Education And The Rise Of The Corporate State:

Education and the Rise of the Corporate State Joel H. Spring, 1971 Education and the Rise of the Global Economy
Joel Spring, 1998-09-01 Joel Spring investigates the role of educational policy in the evolving global economy and the consequences of school systems around the world adapting to meet the needs of international corporations. The new global model for education addresses problems of technological change, the quick exchange of capital and free markets policies to resolve these problems include lifelong learning, learning societies, international and national accreditation of work skills, international and national standards and tests, school choice, multiculturalism, and economic nationalism. The distinctive contribution Spring makes is to offer an original interpretive framework for examining and understanding the interconnections among education, imperialism, and colonialism and the rise of the global economy. He offers a unique comparison of the educational policies of the World Bank, the United Nations, the European Union, and the Organization for Economic Development and Cooperation. Additionally, he provides and weaves together important historical and current information on education in the context of the expansion of international capitalism. Much of this information gathered from many diverse sources is otherwise not easily available to readers of this book. In the concluding chapters of the volume, Spring presents a thoughtful analysis and a powerful argument emphasizing the importance of human rights education in a global economy. This volume is a sequel to Spring's earlier book *Education and the Rise of the Corporate State* (1972), continuing the work he has been engaged in since the 1970s to describe and analyze the relationship between political, economic, and historical forces and educational policy.

Education and the Rise of the Corporate State, By Joel H. Spring Joel H. Spring, 1973 **Corporatism, Social Control, and Cultural Domination in Education** Joel H. Spring, 2012 Starting with the 1972 publication of his seminal work *Education and the Rise of the Corporate State*, Joel Spring has been documenting and analyzing the politics of knowledge and education. Throughout his work, he has explored the attempts to use education to advance the economic and political interests of dominant groups. The general term he uses for the relationship between schools and power is ideological management. His scholarly work first looked at the influence on American schooling of business and economic doctrines embodied in human capital theories and consumerism. The next step in his exploration of the politics of knowledge was to examine these issues in the context of globalization, leading to a proposed educational rights amendment to national constitutions and a new paradigm for education, both of which might ensure that schools are protected from ideological management by economic and political elites. Spring's indigenous background has strongly shaped his interest in the political and economic goals of schooling, particularly the attempts of those in power to use schools to destroy indigenous languages and cultures. In this collection, Spring brings together 10 of his key writings providing an overview not just of his own career but the larger contexts in which it is situated. In the Introduction, he reviews the evolution and scope of his work and his earlier arguments and reflects on its central themes.

which are reflected in the writings selected for this volume In the World Library of Educationalists international scholars themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field as well as the development of the field itself Contributors to the series include Michael Apple James A Banks Stephen J Ball Elliot Eisner Howard Gardner John Gilbert Ivor F Goodson Peter Jarvis

Private Philanthropy and Public Education Robert J. Taggart, 1988 An account of Delaware s experience of educational modernization led by Pierre S du Pont from a local based collection of school districts to a coherent state system that by the 1930s ranked near the top in the nation

Social Analysis of Education Philip Wexler, 2017-04-28 First published in 1987 this book offers an ideological critique of the new sociology of education with the aim to redeem understanding of the social and historical character of knowledge. It argues that with an historical and social grasp university knowledge can be understood as a collective product and can become a useful resource for encountering and transforming the social present. To reach this objective the book reviews the history of the new sociology of education and shows how it is limited by earlier times and social conflicts. In doing so it aims to continue the unrealized critical analysis that was promised by the new sociology of education and remained contained.

Asian American Interethnic Relations and Politics Franklin Ng, 2014-10-29 The United States has seen several anti Asian movements as evidenced by immigration policies, naturalization laws, state and local statutes and acts of violence. In recent years Asian Americans have mobilized against prejudice and discrimination, organizing media groups and panethnic coalitions to achieve greater political effectiveness. These essays address recent issues of interethnic relations and conflict and politics in Asian American communities ranging from the Japanese American redress movement for unjustified World War II internment, Japan bashing, the model minority stereotype, resistance to urban renewal, interethnic conflicts with other groups, Asian American politics, Asian American panethnicity and involvement in ancestral homeland politics. **The Critical**

Turn in Education Isaac Gottesman, 2016-03-17 *The Critical Turn in Education* traces the historical emergence and development of critical theories in the field of education from the introduction of Marxist and other radical social theories in the 1960s to the contemporary critical landscape. The book begins by tracing the first waves of critical scholarship in the field through a close contextual study of the intellectual and political projects of several core figures including Paulo Freire, Samuel Bowles and Herbert Gintis, Michael Apple and Henry Giroux. Later chapters offer a discussion of feminist critiques, the influx of postmodernist and poststructuralist ideas in education and critical theories of race. While grounded in U S scholarship, *The Critical Turn in Education* contextualizes the development of critical ideas and political projects within a larger international history and charts the ongoing theoretical debates that seek to explain the relationship between school and society. Today much of the language of this critical turn has now become commonplace words such as hegemony, ideology and the term critical itself, but by providing a historical analysis *The Critical Turn in Education* illuminates the complexity and nuance of these theoretical tools which offer ways of understanding the intersections between individual identities and structural forces in an attempt to engage and overturn social injustice. **Math Education for America?** Mark

Wolfmeyer, 2013-12-04 *Math Education for America* analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States. The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics. Rather than looking at the text of specific policy documents, this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis. Breaking new ground in detailing

and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest
