Researching the Socio-Political Dimensions of Mathematics Education Paola Valero, Robyn Zevenbergen, 2004-08-25 Mathematics education research as a discipline is situated at the confluence of an array of diffuse seemingly incommensurable and radically divergent discourses Research claims that have grown out of mathematics education are wide ranging and antagonistic rather than circumscribed by hidebound disciplinary frames While there has never been a unified totalising discipline of knowledge labelled mathematics education research and while it has always been a contested terrain it is fair to say that the master paradigm out of which this field has been generated has been that of cognitive psychology Mainstream mathematics education knowledges refracting the master discourse of psychology whereby cognition serves as the central privileged and defining concept clearly delimits its possibilities for serving as a social tool of democratic transformation The central point of departure of this new collection is that mathematics education

research is insufficiently univocal to support the type of uncompromising interpretation that cognitive psychologists would bring to it The hallmark contribution of this pathbreaking volume edited by Paola Valero and Robyn Zevenbergen is the paradigmatic shift the authors have effected in the field of mathematics education research taking up a position at the faultline of socio cultural analysis and critical pedagogy **A Community of Practice Approach to Improving Gender Equality in Research** Rachel Palmén,Jörg Müller,2022-08-03 Bringing together the latest research among various

communities of practice disciplinary and place based as well as thematically organised this volume reflects upon the knowledge experience and practice gained through taking a unique community of practice approach to fostering gender equality in the sectors of research and innovation and higher education in Europe and beyond Based on research funded by the European Union it considers how inter organisational collaboration can foster change for gender equality through sharing of experiences of Gender Equality Plan implementation and examining the role of measures such as change monitoring systems As such it will appeal to social scientists with interests in organisational change the sociology of work and gender equality *Education in/for Socialism* Tom Griffiths,Zsuzsa Millei,2017-10-02 This book re examines aspects of historical socialism and includes case studies of education within twenty first century socialist and post socialist contexts shaped by the trajectories of historical socialism Through these case studies contributions offer insights into key questions How are education systems and student subjectivities shaped by post socialist trajectories and current regional politics economics and resistance movements How do sedimented socialist discourses and geographies alter and contest the neoliberal child and childhood in post socialist education How have disjunctures between the rhetoric of historical Marxism Leninism and the practices of educators students and student political organizations played out under socialism and what could we learn from that for our present How much emancipatory potential is there in the theories and practices of popular education for combatting injustice in the absence of mass revolutionary political parties Above all this volume affirms the need to move beyond simplistic accounts of historical socialism and post socialist transitions By exploring how socialist trajectories remain influential and have potential in our current contexts this book contributes to the work of politically engaged educators working to re imagine and reconstruct education This book was originally published as a special issue of *Globalisation Societies and Education* [Policy and the Political Life of Music Education](#) Patrick K. Schmidt,Richard Colwell,2017 *Policy and the Political Life of Music Education* is the first book of its kind in the field of Music Education It offers a far reaching and innovative outlook bringing together expert voices who provide a multifaceted and global set of insights into a critical arena for action today policy On one hand the book helps the novice to make sense of what policy is how it functions and how it is discussed in various parts of the world while on the other it offers the experienced educator a set of critically written analyses that outline the state of the play of music education policy thinking As policy participation remains largely underexplored in music education the book helps to clarify to teachers how policy thinking does shape

educational action and directly influences the nature extent and impact of our programs The goal is to help readers understand the complexities of policy and to become better skilled in how to think speak and act in policy terms The book provides new ways to understand and therefore imagine policy approximating it to the lives of educators and highlighting its importance and impact This is an essential read for anyone interested in change and how to better understand decision making within music and education Finally this book while aimed at the growth of music educators knowledge base regarding policy also fosters open thinking regarding policy as subject helping educators straddling arts and education to recognize that policy thinking can offer creative designs for educational change
