration of the Chinese state Sixth how to decipher the territorial development in the Pearl River Delta the world's factory under the auspices of the state The collection of essays in this volume contributes to the theoretical understanding of urban China The chapters in this book were originally published in the Eurasian Geography and Economics
