Educating Citizens Kenneth Osborne, Ken Osborne, 1988

The Canadian left has over the years paid remarkably little attention to the actual content of education. Apart from occasional bursts of concern about militarism, sexism, racism, or anti-labour bias, the school curriculum has gone largely unquestioned. Socialist values such as cooperation, participation, personal autonomy, and a sense of community do not appear out of thin air. They have to be acquired. Conservatives and liberals have long realized this and have shaped the schools accordingly so that the capitalist ethic of competitive individualism is now strongly entrenched and is learned early in life. If the vision of cooperative commonwealth is to become a reality, then education will have an important role to play. This book is an attempt to outline what this role might be. *Educating Citizens* outlines a working class curriculum designed to prepare students for participation in a socialist democracy. *An Our Schools Our Selves* book **Educating Citizens** Charles Venegoni, 2004-09-20

The United States is in the midst of historic experiments with publicly funded choice in K-12 education, experiments that recently received a green light from the Supreme Court. Other nations have long experience with the funding and regulation of nonpublic schools, including religious schools. This book asks what U.S. policymakers, public officials, and citizens can learn from these experiences. In particular, how do other countries regulate or structure publicly funded educational choice with an eye toward civic values, looking not only for improvements in test scores but also in tolerance, civic cohesion, and democratic values such as integration across the lines of class, religion, and race. The experience of Europe and Canada with school choice is both extensive and varied. In England and Wales, public school choice is widespread as parents play a significant role in selecting the school their children will attend. In the Netherlands and much of Belgium, a majority of students attend religious schools at government expense. In Canada, France, and Germany, state-financed school choice is limited to circumstances that serve particular social and governmental needs. In Italy, school choice has just recently arrived on the policy agenda. In spite of the diversity of national experiences, in all of these countries, choice is regulated by the government in significant and varied ways to promote civic values. In several of these countries, school choice policy itself appears to have played an important role in promoting social cohesion and integration. This book presents a wealth of experience designed to aid policymakers and citizens as they consider historic changes in American public education policy. **Quick Hits for Educating Citizens** James L. Perry, Steven Jones, 2006-06-06

This volume makes the statement that democracy matters, that engagement in the community is essential to maintain our democratic values, and that civic engagement plays a significant role in educating our citizens. Sharon Hamilton and Robert Orr, Directors, Indiana University Faculty Colloquium on Excellence in Teaching, FACET. *Quick Hits for Educating Citizens* presents university faculty and administrators with ideas and strategies for integrating civic education into university curricula. Fifty-eight succinct essays from across the disciplines offer successful models of curriculum-based civic education activities and strategies for engaging students outside the classroom. Reflecting best practices as well as individual approaches to educating students for citizenship, this is an outstanding resource for university faculty in every discipline as well as administrators and students in schools of education.

Brokering Britain, Educating Citizens Melanie Cooke, Rob Peutrell, 2019-09-16 This book addresses the politically charged issue of citizenship and English language learning among adult migrants in the UK. Whilst citizenship learning is inherent in English for Speakers of Other Languages (ESOL), the book argues that top-down approaches and externally designed curricula are not a productive or useful approach. Meaningful citizenship education in adult ESOL is possible, however, if it brings social and political content centre stage alongside pedagogy which develops the capabilities for active grassroots participatory citizenship. The chapters deliver a detailed examination of citizenship and ESOL in the UK. They address a range of community and college-based settings and the needs and circumstances of different groups of ESOL students, including refugees, migrant mothers, job seekers and students with mental health needs. The book draws attention to the crucial role of ESOL teachers as brokers of citizenship, mediating between national policy and the experiences and needs of adult migrant students. The book links together language pedagogy and citizenship theory with the practical concerns of ESOL teachers and students.

Mindfulness and Educating Citizens for Everyday Life Malgorzata Powietrzynska, Kenneth Tobin, 2016-07-23 Mindfulness and Educating Citizens for Everyday Life invites readers to explore the role mindfulness can play in mediating how we enact social life in today's increasingly challenging and challenged world. The educators and researchers who have contributed to this book use mindfulness as a lens to address and untangle what is becoming a profoundly complicated way of being within the reality of global capitalism. Education is framed broadly; the research transcends the walls of classrooms and includes museums, nursing homes, hospitals, AA meetings and homes. Hence the chapters feature participants occupying varied social positions and spaces that may be situated in different parts of the globe. The authors address two overarching and dialectically related themes of mindfulness and wellness, and collectively the chapters expand possibilities for readers to act mindfully in a world in which wellness and wellbeing are pervasive concerns as a fragile Earth adapts to a dynamic flux of human-led changes that threaten the future of lifeworlds that support humanity and myriad species that face extinction. The authors do not offer oversimplified solutions to dramatically switch direction and preserve life as we have known it. Instead, the ideas that emerge from the research presented in this volume expand possibilities for informed conduct, self-help and educating citizens with a goal of individuals and collectives transforming lifeworlds by embracing mindfulness-saturated ontologies.
