Citizenship and the Diaspora in the Digital Age Toyin Falola, 2023-05-22 In *Citizenship and the Diaspora in the Digital Age*, Farooq Kperogi and the Virtual Community Toyin Falola examines how the members of the Nigerian diaspora create a virtual community and instrumentalize the digital age to speak about the nation and its failures, possibilities and promises. This book depicts individuals' relationships with society and how the world's progressive shift toward technology and globalization does not disregard the concept of society and its members. As a result of this shift, people have been migrating to new places without giving up their citizenship in their home countries. This book explores how migrants are focused on the idea of a virtual community, examines how citizens' roles have evolved through time, and displays society's essential principles in this light. Furthermore, it evaluates social commentaries enhanced by the dynamics of the digital age, such as societal issues like education in Nigeria, the question of democracy, challenges facing the country, and the development of a national language. Many of these societal challenges are examined in this book from the perspective of Farooq Kperogi, who has conducted extensive studies and published on the above themes. This is balanced against emerging facts, Nigerians' positions, and disregarded realities. Kperogi's relentless writings on Nigeria make him a preeminent figure whose positions are valuable to the understanding of modern Nigeria.

Comparative Capitalism Magnus Feldmann, 2025-02-20 How do capitalist institutions vary across countries and regions? How is capitalist diversity related to political and social factors like inequality, representation, and political systems? How do capitalist institutions shape economic outcomes? *Comparative Capitalism* takes a global approach to capitalist diversity. It considers not only liberal and coordinated market economies in the Global North but also other varieties such as networked, hierarchical, dependent, and statist market economies in other parts of the world. It examines new models such as growth regimes and growth models and key trends such as the growing significance of finance and the rise of populism in the 21st century. Case studies are drawn from both the Global North and South, including East Central Europe, East Asia, Latin America, and the BRICS economies, to highlight both domestic institutions and the role of economic integration on a global scale. Including tables and overviews of key features of each model, *Comparative Capitalism* is essential reading for students.
