Hispanics and the U.S. Political System

Chris Garcia, Gabriel Sanchez, 2015-12-22 As the Hispanic population in the U S grows so too does its influence The general election in 2000 marked an era of increased influence and awareness by Hispanics in politics both as voters and politicians While it is clear that Latinos are influencing and changing politics the impact on politics in the U S is still not clear Authored by leading scholar F Chris Garcia and Gabriel Sanchez Hispanics and the U S Political System Moving into the Mainstream focuses on the historical contemporary and future role of Hispanics in the United States

Teacher Education and the Political Matthew Clarke, Anne Phelan, 2017-01-12 Teacher Education and the Political is a striking book which addresses the nature and purpose of teacher education in a global context characterised by economic and political anxieties around declining productivity and social inclusion These anxieties are manifested in recent policy developments such as the promotion of professional standards the deregulation and marketisation of teacher education and the imposition of performance related regimes that tie teachers pay to outcomes in high stakes testing The book assesses the implications of such policies for the work of teachers as well as for teacher educators and those undertaking initial teacher training It is argued that these policy moves can be read as a depoliticising and de intellectualising of teacher education In this context they illustrate how contemporary theory can provide a language for critiquing recent developments and imagining new trajectories for policy and practice in teacher education Drawing on the work of theorists from Derrida and Mouffe to Agamben and Lacan this book argues for the need to maintain a space for intellectual autonomy as a critical dimension of the ethico political work of teachers Together these ideas and analyses provide examples of the power of negative thinking illustrating its capacity to unsettle comfortable truths and foreground the political nature of teacher education Current teachers teacher educators and school leaders will be particularly interested readers alongside those concerned with policy in the wider educational landscape

Education and the Political Tomasz Szkudlarek,2013-11-19 The essays in this collection address the relation between education and politics in new ways Rather than understanding education simply as the object of political decision making or as preparation for politics the authors of this volume see education as implicated in social conflicts and in the political processes that produce and change social structures Education then is a practice that reconfigures the relations between subjectivities and the political The collection focuses on several critical cases and theoretical debates where the relation between education and politics demands new articulations It explores the potential of theoretical languages proposed by Ranciere Laclau Derrida Mouffe Bakhtin and other thinkers whose work has not yet been fully recognized in its pedagogical meaning Education and Training Politics in Europe Philipp Assinger,2020-09-11 In the past seventy years education and training have evolved from side issues of political cooperation to political priorities of the EU For three decades within this period they were promoted implicitly to enable the mobility of workers in the internal market Later on a European dimension of education and training has developed through mobility and cooperation programs and through the lifelong learning discourse Today a European policy space of education and training is unfolding which the EU is coordinating by the means of soft governance arrangements **Technology and Civility: The Skill Revolution in Politics** Heinz Eulau,1977

Education Policy and Power-Sharing in Post-Conflict Societies Giuditta Fontana,2016-08-24 This book explores the nexus between education and politics in Lebanon Northern Ireland and Macedonia drawing from an extensive body of original evidence and literature on power sharing and post conflict education in these post conflict societies as well as the repercussions that emerged from the end of civil war This book demonstrates that education policy affects the resilience of political settlements by helping reproduce and reinforce the mutually exclusive religious ethnic and national communities that participated in conflict and now share political power Using curricula for subjects such as history citizenship education and languages and structures like the existence of state funded separate or common schools Fontana shows that power sharing constrains the scope for specific education reforms and offers some suggestions for effective ones to aid political stability and reconciliation after civil wars *Education as a Political Tool in Asia* Marie Lall,Edward Vickers,2010-06-30 This book offers a fresh and comparative approach in questioning what education is being used for and what the effects of the politicisation of education are on Asian societies in the era of globalisation Education has been used as a political tool throughout the ages and across the whole world to define national identity and underlie the political rationale of regimes In

the contemporary globalising world there are particularly interesting examples of this throughout Asia ranging from the new definition of Indian national identity as a Hindu identity to contrast with Pakistan's Islamic identity to particular versions of nationalism in China Japan Singapore and Vietnam In Asia education systems have their origins in processes of state formation aimed either at bolstering self strengthening resistance to the encroachments of Western and or Asian imperialism or at furthering projects of post colonial nation building State elites have sought to popularise powerful visions of nationhood to equip these visions with a historical back story and to endow them with the maximum sentimental charge This book explores all of these developments emphasising that education is seen by nations across Asia as elsewhere as more than simply a tool for economic development and that issues of national identity and the tolerance or lack of it of ethnic cultural or religious diversity can be at least as important as issues of literacy and access Interdisciplinary and unique in its analysis this book will be of interest to scholars of political science research in education and Asian Studies

Political Education

Robert Brownhill, Patricia Smart, 2025-06-02 A debate has been in existence as to whether political education or indeed political argument of any kind should be kept out of the classroom There are those who argue that political education is synonymous with indoctrination and others who suggest that education is by its nature political For those who agree that there should be a distinct political aspect of the curriculum which instils political knowledge and awareness there is of course the question of where the emphasis should be placed How is it possible to achieve any kind of balance First published in 1989 Political Education analyses the debate about the introduction of courses in political education to secondary tertiary and adult education as well as to youth work It also examines the introduction of an element of political education to specific subjects It puts forward an argument for political education and discusses what it should consist of and how it should be undertaken This book will be of interest to students and researchers of education

Education for Civic and Political Participation

Reinhold Hedtke, Tatiana Zimenkova, 2013-01-04 Participation as an element of active citizenship in democracies is a key project of international and national educational policy Institutionalized approaches for compulsory schools provide participatory access to all young European citizens But does this picture depict the possibilities and practices of participation appropriately Can this standard approach to participation be translated into action in view of diverse politics policies political cultures institutions and practices of participation This book explores what prerequisites must be given for a successful implementation of such a comprehensive international project

Education as Cultivation in Chinese Culture

Shihkuan Hsu, Yuh-Yin Wu, 2014-10-24 Given the increasing global interest in Chinese culture this book uses case studies to describe and interpret Chinese cultivation in contemporary Taiwanese schools Cultivation is a concept unique to Chinese culture and is characterized by different attitudes towards teaching and learning compared to Western models of education The book starts with a discussion of human nature in Chinese schools of philosophy and levels of goodness Following the philosophical background is a presentation of how cultivation is practiced in Chinese culture from prenatal through high

school education The case studies focus both on how students are cultivated as they become members of Chinese society and on what role teachers play in cultivating the children in school In addition supports from Chinese educational institutions including public schools families and organizations such as private cram schools are introduced and explained In closing the book presents a critique of the modern school reform movement and the conflicts between the reform proposals and traditional practices Based on the collective work of Taiwanese researchers in the fields of education history and anthropology the book identifies the purpose of education as cultivating virtue in a process of creating an ideal person who serves society and describes the way teachers have carried on this tradition despite its faltering status in contemporary educational discourse and in the face of reform movements

Exploring Betty A. Reardon's Perspective on Peace Education Dale T. Snauwaert, 2019-05-15 This book presents commentaries by a leading international group of peace education scholars and practitioners concerning Reardon's peace education theory and intellectual legacy. The guiding question throughout the book is: How can her foundational work be used to advance the theory and practice of peace education? In an attempt to find answers, the contributing authors explore three general areas of inquiry: 1. Theoretical Foundations of Peace and Human Rights Education; 2. Feminism and the Gender Perspective as Pathways of Transformation Toward Peace and Justice; and 3. Peace Education Pedagogy and Practices. A contemplative commentary by Reardon herself rounds out the coverage.

[A Political Economy of Arab Education](#) Mohamed Alaa Abdel-Moneim, 2015-09-07 The failure of reform policies in areas of critical importance to Arab populations such as health and education played a central role in igniting the Arab Awakening; yet this policy perspective has been largely absent from recent studies of the region. Arab regimes most reliant on repression to guarantee their survival were also those most vulnerable to mass politics. Where threats to regime survival have been limited, so have more meaningful reforms been possible. Finding an alternative to political change through focusing on soft policy areas such as education, *A Political Economy of Arab Education* offers a comprehensive analysis of K-12 education systems in Arab countries, deepening understanding of their administrative structures and outcomes and exploring how political considerations have impacted the ability of Arab regimes to engage in meaningful reform. Taking a unique comparative political economy perspective, it examines the reasons behind policy stagnation in Arab countries, addressing the effects of size, history, and political stability on the design and implementation of policies and administrative structures. Its informed analysis and comparison of education systems provides new insight into Arab regimes and highlights factors pulling them towards either stagnation or reform. Examining the sustainability of reforms and establishing the benefits of engaging in meaningful change, this book sheds light on why some regimes survived the Arab Spring while others crumbled and formulates convincing predictions on the potential for future regime change in the region. This book will be of key interest to students and scholars of Middle Eastern Studies, International and Comparative Education, and Development Studies.
