these arrangements and test the effectiveness of adapting one country's policies in other often quite culturally distinct countries. The book investigates how global policies have been implemented locally and examines the extent to which they work in diverse locales. Teiner Khamsi and her colleagues also examine the role and practices of non-governmental organizations, NGOs, multilateral organizations and the World Bank in fostering how educational policies are disseminated and adapted across national and cultural boundaries.

Traditions in German-Speaking Mathematics Education Research Hans Niels Jahnke, Lisa Hefendehl-Hebeker, 2019-02-13 This open access book shares revealing insights into the development of mathematics education research in Germany from 1976 ICME 3 in Karlsruhe to 2016 ICME 13 in Hamburg. How did mathematics education research evolve in the course of these four decades? Which ideas and people were most influential and how did German research interact with the international community? These questions are answered by scholars from a range of fields and in ten thematic sections: 1 a short survey of the development of educational research on mathematics in German speaking countries; 2 subject matter didactics; 3 design science and design research; 4 modelling; 5 mathematics and Bildung 1810 to 1850; 6 Allgemeinbildung: Mathematical Literacy and Competence Orientation; 7 theory traditions; 8 classroom studies; 9 educational research and 10 large scale studies. During the time span presented here profound changes took place in German speaking mathematics education research. Besides the traditional fields of activity like subject matter didactics or design science completely new areas also emerged which are characterized by various empirical approaches and a closer connection to psychology, sociology, epistemology and general education research. Each chapter presents a respective area of mathematics education in Germany and analyzes its relevance for the development of the research community not only with regard to research findings and methods but also in terms of interaction with the educational system. One of the central aspects in all chapters concerns the constant efforts to find common ground between mathematics and education. In addition readers can benefit from this analysis by comparing the development shown here with the mathematical education research situation in their own country.

Nonconformity, Dissent, Opposition, and Resistance in Germany, 1933-1990 Sabrina P. Ramet, 2020-10-29 This book brings fresh light to previously marginalized subject in German history. It is an original approach up to date written without scholarly jargon easily accessible to students both at undergraduate and graduate. It is highly focused departing from the usual histories of a

single country arguing for the two German states and the three political systems Prof Dr L szl K rti Institute of Applied Social Sciences University of Miskolc Hungary This book contrasts three very different incarnations of Germany the totalitarian Third Reich the communist German Democratic Republic and the democratic Federal Republic of Germany up to 1990 in terms of their experiences with and responses to nonconformity dissent opposition and resistance and the role played by those factors in each case Although even innocent nonconformity came with a price in all three systems and in the post war occupation zones the price was the highest in Nazi Germany It is worth stressing that what qualifies as nonconformity and dissent depends on the social and political context and thus changes over time Like those in active dissent opposition or resistance nonconformists are rebels whether they are conscious of it or not and have repeatedly played a role in pushing for change whether through reform of legislation transformation of the public s attitudes or even regime change

The Unification of German Education Val D. Rust, Diane Rust, 2018-05-03 Originally published in 1995 This study of the integration of East and West German education following the collapse of the German Democratic Republic in 1989 focuses on policy formation and implementation during this period of great social and political turbulence It is the result of a research project undertaken shortly after the unification The authors lived in East Germany for a full year looking carefully at individual schools vocational training centers teacher colleges and universities The book considers questions of how education policy is successfully formulated conditions in which that policy is implemented and the consequences of the implemented educational reform The first chapters present the context and history of German education and the later chapters discuss the unification and the formation of the new school laws and the successes and failures The authors research shows that even before the unification East Germans had already opted for a system consistent with West German

education law However the West Germans disregarded these changes and imposed their own version of reform on East Germany The German situation at this time is of great interest to all educators particularly students of educational policy making as well as researchers in political science economics and sociology

Antifascism After Hitler Catherine Plum, 2015-02-20 Antifascism After Hitler investigates the antifascist stories memory sites and youth reception that were critical to the success of political education in East German schools and extracurricular activities As the German Democratic Republic GDR promoted national identity and socialist consciousness two of the most potent historical narratives to permeate youth education became tales of communist resisters who fought against fascism and the heroic deeds of the Red Army in World War II These stories and iconic images illustrate the message that was presented to school age children and adolescents in stages as they advanced through school and participated in the official communist youth organizations and other activities This text delivers the first comprehensive study of youth antifascism in the GDR extending scholarship beyond the level of the state to consider the everyday contributions of local institutions and youth mentors responsible for conveying stories and commemorative practices to generations born during WWII and after the defeat of fascism While the government sought to use educators and former resistance fighters as ideological shock troops it could not completely dictate how these stories would be told with memory intermediaries altering at times the narrative and message Using a variety of primary sources including oral history interviews the author also assesses how students viewed antifascism with reactions ranging from strong identification to indifference and dissent Antifascist education and commemoration were never simply state prescribed and were not as participation less as some scholars and contemporary observers claim even as educators fought a losing battle to maintain enthusiasm
