Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both

historically and currently impacts their meaning making and understanding of STEM Taking the MYP Forward Mary Hayden, Jeff Thompson, 2011 Expert writers share reflections on their experience and explore issues for the future of the International Baccalaureate Middle Years Programme The issues raised are of interest and relevance to those with responsibility for MYP teaching learning and administration in schools and will provoke interest in the programme amongst those considering its adoption
