explains the uneven development of federal involvement in education While supporters of expanded federal involvement enjoyed some success in bringing new ideas to the federal policy agenda Rhodes argues they also encountered stiff resistance from proponents of local control Built atop existing decentralized policies new federal reforms raised difficult questions about which level of government bore ultimate responsibility for improving schools Rhodes s argument focuses on the role played by civil rights activists business leaders and education experts in promoting the reforms that would be enacted with federal policies such as NCLB It also underscores the constraints on federal involvement imposed by existing education policies hostile interest groups and above all the nation s federal system Indeed the federal system which left specific policy formation and implementation to the states and localities repeatedly frustrated efforts to effect changes national reforms lost their force as policies passed through iterations at the state county and municipal levels Ironically state and local resistance only encouraged civil rights activists business leaders and their political allies to advocate even more stringent reforms that imposed heavier burdens on state and local governments Through it all the nation s education system made only incremental steps toward the goal of providing a quality education for every child *The Politics of Education Policy in an Era of Inequality* Sonya Douglass,Janelle T.
