Arran Thorbjorn Campbell,2013-05-13 A Scottish historian provides an original fascinating and comprehensive account of the Isle of Arran from the prehistoric era to the 20th century Arran is an archaeological and geological treasure trove of stunning scenic beauty Its history stretches back more than five thousand years to the great stone circles whose remnants still decorate the plains of Machrie Runic inscriptions tell of a Viking occupation lasting centuries Later in 1307 King Robert the Bruce began his triumphant comeback from Arran Subsequently the island was repeatedly caught up and devastated in the savage dynastic struggles of medieval Scotland After the 1707 Parliamentary Union came a new and strange upheaval Arran became a testing ground for the Industrial Revolution The ancient runrig style of farming gave way to enclosed fields and labor saving methods which eventually lead to the socially disastrous Highland Clearances The misfortune of the times was culminated by the Great Irish Potato Famine of 1845 At last the area settled into a stable mixture of agriculture and tourism in the 19th and 20th centuries

When The Clyde Ran Red Maggie Craig,2018-03-08 This social history chronicles the protest movements of early 20th century Glasgow and Western Scotland A moving story told with enthusiasm Sunday Herald UK When the Clyde Ran Red paints a vivid picture of the heady days when revolution was in the air of Glasgow and surrounding areas along the River Clyde Through the bitter strike at the Singer Sewing machine plant in Clydebank in 1911 Bloody Friday in Glasgow s George Square in 1919 the General Strike of 1926 and on through the Spanish Civil War to the Clydebank Blitz of 1941 the people fought for the right to work the dignity of labor and a fairer society for everyone The Red Clydeside movement took hold in a Glasgow where overcrowded tenements stood no distance from elegant tea rooms dance halls and art galleries The River Clyde was also home to the famous artists of the Glasgow Style and exhibitions showcasing the wonders of the age Political idealism and artistic creativity were matched by industrial productivity especially in ship and locomotive building In this book Maggie Craig situates the politics of the time in the broader historical context telling a story of social change and human drama

Tourism in Peripheral Areas Frances Brown,Derek Hall,2000-08-31 There has been little research on tourism in those European countries or regions which lie outside the continent s main centres of production and population even though tourism may be one of the few economic options open to them This volume aims to fill a gap by presenting a range of case studies including northern Sweden the Orkneys the tip of Norway and northern Cyprus on tourism in the peripheral areas of Europe Taking as a leitmotiv the paradoxes inherent in developing places whose very attraction may lie in their lack of development the case studies investigate and illustrate both the opportunities and the threats that tourism presents to peripheral areas Although they share certain similarities the cases also demonstrate differing approaches to tourism development and varying outcomes over time They suggest solutions for dealing with for example community participation as well as providing practical insights into visitor perceptions of peripheral areas and into ways of marketing such areas in a

sensitive manner Together they provide a picture of the needs of peripheral areas and of how far and how best tourism can fulfil those needs *Natural History Societies and Civic Culture in Victorian Scotland* Diarmid A. Finnegan, 2016-09-12 The relationship between science and civil society is essential to our understanding of cultural change during the Victorian era Science was frequently packaged as an appropriate form of civic culture inculcating virtues necessary for civic progress In turn civic culture was presented as an appropriate context for enabling and supporting scientific progress Finnegan s study looks at the shifting nature of this process during the nineteenth century using Scotland as the focus for his argument Considerations of class religion and gender are explored illuminating changing social identities as public interest in science was allowed even encouraged beyond the environs of universities and elite metropolitan societies **Dumfries and**

Galloway Edward J. Cowan, Kenneth Veitch, 2019-09-02 Dumfries and Galloway is one of the least known regions of Scotland Despite memories and traditions to match those of Gaelic speaking Scotland it has been seriously understudied This innovative ground breaking study looks mainly at the everyday lives and culture of people in this region during a period of profound agricultural industrial and demographic change In doing so it uncovers new information about a wide range of topics in local history including food festivals and folklore music mining the development of towns and villages population smuggling the experience of migration and the question of identity All of the contributors to the book are specialists in their fields and have an in depth knowledge of the region through life and work *The Hero Building* Johnny Rodger, 2016-03-09 Why was it that across Scotland over the last two and a half centuries architectural monuments were raised to national heroes Were hero buildings commissioned as manifestations of certain social beliefs or as a built environmental form of social advocacy And if so then how and why were social aims and intentions translated into architectural form and how effective were they A tradition of building architectural monuments to commemorate national heroes developed as a distinctive feature of the Scottish built environment As concrete manifestations of powerful social and political currents of thought and opinion these hero buildings make important statements about identity the nation and social history The book examines this architectural culture by studying a prominent selection of buildings such as the Burns monuments in Alloway Edinburgh and Kilmarnock the Edinburgh Scott Monument the Glenfinnan Monument and the Wallace Monument in Stirling They give testimony to how a variety of architectural forms and styles can be adapted through time to bear particular social messages of symbolic weight This tradition which literally allows us to dwell on important social issues of the past has been somewhat neglected in serious architectural history and heritage and indeed one of the main monuments has already been destroyed By raising awareness of this rich architectural and social heritage while analysing and interpreting the buildings in their historical context this book makes an exciting and original scholarly contribution to the current debates on identity and nationality taking place in Scotland and the wider UK
