Outdoor Domesticity Ricardo Devesa, 2022-02-04 Trees have been deliberately connected with houses since they were introduced as a prominent part of architectural design The relationships of contiguity between houses and trees have existed since ancient times However at the end of the 19th century those links became explicit in the design process as the house emerged as one of the fundamental architectural programs and as the result of an increasing sensibility towards environmental aspects and the landscape The first part of this publication is to present a collection of exemplary five houses that evinced explicit relationships with pre existing trees The five twentieth century projects are La Casa B Rudofsky 1969 Cottage Caesar M Breuer 1951 Ville La Roche Le Corbusier P Jeanneret 1923 Villa Pepa J Navarro Baldeweg 1994 and Hexenhaus A P Smithson 1984 2002 The second part of the book contributes three theoretical concerns for the contemporary project those ones which are established in the process with respect to time place and outdoor domesticity in modern western housing One of these theoretical contributions establishes that any house located on a site finds a significant place in conjunction with the preexisting trees The second contribution describes the effects in terms of time in addition to spatial considerations which trees can contribute to the architectural project Finally the establishment of these connections between architecture and trees enlarges the idea of the house the tree serves to draw the surrounding environment into the house and as a result becomes an intrinsic part of the house itself Avery Index to Architectural Periodicals, 2d Ed., Rev. and Enl Avery Library, 1995 **International Books in Print**, 1986 **Housing + Single-Family Housing** Manuel Gausa, Jaime Salazar, 2005-05-12 As cities evolve architects are constantly searching for appropriate architectonic solutions and in this book the authors present a systematic examination of innovative single family houses and residential buildings in the context of presentday cities The latest developments are reviewed in essays and thematic chapters discuss such topics as lowenergy building the use of prefabricated materials or low budget building A range of international examples from architects such as Wiel Arets Shigeru Ban Ben van Berkel Kees Christiaanse Philippe Gazeau Frank O Gehry Steven Holl Hans Kollhoff Morger Degelo MVRDV Jean Nouvel Kas Oosterhuis illustrate the subjects discussed Housing and Single Family Housing were previously published separately each proving hugely popular Now both volumes have been incorporated into a single lowpriced edition *The Architects' Journal*, 1995 **Forthcoming Books** Rose Arny, 1998-04 Cities in Transition Deborah Hauptmann, Henco Bekkering, 2001 Welke invloed hebben globalisering en de nieuwe technologie op de steden en hoe verloopt de confrontatie tussen de architectuur en stedenbouwkundige praktijk met de kritische theorievorming Uitgebreide bespreking van het boek in Stedenbouw en Ruimtelijke Ordening 2001 nr 5 Avery Index to Architectural Periodicals, 1995 Avery Library, 1997-02 **Host Bibliographic Record for Boundwith Item Barcode 30112072131219 and Others**, 1832 **Bibliografía española**, 2001-11 **Center**, 2007 **Building Barcelona** Peter G. Rowe, 2006 A landmark among the books written on Barcelona Building Barcelona A Second Renaissance provides an

enthusiastic examination of the city's urban transformation Peter G Rowe unfolds Barcelona's rebirth through a clever destination of historical facts that are intertwined with major international events **BOOK JACKET** **Resisting Postmodern Architecture** Stylianos Giamarellos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarellos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography [The Catholic Encyclopedia](#), 1914 [Learning from Logistics](#) Clare Lyster, 2016-02-22 In the 19th century railroads and canals provided both structure and motor for city development This role has been taken over today by the global flow of data and products as the author argues Flow of material and communication is the DNA of contemporary environments This development has enormous and partially unfathomable implications for our city fabric Logistics networks and their complex structure increasingly bear upon many urban spheres Counter trends to the ubiquitous internet retail trade to name one of the most palpable phenomena are gaining momentum as well exemplified by the criticism of labor conditions in e commerce and the trend to buy regional products from local stores The author describes the current development and its impact on architecture landscape architecture and urbanism Aspects such as today's hypermobility of both products and people have repercussions in design work and create new paradigms for architecture and urban design Concepts for the integration of these new issues are introduced by a number of exemplary urban design projects **Architectural Publications Index**, 1999 **Reports on the Paris Universal Exhibition, 1867**, 1869 [Reports on the Paris universal exhibition, 1867.
