Schreiber,Paul K. Gatons,1971      Urban Problems in Western Europe

Paul C. Cheshire, Dennis G. Hay, 2017-10-12 This major study first published in 1989 examines Western Europe's urban problems in unprecedented breadth and depth. It is a synthesis of research which had three main aims: to establish an informed view of the state of urban Europe in the most systematic and consistent way possible; to investigate and document and analyse the various causes of urban problems; and to analyse general trends and similarities as well as discovering what was local and particular. This book should prove invaluable to students, researchers and professionals concerned with urban affairs, whether they be geographers, planners, economists or policy makers. Economics and Urban Problems Richard Netzer, 1970 *Economic Principles and Urban Problems* Robert L. Bish, Robert J. Kirk, 2000 **Urban Problems (Routledge Revivals)** Michael Pacione, 2014-06-03 Urban problems and their resolution represent one of the major challenges for planners and decision makers in the modern world. This book, first published in 1990, makes a major contribution to the field, presenting an international and interdisciplinary approach to the challenges presented by the urban environment. The coverage is comprehensive, ranging from the economic and political dimensions of the capitalist system to the issues of poverty and deprivation and questions about housing equity. This is an essential reference guide to social, economic and environmental problems in urban areas, which is of great value to students of planning, urban studies, geography and sociology. *The New Urban Economics* H.W. Richardson, 2013-04-15 This book was first published in 1977. Urban economics is a relatively young field of economics, hardly existing except perhaps in real estate and land economics curricula before the 1960s. Within the last few years, especially after 1971, there has been a growth of interest in urban economic theory strong enough even to attract the attention of general economic theorists. These new theoretical writings have been named the New Urban Economics (NUE) for short. The aim of this monograph is to survey and assess NUE, to evaluate its contribution to urban economics, to offer a few extensions and to say something about the future direction of the subfield. **Reconstructing Urban Economics** Franklin Obeng-Odoom, 2016-08-15 Neoclassical economics, the intellectual bedrock of modern capitalism, faces growing criticisms as many of its key assumptions and policy prescriptions are systematically challenged. Yet there remains one field of economics where these limitations continue virtually unchallenged: the study of cities and regions in the built environment, economics. In this book, Franklin Obeng-Odoom draws on institutional, Georgist and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about urban economics. In doing so, he demonstrates the widespread tensions and contradictions in the status quo, showing how to reconstruct urban economics in order to create a more just society and environment.
