Education and the Scandinavian Welfare State in the Year 2000 Arild Tjeldvoll, 2013-10-31 This significant contribution to comparative education presents an authoritative discussion of the recent changes in Denmark Finland Iceland Norway and Sweden The implementation of a democratic educational policy in Scandinavia has been affected by the dominance of the Protestant Church mass immigration from Third World nations a growing belief in rugged individualism newfound respect for privatization and the market economy and the increasing unemployment of the technical revolution Education has been unable to adapt rapidly enough to meet the

Scrase,2021-12-12 First Published in 1997 In much of the comparative education literature questions of educational inequality and lack of educational opportunity in the developing world stand as perplexing complex and difficult problems Yet while inequality in education remains one of the most researched and written about topics in the discipline the question of social justice and its relationship to education remains implicit This volume aims to reverse this trend to make the issue of social justice both in theory and practice central and explicit *Third World Education* Anthony R. Welch,2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged *Women, Education, and Development in Asia* Grace C.L. Mak,2013-11-26 This volume of twelve original essays examines the interplay between women s education and development and if and how it has changed women s status in selected nations in Asia Educational expansion in recent decades have benefitted women in Asia at least in quantitative terms Industrialization has also created room for increased waged employment for them However the relative openness of these systems has not been paralleled at the cultural level Women in

Asia which remains largely patriarchal are thus caught in contradictions This volume examines how women use and compromise with opportunities and limits in education the role of education in their economic participation and the enhancement and tension brought to their family roles The volume is edited from a cross national perspective The chapters each covering a nation rest on a common framework Each begins with a brief historical account of education for women It then investigates the extent women have been able to take advantage of them What follows is an analysis of how women use their education in the labor market and in the family Society's definition of women's roles in the family often acts to reduce the effect of schooling on women's economic participation This interplay is further complicated by such factors as social class and or caste religion and ethnicity
