Education And The Times:

Body Clocks: The biology of time for sleep, education and work Paul Kelley, Sian Griffiths, 2018-12-01 Our body's clocks make the difference between happiness and depression health and illness and even life and death The brilliant scientist Paul Kelley makes a compelling case for all organisations to allow people to work and study the hours that suit their personal circadian rhythms That way Paul argues we would all be more productive a great deal of ill health would be avoided and the world would be a better and happier place

Time and the Rhythms of Emancipatory Education Michel Alhadeff-Jones, 2016-10-26 Time and the Rhythms of Emancipatory Education argues that by rethinking the way we relate to time we can fundamentally rethink the way we conceive education Beyond the contemporary rhetoric of acceleration speed urgency or slowness this book provides an epistemological historical and theoretical framework that will serve as a comprehensive resource for critical reflection on the relationship between the experience of time and emancipatory education Drawing upon time and rhythm studies complexity theories and educational research Alhadeff Jones reflects upon the temporal and rhythmic dimensions of education in order to re theorize and address current societal and educational challenges The book is divided into three parts The first begins by discussing the specificities inherent to the study of time in educational sciences The second contextualizes the evolution of temporal constraints that determine the ways education is institutionalized organized and experienced The third and final part questions the meanings of emancipatory education in a context of temporal alienation This is the first book to provide a broad overview of European and North American theories that inform both the ideas of time and rhythm in educational sciences from school instruction curriculum design and arts education to vocational training lifelong learning and educational policies It will be of key interest to academics researchers and postgraduate students in the fields of philosophy of education sociology of education history of education psychology curriculum and learning theory and adult education The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Time and Education Petra Mikulan, Nathalie Sinclair, 2023-01-12 Despite pervading all aspects of educational practice and theory little scholarship focuses on time in education This book addresses that lacuna questioning our assumptions about time and their ramifications on theories of learning issues of equity and diversity and on the purposes of education itself The authors examine ideas about time in a wide variety of contexts from ancient Greek fiction to 19th century theories of evolution and from 20th century indigenous stories to 20th century afro futurist fiction They show how pervasive the image of time as an arrow has become an image of time that is one way singular and teleological Through exploring other theories of time the authors propose alternatives for time in education They argue that time is one of the key biopolitical tools we think and operate with but rarely address as a historical cultural and pedagogical category with which schools reproduce oppressive structures around race class and gender in society The book draws on ideas from the arts and the sciences to illustrate and

Effectiveness of Time Investments in Education Jaap Scheerens, 2013-08-15 This book analyzes the productivity and effectiveness of a variety of

time investments in education It explores the methods used in education to optimize the time that students are exposed to learning content Such methods include expanding official school time optimizing time on task providing homework assignments and creating learning opportunities beyond lesson hours The book presents a review of earlier reviews and meta analyses secondary analyses of international data sets and new meta analyses concerning the effects of instruction time homework and extended learning beyond official school time It explores the concept of time as a condition to enhance student achievement and discusses methodological issues in separating genuine time effects from related facets of educational quality The book shows that the dependence of time effects on the quality of content choice and delivery raises critical questions for both researchers and policy planners It further shows that sophisticated research designs are required to properly assess time effects and that policy makers should be concerned about the bluntness of time as an instrument to enhance educational productivity *The Times Parliamentary Debates* ,1892 *The Law Times Reports of Cases Decided in the House of Lords, the Privy Council, the Court of Appeal ...
