Edmund W Gordon:

Pedagogical Imagination: Volume III: Defiance: On Becoming an Agentic Black Male Scholar Edmund W. Gordon, 2014 Dr Edmund W Gordon is one of America's most influential advocates for improving education of children from underprivileged backgrounds. Primarily focused on how African American students can triumph over significant odds against success to become better achievers, he has spent much of his life's work developing strategies to close The Achievement Gap and use knowledge and understanding to develop equity in and through education and improve the human condition. In the preface to volume I, Gordon offers this statement: Pedagogical Imagination conjoins the creative use of mind to address selected problems in the improvement of education, similarly to C. Wright Mills' admonition that sociological imagination is brought to bear upon the pursuit of understanding in sociology and of solutions to social problems.

Pedagogical Imagination Edmund W. Gordon, 2014-05-15 With essays concerned with the struggle to achieve equal educational opportunity through desegregation and the struggle for equality of educational achievement, Gordon uses logical analysis to exploit the potential of the dominant system's theories, the master's tools, to subvert that system's efforts at intellectual marginalization and oppression of low-income people of color. Edmund W. Gordon is the Richard March Hoe Professor of Psychology and Education Emeritus and Director Emeritus of the Institute of Urban and Minority Education at Teachers College, Columbia University. He is also the John M. Musser Professor of Psychology Emeritus at Yale University and has been the Senior Scholar in Residence at the College Board. The Educational Testing Service created the Edmund W. Gordon Chair in Evaluation Research and Policy in 2004. The following year, Columbia University named its Harlem facility the Edmund W. Gordon Campus of Teachers College. Locally, he and his wife, Dr. Susan G. Gordon, are the Co-Founders of the CEJES Institute in Pomona.

Edmund W. Gordon Carol Camp Yeakey, 2000 Focuses on the work of Edmund W. Gordon, the John M. Musser Professor of Psychology Emeritus at Yale University. Gordon had a tremendous influence on contemporary thinking in psychology, education, and social policy, and the implications of his work for the schooling of lower-status youth and children of color in America.

Crisis in the Village Robert Michael Franklin, 2007-01-17 Robert M. Franklin provides first-person advice and insight as he identifies the crises resident within three anchor institutions that have played key roles in the Black struggle for freedom. Black families face a crisis of commitment evident in the rising rates of father absence, births to unmarried parents, divorce, and domestic abuse or relationship violence. Black churches face a mission crisis as they struggle to serve their upwardly mobile and/or established middle-class paying customers alongside the poorest of the poor. Historically, Black colleges and universities face a crisis of relevance and purpose as they now compete for the best students and faculty with the broad marketplace of colleges. With clarity and passion, Franklin calls for practical and comprehensive action for change from within the African American community and from all Americans.

Race and Culturally Responsive Inquiry in Education Stafford L. Hood, Henry T. Frierson, Rodney K. Hopson, Keena N. Arbuthnot, 2022-08-16 Race and

Culturally Responsive Inquiry in Education examines how assumptions about race and culture have shaped US education research and the interpretation and implementation of its results This ambitious volume sheds light on the detrimental effects of educational praxis and policies that have characterized communities of color and historically underserved communities as deficient It reveals how such bias has affected many facets of educational inquiry from research design and planning to education policy making and evaluation practices The provocative essays in this work challenge traditional suppositions about whose evidence matters highlighting approaches for reframing educational inquiry and arguing for the adoption of a culturally responsive stance that can correct inequities by accounting for students diverse backgrounds and needs Edited by Stafford L Hood Henry T Frierson Rodney K Hopson and Keena N Arbuthnot and featuring contributions from leading and emerging scholars the collection is organized around three key areas education research educational assessment and program evaluation The contributors identify provocative problems that exist at the intersection of race and education in these areas and they illuminate the many ways in which education reform can address intersectionality Calling for effective action they suggest compelling solutions for consideration by policy makers and practitioners as well as researchers Together the essays in this volume make the case that culturally responsive methods that deepen our understanding of educational disparities appropriately measure what students know and can do and ensure that we have accurate information about the effectiveness of educational interventions can improve educational outcomes for diverse learners

Legacies: Guide to designing curriculum D. Michael Pavel, Ella Inglebret, Stephanie Gail Wood, 2014

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators

accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize. But even after very clear disappointments, no other policy framework has emerged to challenge its hegemony. The American public today has little confidence in institutions to improve the quality of goods and services they provide, especially in the public sector. As a consequence, many Americans continue to believe that accountability remains a vital necessity, even if educators and policy scholars disagree.

Recognizing Promise Michael A. Baston, Beatrice L. Bridgall, Michael Nettles, 2022-10-26 *Recognizing Promise* re-establishes the role community colleges can play in reversing centuries of racial and gender disparities in economic wealth, health, education, and life expectancy, stemming from current and historical policies and practices that sustain structural racism. Minority Students Meyer Weinberg, 1977 *Resources in Education*, 2001 Changing Federal Strategies for Supporting Educational Research, Development, and Statistics Maris A. Vinovskis, 1998 Resilience Across Contexts Ronald D. Taylor, Margaret C. Wang, 2012-12-06 A number of societal risks pose serious challenges to families, well-being, many of which cut across divisions of class and race. These challenges include changes in the labor market and economy, the increasing participation of mothers in the labor force, the changing nature of family structure, and the composition of households, and the increase in the number of immigrant families. Key institutions in the lives of families, including places of employment and schools, can play a significant role in fostering families' capacity to adapt to the potential challenges they face. *Resilience Across Contexts: Family Work Culture and Community* presents papers written by leading scholars in varied disciplines, including economics, developmental and educational psychology, education, and sociology, discussing factors that influence resilience development. The authors' research focuses on emerging issues that have significant implications for policy and practice in such areas as employment and new technologies, maternal employment, and family development, family structure, and family life, immigration, migration, acculturation, and education of children and youth, and social and human services delivery. The book's overall goal is to take stock of what is known from research and practice on some of the challenges facing children and families for policy development and improvement of practices. Education of the Slow Learners Vijay Pratap Singh, 2004 Out of Paper Katie Anania, 2024-06-11 A dynamic look at how artists used paper to radically redefine the relationship between the body and its surroundings, and to propose new conceptions of ecology. From sketches created inside pants pockets to paper-strewn performances that took cues from protests and riots, the work on paper in the 1960s acted as a mobile, flexible connective tissue between the body and the world around it. In this book, Katie Anania reveals how artists Carolee Schneemann, William Anastasi, Richard Tuttle, Robert Morris, and Charles White harnessed this historically intimate medium during a period in which Americans were becoming urgently concerned with identity.

consumer culture the overreach of state power and the rapidly deteriorating natural world Her reexamination of drawing shows how the omnipresence of paper facilitated artists critiques of dominant systems from modern throwaway culture to bureaucracy to colonial violence Engaging a wide range of actions such as recycling recording cutting planning and erasing Anania offers fresh insights into paper s role not merely as a preparatory medium but one essential to the histories of performance minimalist conceptual and land art Out of Paper uses materiality studies social history and feminist art historical methods to situate paper as a major conduit for thought in the postwar United States
