Economics And Mental Health:

Economics and Mental Health Thomas G. McGuire, 1999 This paper is concerned with the economics of mental health We argue that mental health economics is like health economics only more so uncertainty and variation in treatments are greater the assumption of patient self interested behavior is more dubious response to financial incentives such as insurance is exacerbated the social consequences and external costs of illness are formidable We elaborate on these statements and consider their implications throughout the chapter Special characteristics of mental illness and persons with mental illness are identified and related to observations on institutions paying for and providing mental health services We show that adverse selection and moral hazard appear to hit mental health markets with special force We discuss the emergence of new institutions within managed care that address long standing problems in the sector Finally we trace the shifting role of government in this sector of the health economy
