**The SAGE Handbook of Comparative Studies in Education** Larry E. Suter, Emma Smith, Brian D. Denman, 2019-05-27 Educational practices have rapidly changed in the last few decades especially in how exchanges of information and learning are delivered and processed Yet while the field of international comparative studies has grown there has not been an extensive study on the relationship between educational practices students and how practitioners are prepared and trained This handbook explores international educational practices and behaviours through new research and a review of existing research with chapters spread across six parts Part I Introduction to Research Practices in Comparative Studies of Education Part II Research Methods Part III Policy Transfer Research through International Comparisons Part IV Use of Student time in Formal and Informal Settings Part V School Practices from Early Childhood through Secondary School Part VI Conclusion Lessons from Large Scale Studies

**The Right to Resist** Mario Wenning, Thomas Byrne, 2023-01-12 While the idea of total revolution seems anachronistic today there is increasing consensus about the importance of new forms of political ethical and aesthetic resistance In the past resistance was often motivated as a form of protest against specific institutions Increasingly dissent has become integrated into the fabric of modern life This volume addresses new forms of resistance at a level that combines a rootedness in the philosophical tradition and a sensitivity to rethinking the possibility of emancipation in today's age The work focuses on contemporary social and political philosophy from a perspective informed by critical theory The text specifically addresses three challenges 1 Critical theorists need to investigate in which ways resistance conformism and oppression oppose and constitute each other 2 The relationship between the theory and the practice of resistance needs to be posed anew given recent protest movements and media of protest 3 It needs to be shown in which ways different areas of society such as the arts religion and social media establish divergent practices of resistance The chapters are written by scholars from Asia Europe and North America These experts in resistance discourse focus on practices of dissent ranging from traditional forms of civil disobedience to more recent practices such as guerrilla protest art and resistance in digital networks including social media What unites them is a shared concern for the dimensions of political acts of resistance in an age that is characterized by a tendency to integrate and thereby neutralize those very acts
