Editing Early Music:

Editing Early Music Thurston Dart, 1963 **Editing Early Music** John Caldwell, 1985 This book is a guide to the editorial procedures suitable for music written from the Middle Ages to about 1830 and replaces the 1963 pamphlet by Thurston Dart. Walter Emery and Christopher Morris. An introductory chapter on the principles of editing and transcribing is followed by three chronologically arranged chapters: the Middle Ages and early Renaissance, the Renaissance and Baroque, and Classical periods. The final chapter deals with the preparation of copy and other practical matters. The book does not aim to describe early notations in detail; rather, it is intended for the guidance of those who have already acquired a good knowledge of palaeography, notation, and source studies and who may wish to give practical thought to the problems of presentation in the form of an edition. John Caldwell is University Lecturer in Music and a Fellow of Keble College. He has been the general editor of the *Series Musica da Camera* OUP and is general editor of *Corpus of Early Keyboard Music*, American Institute of Musicology. **Early Music Editing** Theodor Dumitrescu, Karl Kügle, Marnix van Berchum, 2013 Is editing music a fallacy? It may appear so when consulting the Oxford English Dictionary, which defines editing as 'to prepare an edition of a literary work or works by an earlier author or to prepare set in order for publication literary material which is wholly or in part the work of others'. Of course, the parentheses readily allow the musicologist to construct a broadened definition of editing, tacitly declaring music to be akin to literature, but doing so causes a number of other discomforts for music, while certainly not inimical to words, simply cannot be equated with literature tout court. Even so, the OED mercilessly insists on the origins of the term within the realm of literary text production. Furthermore, as if adding insult to injury, a secondary definition of editing offered by the OED, 'to prepare a film for the cinema or recordings for broadcasting etc. by eliminating unwanted material etc.', brings music into play, but hardly in the sense it is construed in this volume, namely in its written instantiation as notation. Instead, catapulting the reader from the old-fashioned realm of ink and paper into the glittery domain of twentieth and twenty-first century multi-media art forms and their post-Gutenbergian methods of production, storage, and distribution, music editing is now made present as the cleaning-up procedure preceding the release of a new product rather than the painstaking preparation of a work or works by an earlier author for re-publication. Editing early music Thurston Dart, 1963 **Editing early music** Margaret Bent, 2003 **Tonal Structures in Early Music** Cristle Collins Judd, 2014-04-23 Discussion of tonal structure has been one of the most problematic and controversial aspects of modern study of Medieval and Renaissance polyphony. These new essays, written specifically for this volume, consider the issue from historical, analytical, theoretical, perceptual, and cultural perspectives. *Early Music History* Iain Fenlon, 2009-03-19 *Early Music History* is devoted to the study of music from the early Middle Ages to the end of the seventeenth century. It demands the highest standards of scholarship from its contributors, all of whom are leading academics in their fields. It gives preference to studies pursuing interdisciplinary approaches and to those developing novel

methodological ideas The scope is exceptionally broad and includes manuscript studies textual criticism iconography studies of the relationship between words and music and the relationship between music and society Articles in volume four include Toledo Rome and the legacy of Gaul Classical tragedy in the history of early opera in Rome and Reading and singing on the genesis of occidental music writing
