Swamplands Edward Struzik, 2021-10-12 In a world filled with breathtaking beauty we have often overlooked the elusive charm and magic of certain landscapes A cloudy river flows into a verdant Arctic wetland where sandhill cranes and muskoxen dwell Further south cypress branches hang low over dismal swamps Places like these collectively known as swamplands or peatlands often go unnoticed for their ecological splendor They are as globally significant as rainforests and function as critical carbon sinks for addressing our climate crisis Yet because of their reputation as wastelands they are being systematically drained and degraded to make way for oilsands mines farms and electricity In *Swamplands* journalist Edward Struzik celebrates these wild places venturing into windswept bogs in Kauai and the last remnants of an ancient peatland in the Mojave Desert The secrets of the swamp aren't for the faint of heart Ed loses a shoe to an Arctic wolf and finds himself ankle deep in water during a lightning storm But the rewards are sweeter for the struggle an enchanting Calypso orchid an elusive yellow moth thought to be extinct ancient animals preserved in lifelike condition down to the fur *Swamplands* highlights the unappreciated struggle being waged to save peatlands by scientists conservationists and landowners around the world An ode to peaty landscapes in all their offbeat glory the book is also a demand for awareness of the myriad threats they face It urges us to see the beauty and importance in these least likely of places Our planet's survival might depend on it **A**

The Geography of Manitoba John Welsted, John Everitt, Christoph Stadel, 1996-03-15

Manitoba is more than one of Canada's three prairie provinces. Encompassing 649 950 square kilometres its territory ranges from Canadian Shield to grassland parkland and subarctic tundra. Its physical geography has been shaped by ice age glaciers while its human geography reflects the influences of its various inhabitants from the First Nations who began arriving over 9 000 years ago to its most recent immigrants. This fascinating range of geographical elements has given Manitoba a distinct identity and makes it a unique area for study. *Geography of Manitoba* is the first comprehensive guide to all aspects of the human and physical geography of this unique province. Representing the work of 47 scholars and illustrated with over 200 maps, diagrams and photographs it is divided into four main sections covering the major areas of the province's geography: Physical Background, People and Settlements, Resources and Industry, and Recreation. As well as studying historical developments the contributors to *Geography of Manitoba* analyse recent political and economic events in the province including the effect of federal and provincial elections and international trade agreements. They also comment on future prospects for the province considering areas as diverse as resource management and climatic trends.

The Encyclopedia of Manitoba Ingeborg Boyens, 2007. An 800 page information source for all aspects of Manitoba's history, arts, politics, nature, geography, business and sports.

[Never Look a Polar Bear in the Eye](#) Zac Unger, 2013-01-29. In this humorous mix of travelogue and memoir a writer temporarily moves his California family north to Canada's Polar Bear Capital of the World. Welcome to Churchill, Manitoba. Year round human population 943. Yet despite the isolation and the searing cold here at the arctic's edge visitors from around the globe flock to the town every fall driven by a single purpose to see polar bears in the wild. Churchill is The Polar Bear Capital of the World. And for one unforgettable bear season Zac Unger, his wife and his three children moved from Oakland, California to make it their temporary home. But they soon discovered that it's really the polar bears who are at home in Churchill, roaming past the coffee shop on the main drag peering into garbage cans, scratching their backs against fence posts and front doorways. Where kids in other towns receive admonitions about talking to strangers, Churchill schoolchildren get 'Let's All Be Bear Aware' booklets to bring home. Lesson number 8: Never explore bad smelling areas. Zac Unger takes readers on a spirited and often wildly funny journey to a place as unique as it is remote, a place where natives, tourists, scientists, conservationists and the most ferocious predators on the planet converge. In the process he becomes embroiled in the controversy surrounding polar bear science and finds out that some of what we've been led to believe about the bears' imminent extinction may not be quite the case. But mostly what he learns is about human behavior in extreme situations and also why you should never even think of looking a polar bear in the eye.
