Africa's Future, Africa's

Challenge Marito H. Garcia, Alan Pence, Judith Evans, 2008-01-18 Early childhood from birth through school entry was largely invisible worldwide as a policy concern for much of the twentieth century. Children in the eyes of most countries were appendages of their parents or simply embedded in the larger family structure. The child did not emerge as a separate social entity until school age, typically six or seven. Africa's Future: Africa's Challenge: Early Childhood Care and Development in Sub-Saharan Africa focuses on the 130 million children south of the Sahel in this 0-6 age group. This book, the first of its kind, presents a balanced collection of articles written by African and non-African authors ranging from field practitioners to academicians and from members of government organizations to those of nongovernmental and local organizations. Africa's Future: Africa's Challenge compiles the latest data and viewpoints on the state of Sub-Saharan Africa's children. Topics covered include the rationale for investing in young children, policy trends in early childhood development, ECD historical perspectives of ECD in Sub-Saharan Africa, including indigenous approaches, new threats from HIV/AIDS, and the importance of fathers in children's lives. The book also addresses policy development and ECD implementation issues, presents the ECD programming experience in several countries, highlighting best practices and challenges, and evaluates the impact of ECD programs in a number of countries.

Educational Assessment and Inclusive Education Christian Ydesen, Alison L. Milner, Tali Aderet-German, Ezequiel Gomez Caride, Youjin Ruan, 2023-01-18 This book brings together policymaker and practitioner knowledge, experiences, and perspectives on the interaction between the assessment and inclusion agenda to the fore. The book's analysis is built on comparative qualitative data from five different countries on four continents: Argentina, China, Denmark, England, and Israel. These countries have been chosen for their distinctive and even contrasting education policies, sociocultural and economic circumstances, and variations in performance across supranational and national standardised student assessments. In addressing these specific contexts, the book provides insights into the pitfalls and synergies which emerge as key stakeholders attempt to mediate these two educational concerns in both policy and practice.
