Boles, 2008-10-01 Many of the problems afflicting American education are the result of a critical shortage of qualified teachers in the classrooms The teacher crisis is surprisingly resistant to current reforms and is getting worse This important book reveals the causes underlying the crisis and offers concrete affordable proposals for effective reform Vivian Troen and Katherine Boles two experienced classroom teachers and education consultants argue that because teachers are recruited from a pool of underqualified candidates given inadequate preparation and dropped into a culture of isolation without mentoring support or incentives for excellence they are programmed to fail Half quit within their first five years Troen and Boles offer an alternative a model of reform they call the Millennium School which changes the way teachers work and improves the quality of their teaching When teaching becomes a real profession they contend more academically able people will be drawn into it colleges will be forced to improve the quality of their education and better prepared teachers will enter the classroom and improve the profession      Promoting and Sustaining a Quality Teacher Workforce Alexander W. **The Breakdown of Higher Education** John M. Ellis,2021-08-10 A series of near riots on campuses aimed at silencing guest speakers has exposed the fact that our universities are no longer devoted to the free exchange of ideas in pursuit of truth But this hostility to free speech is only a symptom of a deeper problem writes John Ellis Having watched the deterioration of academia up close for the past fifty years Ellis locates the core of the problem in a change in the composition of the faculty during this time from mildly left leaning to almost exclusively leftist He explains how astonishing historical luck led to the success of a plan first devised by a small group of activists to use college campuses to promote radical politics and why laws and regulations designed to prevent the politicizing of higher education proved insufficient Ellis shows that political motivation is always destructive of higher learning Even science and technology departments are not immune The corruption of universities by radical politics also does wider damage to primary and secondary education to race relations to preparation for the workplace and to the political and social fabric of the nation

Commonly suggested remedies new free speech rules or enforced right of center appointments will fail because they don't touch the core problem a controlling faculty majority of political activists with no real interest in scholarship This book proposes more drastic and effective reform measures The first step is for Americans to recognize that vast sums of public money intended for education are being diverted to a political agenda and to demand that this fraud be stopped

**Controversial Therapies for Developmental Disabilities** John W. Jacobson, Richard M. Foxx, James A. Mulick, 2005-01-15 One of the largest and most complex human services systems in Western nations has evolved to address the needs of people with developmental disabilities In the U S for example school budgets are stretched thin by legally mandated special education and billions of Medicaid dollars annually are consumed by residential and professional services to this population The temptation of a quick fix is strong Many parents desperately seek the latest ideas and place pressure on program administrators who often are not trained to think critically about the evidence base for intervention efforts The problems of people with developmental disabilities have historically been targeted by a wide range of professionals who rely on clinical experience and intuition and do not submit their claims to the tests of scientific research Professional entrepreneurs have energetically promoted their treatments to a public perhaps too trustful of those with credentials Thus families and their children are buffeted by reforms founded on belief and ideologically driven management Services fluctuate with the currents of social movements and rapidly shifting philosophies of care as policymakers and providers strive for increased responsiveness and individualization These forces affect not only where and how but how well people are served Too often services are less effective than they could be or worse damaging to personal growth and quality of life Many treatments are based on poorly understood or even disproven approaches What approaches to early intervention education therapy and remediation really help those with mental retardation and developmental disabilities improve their functioning and adaptation And what approaches represent wastes of time effort and resources This book brings together leading behavioral scientists and practitioners to focus light on the major controversies surrounding these questions The authors review the origins perpetuation and resistance to scrutiny of questionable practices and offer a clear rationale for appraising the quality of services In an era of increasing accountability no one with a professional stake in services to individuals with mental retardation and developmental disabilities can afford not to read this book

*The Schools We Need* E.D. Hirsch, Jr., 2010-02-17 This paperback edition with a new introduction offers a powerful compelling and unassailable argument for reforming America's schooling methods and ideas by one of America's most important educators and author of the bestselling Cultural Literacy For over fifty years American schools have operated under the assumption that challenging children academically is unnatural for them that teachers do not need

to know the subjects they teach that the learning process should be emphasized over the facts taught All of this is tragically wrong Renowned educator and author E D Hirsch Jr argues that by disdaining content based curricula while favoring abstract and discredited theories of how a child learns the ideas uniformly taught by our schools have done terrible harm to America s students Instead of preparing our children for the highly competitive information based economy in which we now live our schools practices have severely curtailed their ability and desire to learn With an introduction that surveys developments in education since the hardcover edition was published *The Schools We Need* is a passionate and thoughtful book that will appeal to the millions of people who can t understand why America s schools aren t educating our children

**Teacher Education Policy and Practice** Joce Nuttall,Alex Kostogriz,Mellita Jones,Jenny Martin,2017-05-08 This volume addresses both evidence of impact and impact of evidence to reveal the complex dialogue between the enterprise of teacher education and evidence of its effects in the early 21st century taking a critical position on the very notions of evidence and impact that underpin contemporary policy frameworks Teacher education programs in Australia and internationally are challenged by contemporary policy frameworks to demonstrate evidence of the impact they have on the capacity of graduating teachers to act with confidence and competence in school and early childhood education classrooms At the same time the field of teacher education is increasingly working to build a robust platform of research evidence that speaks to these policy frameworks and to broader issues concerning the role of teaching and teacher education in society *Culture Wars* Roger Chapman,2015-03-17 The term culture wars refers to the political and sociological polarisation that has characterised American society the past several decades This new edition provides an enlightening and comprehensive A to Z ready reference now with supporting primary documents on major topics of contemporary importance for students teachers and the general reader It aims to promote understanding and clarification on pertinent topics that too often are not adequately explained or discussed in a balanced context With approximately 640 entries plus more than 120 primary documents supporting both sides of key issues this is a unique and defining work indispensable to informed discussions of the most timely and critical issues facing America today *Schools and Societies* Steven Brint,1998-01-14 For use as the core text for Sociology of Education courses offered in Sociology Departments and Social Foundations of Education courses offered in Schools of Education *Schools and Societies* is a gem of volume that combines in one comprehensive text superb theoretical acuity and scholarly judgment a keen sense of the connection of research to policy and a breadth of coverage that reflects the multidimensionality of education as an institution in a manner rare in social scientific treatments of education It deserves to be the leading survey of this field for a long time to come Paul DiMaggio Princeton University **Our Underachieving Colleges** Derek Bok,2009-02-28 Drawing on a large body of empirical evidence former Harvard President Derek Bok examines how much progress college students actually make toward widely accepted goals of undergraduate education His conclusions are sobering Although most students make gains in many important respects they improve much

less than they should in such important areas as writing critical thinking quantitative skills and moral reasoning Large majorities of college seniors do not feel that they have made substantial progress in speaking a foreign language acquiring cultural and aesthetic interests or learning what they need to know to become active and informed citizens Overall despite their vastly increased resources more powerful technology and hundreds of new courses colleges cannot be confident that students are learning more than they did fifty years ago Looking further Bok finds that many important college courses are left to the least experienced teachers and that most professors continue to teach in ways that have proven to be less effective than other available methods In reviewing their educational programs however faculties typically ignore this evidence Instead they spend most of their time discussing what courses to require although the lasting impact of college will almost certainly depend much more on how the courses are taught In his final chapter Bok describes the changes that faculties and academic leaders can make to help students accomplish more Without ignoring the contributions that America s colleges have made Bok delivers a powerful critique one that educators will ignore at their peril
